DSL-N10
Wireless-N150 ADSL Modem Router

Modem and Router Functionality in One Powerful Package
The ASUS DSL-N10 is a true 2-in-1 device, serving as a wired and wireless modem and router. It combines all the functionality of both device classes, and adds to it with a range of features, including a powerful, wide coverage 5dBi antenna, four multiple SSIDs, plug-and-connect easy setup, and simple bandwidth prioritization.

Overview

Plug-n-Surf Installation
3 steps is all you need to setup the router.

Powerful and wide coverage
Featuring a 5dBi high-gain antenna, the DSL-N10 provides a boosted signal to ensure extended wireless networking range.

Graphic-oriented User Interface
Icon-based user interface displays the entire network status and facilitates advanced settings such as internet security in few clicks.

Bandwidth allocation and access control
The DSL-N10 can provide up to four wireless networks. You can allow different bandwidth priority and different access right to each network.
Back I/O

Other Functions
- EZ QoS
- Wireless On/Off button
- WPS button
