INSTRUCTIONS

Please read this manual before using the scanner. After you finish reading this manual, keep it in a safe place for future reference.
International ENERGY STAR® Office Equipment Program

As an ENERGY STAR® Partner, Canon Electronics Inc. has determined that this machine meets the ENERGY STAR® Program guidelines for energy efficiency. The International ENERGY STAR® Office Equipment Program is an international program that promotes energy saving through the use of computers and other office equipment. The program backs the development and dissemination of products with functions that effectively reduce energy consumption. It is an open system in which business proprietors can participate voluntarily. The targeted products are office equipment, such as computers, monitors, printers, fax, machine, copiers, and scanners. The standards and logos are uniform among participating nations.

Under factory default settings, the scanner will enter Low Power mode after 12 minutes of inactivity. Although you can change the period of time before the scanner enters Low Power mode to up to 230 minutes, we recommend using the default setting.

FCC REGULATIONS (For 120 V model)

Network Scanner, Model M11-1041/M11-1051

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules. Do not make any changes or modifications to the equipment unless otherwise specified in the manual. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Canon U.S.A. Inc.
One Canon Plaza, Lake Success NY 11042, U.S.A.
Tel. No. (516)328-5000

RADIO INTERFERENCE REGULATIONS (For 120 V models)

This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus as set out in the Interference-causing equipment standard entitled “Digital Apparatus”, ICES-003 of the Industry Canada.

RÈGLEMENT SUR LE BROUILLAGE RADIOÉLECTRIQUE (For 120 V models)

Cet appareil numérique respecte les limites de bruits radioélectriques applicables aux appareils numériques de Classe B prescrites dans la norme sur le matériel brouilleur: “Appareils Numériques”, NMB-003 édictée par l’Industrie Canada.
For CA, USA Only
Included battery contains Perchlorate Material - special handling may apply. See http://www.dtsc.ca.gov/hazardouswaste/perchlorate/ for detail.

European Union (and EEA) only
This symbol indicates that this product is not to be disposed of with your household waste, according to the WEEE Directive (2002/96/EC) and your national law. This product should be handed over to a designated collection point, e.g., on an authorized one-for-one basis when you buy a new similar product or to an authorized collection site for recycling waste electrical and electronic equipment (EEE). Improper handling of this type of waste could have a possible negative impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE. At the same time, your cooperation in the correct disposal of this product will contribute to the effective usage of natural resources. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, waste authority, approved WEEE scheme or your household waste disposal service. For more information regarding return and recycling of WEEE products, please visit www.canon-europe.com/environment. (EEA: Norway, Iceland and Liechtenstein)

Model Names
The following names may be provided for the safety regulations in each sales region of the Network Scanner.
ScanFront 300: Model M11-1041
ScanFront 300P: Model M11-1051

Introduction

Thank you for purchasing the Canon imageFORMULA ScanFront 300/300P network scanner. Please read this manual thoroughly before using the scanner to familiarize yourself with its capabilities, and to make the most of its many functions. After reading this manual, store it in a safe place for future reference.

About ScanFront 300/300P

The ScanFront 300/300P is a network scanner that you can use without connecting to a computer. You can transfer the data of an image scanned with the ScanFront 300/300P to a shared folder on a server PC or client PC on the network or to an FTP server*, send it to a printer for printing**, or deliver it to a remote location via e-mail or Internet fax service. When using the scanner without a network environment, you can also save the image files to USB memory.

* To send image files to a shared folder on a computer on a different segment of the network, the supplied ScanFront Service software must be installed on a computer on the network.
** To send image files to a printer, the supplied ScanFront Service software must be installed on a computer on the network.
Manuals for the Scanner
The following manuals are provided with the Canon ScanFront 300/300P. Be sure to read these manuals thoroughly before using the scanner.

Setup Guide
Describes the procedure for setting up the scanner for scanning. Set up the ScanFront in accordance with the Setup Guide. For details on the ScanFront, refer to the Operation Guide and ScanFront 300/300P INSTRUCTIONS (electronic manuals).

Operation Guide*
Provides an overview of the functions of the scanner, and describes the basic operations for using the ScanFront. For details on the settings of the ScanFront, refer to the ScanFront 300/300P INSTRUCTIONS (electronic manual).
* The printed version of Operation Guide may vary depending on your region. PDF files of the Operation Guide in other languages can be found on the INSTRUCTIONS AND UTILITIES CD-ROM.

INSTRUCTIONS (Electronic Manual): This Manual
Describes how to use the scanner, and includes instructions for configuring the scanner settings, as well as handling, maintenance, and troubleshooting information. This manual is stored as a PDF file on the supplied INSTRUCTIONS AND UTILITIES CD-ROM and requires Adobe Reader to open. (You can download Adobe Reader from the Adobe Web site.)

Symbols Used in This Manual
The following symbols are used in this manual to explain procedures, restrictions, handling precautions, and instructions that should be observed for safety.

WARNING
Indicates a warning concerning operations that may lead to death or injury to persons if not performed correctly. To use the scanner safely, always pay attention to these warnings.

CAUTION
Indicates a caution concerning operations that may lead to injury to persons, or damage to property if not performed correctly. To use the scanner safely, always pay attention to these cautions.

IMPORTANT
Indicates operational requirements and restrictions. Be sure to read these items carefully to operate the scanner correctly, and avoid damage to the scanner.

Hint
Indicates a clarification of an operation, or contains additional explanations for a procedure. Reading these notes is highly recommended.
How This Manual is Organized

This manual consists of the following chapters.

Chapter 1  Before Use
This chapter provides an overview of the ScanFront.

Chapter 2  Handling
This chapter describes the types of documents that can be scanned, and the basic operations of the scanner.

Chapter 3  ScanFront Setup
This chapter describes the setup procedures and Administrator Settings of the scanner.

Chapter 4  ScanFront Service
This chapter describes the how to use and configure ScanFront Service.

Chapter 5  Operating Procedures
This chapter describes the basic operating procedures for the scanner.

Chapter 6  Web Menu (Administrator Mode)
This chapter describes the Web menu for the administrator to configure settings.

Chapter 7  ScanFront Administration Tool
This chapter describes how to install and use ScanFront Administration Tool.

Chapter 8  Web Menu (User Mode)
This chapter describes the Web menu for the user to configure settings.

Chapter 9  Maintenance
This chapter describes how to clean the scanner and replace the consumable parts such as rollers.

Chapter 10  Troubleshooting
This chapter describes how to respond when problems occur or warning messages appear.

Chapter 11  Appendices
This chapter describes the scanner specifications.

1. **Important Safety Instructions**

To ensure the safe operation of this scanner, be sure to read the safety warnings and precautions described below.

- **Installation Location**
  The performance of this scanner is affected by the environment in which it is installed. Make sure that the location where the scanner is installed meets the following environmental requirements.

  - Provide adequate space around the scanner for operation, maintenance, and ventilation.

  - Avoid installing the machine in direct sunlight. If this is unavoidable, use curtains to shade the scanner.

  - Avoid locations where a considerable amount of dust accumulates.

  - Avoid warm or humid locations, such as in the vicinity of a water faucet, water heater, or humidifier, and avoid locations where the fumes from ammonia, paint thinner, or other volatile chemicals may be present.

  - Avoid locations that are subject to vibration.

  - Avoid exposing the scanner to rapid changes in temperature. If the room in which the scanner is installed is cold but rapidly heated, water droplets (condensation) may form inside the scanner. This may result in a noticeable degradation in scanning quality.

    The following conditions are recommended for optimal scanning quality:
    - Room temperature: 10 °C to 32.5 °C (50 °F to 90.5 °F)
    - Humidity: 20% to 80% RH

  - Avoid installing the scanner near equipment that generates a magnetic field (e.g. speakers, televisions, or radios).

- **Power**
  - Connect only to a power outlet of the rated voltage and power supply frequency (either 120 V, 60 Hz or 220-240 V, 50/60 Hz, depending on your region).

  - Do not connect other electrical equipment to the same power outlet to which the scanner is connected. Also, when using an extension cord, make sure that the extension cord is rated for the current requirements of the scanner.

  - Never try to disassemble the AC adapter or modify it in any way, as this is extremely dangerous.

  - The power cord and AC adapter may become damaged if they are often stepped on or if heavy objects are placed on them. Continued use of a damaged power cord and AC adapter can lead to an accident, such as a fire or electrical shock.

  - Do not use the power cord while it is coiled.
Do not pull directly on the power cord. When disconnecting the power cord, grasp the plug and remove it from the outlet.

Keep the area around the power plug clear of objects so that the power cord can be disconnected easily in an emergency.

Use only the AC adapter provided with this scanner. Also, do not use the AC adapter provided with the scanner with any other electrical devices. Model: MG1-4314

If you have any questions regarding the power supply, contact your local authorized Canon dealer or service representative for further information.

Moving the Scanner

When moving the scanner, always hold it with both hands to avoid dropping it. The weight of the scanner unit is approximately 7.9 lbs (3.6 kg).

Before moving the scanner, make sure the document tray is closed and the interface cable and AC adapter are disconnected. If the scanner is transported with these items connected, the plugs and connectors may be damaged due to excessive force applied to them during movement.

Handling

WARNING

Note the following precautions whenever using the scanner. Failure to do so may result in a fire or electric shock.

Never use alcohol, benzene, paint thinner, aerosol sprays, or any other highly flammable substance near the scanner.

Do not cut, damage, or modify the power cord or AC adapter. Do not place heavy objects on the power cord or AC adapter, and do not pull or excessively bend the power cord.

Never connect the power cord when your hands are wet.

Do not connect the scanner to a multiplug power strip.

Do not knot or coil the power cord, as this may result in a fire or electric shock. When connecting the power cord, make sure that the power plug is securely and completely inserted into the power outlet.

Do not use power cords and AC adapters other than the power cord and AC adapter provided with this scanner.

Never try to take the scanner apart or modify it in any way.

Never try to take the AC adapter apart or modify it in any way, as this is dangerous and may lead to a fire or electric shock.

Do not use flammable aerosol sprays near the scanner.

When cleaning the scanner, turn the power OFF and disconnect the power cord from the power supply.

Clean the scanner using a slightly dampened cloth which has been well wrung out. Never use alcohol, benzene, paint thinner, or any other flammable substances.
If the scanner makes strange noises, or gives off, smoke, heat, or strange odors, or the scanner does not function or other abnormalities occur when you use the machine, immediately turn the power OFF, and disconnect the power plug from the power outlet. Then, contact your local authorized Canon dealer or service representative for further information.

Do not drop the scanner, or subject it to impact or strong shock. Should the scanner ever become damaged, immediately turn the power OFF, and disconnect the power plug from the power outlet. Then, contact your local authorized Canon dealer or service representative to have the unit serviced.

Before moving the scanner, make sure to turn the power OFF, and disconnect the power plug from the power outlet.

**CAUTION**

- Do not install the scanner on a surface that is unstable or tilted, or in an area subject to excessive vibrations, as this may cause the scanner to fall, resulting in personal injury or damage to the scanner.
- Do not block the ventilation openings. Doing so could cause the scanner to overheat, creating a risk of fire.
- Never place small metal objects such as staples, paper clips, or jewelry on the scanner. These items may fall into the scanner, and cause a fire or electric shock. Should such objects ever fall inside the scanner, immediately turn the power OFF, and disconnect the power plug from the power outlet. Then, contact your local authorized Canon dealer or service representative to have the unit serviced.
- Do not install the scanner in a humid or dusty location. Doing so may result in a fire or electric shock.
- Do not place objects on top of the scanner, as they may tip over and fall, resulting in personal injury.
- Do not use the scanner with a power supply voltage other than 120/220-240 VAC. Doing so might cause fire or electric shock.
- When disconnecting the power cord, grasp it firmly by its plug. Do not pull directly on the power cord, as this may damage or expose the cord's internal wiring, resulting in a fire or electric shock.
- Leave sufficient space around the power plug so that it can be disconnected easily. If objects are placed around the power plug, you will be unable to disconnect it in an emergency.
- Do not allow water or flammable substances (alcohol, paint thinner, benzene, etc.) to spill into the scanner, as this may result in a fire or electric shock.
- Turn OFF the power for safety when not using the scanner for a long period of time, such as overnight. Also, turn OFF the power, and disconnect the AC adapter from the scanner and disconnect the power cord from the power outlet for safety when the machine will not be used for an extended period of time, such as during consecutive holidays.
- Do not wear loose clothing or jewelry that may get caught in the scanner while you are using it. This may result in personal injury. Be extra careful of neckties and long hair. If anything becomes caught in the scanner, immediately disconnect the power cord to stop the scanner.
- Be careful when placing paper in the scanner and when removing jammed paper. It is possible to cut your hand on the edge of a sheet of paper.
About the Fingerprint Sensor
(ScanFront 300P only)

● The following actions may damage the sensor or cause it to malfunction:
  – Dropping an object on the fingerprint sensor, or otherwise subjecting it to a strong impact
  – Scratching the surface of the fingerprint sensor, or poking it with a pointed object
  – Pressing a hard object such as a fingernail or metal item against the fingerprint sensor
  – Touching the fingerprint sensor with dirty hands
  – Placing a sticker on the surface of the fingerprint sensor, or covering the surface with ink or another substance

● If fingerprint authentication fails frequently, the fingerprint sensor may be dirty. Clean the surface of the fingerprint sensor regularly.

● When cleaning the fingerprint sensor, use a soft dry cloth to wipe dirt off the surface.

● Do not use a pointed object to remove any dirt that accumulates around the fingerprint sensor. Doing so may cause the fingerprint sensor to malfunction.

● Touching the fingerprint sensor while charged with static electricity may cause the fingerprint sensor or scanner unit to malfunction. Before touching the fingerprint sensor, discharge any static electricity by touching a piece of metal. Be especially careful during dry periods, such as the winter season, when the likelihood of being charged with static electricity is high.

Disposal

● Prior to disposing of the scanner, initialize the scanner to ensure that the registered data is deleted.

● When disposing of the scanner, make sure to follow all local ordinances and laws or consult with the retailer who sold you the scanner.
2. Features of the ScanFront 300/300P

The main features of the ScanFront 300/300P are described below.

- **ScanFront 300/300P**
  - **Compact Network Document Scanner**
    The network document scanner has a compact design of 12.20" (W) \times 8.66" (D) \times 6.34" (H) (310 mm (W) \times 220 mm (D) \times 161 mm (H)). You can scan documents in a range of sizes from business cards to Legal/A4 size.
  - **Supports Transfer to a Variety of Destinations**
    You can transfer scanned image files to the following types of destinations via a network.
    - Shared folders (excluding folders on a computer on a different segment of a network for which a WINS server is not configured)
    - FTP Servers (excluding FTP servers that require firewall settings)
    - E-mail addresses
    - Fax (via an Internet fax service)
  - **ScanFront Service**
    By installing ScanFront Service on a computer on the network, you can also send scanned images to shared folders and devices, such as the following, for which direct transfer from the scanner is normally unavailable.
    - Shared folders on a computer on a different segment of a network for which a WINS server is not configured
    - Printers
  - **Variety of Scanning Modes**
    The scanner is equipped with five scanning modes: Black and White, Error Diffusion, Text Enhance, Gray, and Color.
  - **Long Document Scanning**
    The scanner is equipped with a scanning mode that can automatically detect long document sizes.
    * The available scanning modes vary depending on the file format of the image to be transferred.

- **Fast Document Feeding**
  The scanner can scan a maximum of 30 Legal/A4 documents per minute.
    * Scanning conditions: Black and white, simplex, 200 dpi
- **Supports USB Memory**
  The scanner supports saving image files to USB memory to enable you to move them to destinations not connected to or not using a network.
- **Touch Panel Operation**
  The 8.4-inch TFT SVGA (800 x 600 dots) screen with a touch panel enables you to perform all scanner operations by touching the screen.
- **Configuration via the Web Menu**
  A web browser (Web Menu) is used for configuring the basic settings of the ScanFront, user registration, and job button registration.
    * The Web Menu has an Administrator Mode for the administrator to configure settings and a User mode for users to register addresses and job buttons.
- **ScanFront Administration Tool**
  By installing the supplied ScanFront Administration Tool software, you can simultaneously manage multiple ScanFront scanners on the network.
- **Job Buttons**
  Pre-registering destinations and scan conditions as jobs enables you to scan by selecting a job button.
- **Shared Address Book and Shared Job Button**
  The Shared Address Book and Shared Job Buttons are available for use by all users.
- **My Address Book and My Job Button**
  In addition to the address book and job buttons shared by all users, a My Address Book and My Job Button are available for each user.
Supports Mouse and Keyboard
In addition to touch-panel operation, you can also use a mouse and keyboard to operate the scanner. (See p. 2-5.)

Supports Directory Services
The scanner supports directory services (Active Directory and OpenLDAP), which enables you to reference and use user accounts and e-mail addresses registered on a domain server and LDAP server.

Functional Restrictions
The scanner enables you to restrict, for example, the destinations and Home screen available to each user.

Auto Size Detection
The scanner can detect the size of a scanned document and erase the white space around the image.

Auto Color Detection
The scanner can automatically detect whether a document is color or black and white, and save the scanned images accordingly.

Folio Scanning
The scanner can scan both sides of a document folded in half and create a single scanned image.

Text Enhance Mode
The background color of the text are processed to enhance the text portions and make them easy to read.
* This function may not work effectively for some documents.

Double Feed Detection by Length
When the scanner detects a double feed by comparing the lengths of documents, it stops feeding.
* Using the length of the first document as a reference, the scanner detects a double feed when a document of a different length is fed.

Skip Blank Page Function
The scanner scans both sides of a document and skips saving the image of any side it determines to be a blank page.

Deskew
If the scanner detects from a scanned image that the document was fed askew, the image is straightened.

Image Rotation
The scanner can rotate a scanned image in 90° increments, or detect the text orientation within the document, and then rotate the image in 90° increments so that the orientation of the text is correct.

Eliminates Bleed-Through
The scanner prevents the images on the reverse side of thin documents from appearing on the scanned pages.

Dropout and Color Enhancement Functions
The scanner is equipped with a dropout function that allows you to specify one color (red, blue, or green) to omit, and a function to enhance a specified color when scanning.

Card Scanning
You can scan credit cards and IC cards that conform to ISO standards.

Prescan
This function prescans the first page of a document at the start of scanning, and then stops scanning so that you can view the results to adjust the brightness and contrast before scanning the entire document.

ScanFront 300P

Fingerprint Authentication
The authentication system that uses a fingerprint sensor to authenticate users enables you to log in to the ScanFront 300P without entering your user name and password.

Double Feed Detection by Ultrasonic Function
In addition to the double feed detection function that compares the lengths of documents, the scanner is equipped with a double feed detection function that uses an ultrasonic sensor.
3. Names and Functions of Parts

The names and functions of the parts of the ScanFront 300/300P are shown below.

- **Front and Document Feed and Eject Trays**

  - ① Tray Extension
    Open this to prevent scanned documents from slipping off.

  - ② Document Eject Tray
    Open this tray when using the ScanFront. If scanned documents curl in the document eject tray, remove the entire tray. (See p. 2-4.)

  - ③ Panel Unit
    Open this when there is a paper jam or to perform maintenance. (See p. 2-10.)

  - ④ Touch Panel
    Touch this screen to operate the ScanFront.

  - ⑤ Lock Lever
    Locks the panel unit. Pull the lever toward you to unlock the panel unit. (See p. 2-10.)

  - ⑥ Document Guides
    Adjust these to match the width of the document. (See p. 2-6.)

  - ⑦ Document Feed Tray
    Place documents here. (See p. 2-4.)

  - ⑧ USB Port (Front)
    Connect a USB1.1/Hi-Speed USB2.0 compatible USB memory device, USB keyboard, or USB mouse.

  - ⑨ Power Switch
    Use this to turn the power ON. (See p. 3-4.)
    * Use the Power OFF button on the touch panel to turn the power OFF.

  - ⑩ Feed Selection Lever
    Use this lever to change the feed method for documents. (See p. 2-5.)

  - ⑪ Power Indicator
    Lights when the power is ON. (See p. 3-4.)

  - ⑫ Fingerprint Authentication Sensor (Only Available with the ScanFront 300P)
    This fingerprint sensor is for fingerprint registration and authentication. (See p. 2-11.)
Side and Rear

13 USB Port (Rear Left)
   Connect a USB1.1/Hi-Speed USB2.0 compatible USB memory device, USB keyboard, or USB mouse.

14 Power Connector (24 VDC)
   Connect the plug of the supplied AC adapter. (See p. 3-3.)

15 Kensington Slot
   This is an anti-theft slot that enables a key chain or lock to be connected to prevent theft.

16 Service Switch
   This is a service switch. Do not insert any object into this hole.

17 LAN Port (RJ-45)
   Connect an RJ-45 (10Base-T/100Base-TX) compatible network cable. (See p. 3-3.)

18 USB Ports (Rear Right)
   Connect a USB1.1/Hi-Speed USB2.0 compatible USB memory device, USB keyboard, or USB mouse.

19 Ventilation Holes
4. Network Environment

The network environment required to use the ScanFront is described below. To obtain details on your network environment, contact your network administrator.

- Network Environment
  - Microsoft Windows Network
    Use the scanner in a Microsoft Windows Network environment.
  - Network Protocol
    The scanner uses TCP/IP protocol to connect to the network.
  - IP Address Assignment
    The TCP/IP protocol uses one IP address for each device connected to the network. Consult your network administrator to determine the IP address to assign to the scanner.
  - DHCP Support
    The scanner supports DHCP (Dynamic Host Configuration Protocol). A DHCP server provides a network environment in which IP addresses can be obtained automatically from the DHCP server, so there is no need to set an IP address for the scanner.
    * The number of IP addresses that can be obtained using DHCP is managed by the network administrator. For details, consult your network administrator.
  - 100Base-TX Support
    The scanner supports 100Base-TX. However, communication may be slower than the communication speed of the network, depending on the other devices connected to the network and the type of hub.
  - SMTP (E-mail) Server
    The scanner supports an SMTP server, so you can send image files directly from the scanner by e-mail.
  - FTP Server
    The FTP server function supports an FTP server configured within the local network, and is unable to send to an FTP server that requires firewall settings.

- Fax
  Scanned images can be sent to specified addresses as fax documents by sending e-mails that include the scanned images as attachments to an Internet fax service. Therefore, you must specify message formats and addresses in the method prescribed by your Internet fax service.

- Printer
  By specifying a printer connected to the same network as the ScanFront as the destination, you can print scanned images. In such cases, a computer on which ScanFront Service is installed must exist on the same network as the ScanFront scanner.

- Directory Service Support
  - Active Directory
    Active Directory is a directory service adopted by Windows 2000, and information registered to Active Directory can be used on other computers. The ScanFront allows user information registered to the domain server registered as the authentication server to be used for authentication to log in to the ScanFront.
    * A domain server that uses Windows NT Server for the operating system cannot be registered as an authentication server.
  - OpenLDAP Server
    The scanner supports OpenLDAP servers that can be connected to with the LDAP (Lightweight Directory Access Protocol) protocol.
    You can authenticate ScanFront users and reference e-mail addresses for registration to the address book using the user information registered on the OpenLDAP server.
Limits

- **Limitations in Browsing for Shared Folders**
  A problem in browsing for shared folders on computers running the Windows 7 or Windows Server 2008 R2 operating system has been determined to exist. You will not be able to browse for shared folders to act as image file destinations by pressing the [Browse] button on the ScanFront touch panel. (Similarly, you will not be able to browse for shared folders in the screen that appears after you click [Browse] in the ScanFront Web Menu.)
  This problem is due to the specifications of Windows 7 and Windows Server 2008 R2.
  As a result, if you want to specify a shared folder on a computer running these operating systems as the destination for image files, you must enter the shared folder manually. (When operating the ScanFront touch panel to specify a shared folder as the destination address, for example, enter the folder path in [Folder path].) Instead of entering the full path in such cases, you can press the [Browse] button after entering the computer name and the path up until the top-most folder of that computer, and then specify the rest of the path in the screen that appears.
  This problem does not occur when the supplied ScanFront Service software is installed on the network.

- **Limitations for Network Environments without ScanFront Service**
  To send image files to destinations and devices, such as the following, the supplied ScanFront Service software must be installed on a computer on the same network as the ScanFront scanner.
  - Destinations (folders on computers, printers, etc.) located on different segments of a network on which a WINS server is not configured
  - Printers on the network
  - Certain NAS (network-attached storage)
Chapter 2  Handling

1. Documents....................................................... 2-2
   Plain Paper............................................................2-2
   Business Card.......................................................2-2
   Card ......................................................................2-3
2. Preparing the Scanner..................................... 2-4
   Preparing the Document Feed Tray and
   Eject Tray ..............................................................2-4
   Feed Selection Lever ............................................2-5
   USB Port ...............................................................2-5
3. Placing Documents.......................................... 2-6
   Placing a Document ..............................................2-6
   Placing a Folded Document .................................2-7
   Placing a Long Document .................................2-7
   Placing a Card .......................................................2-8
4. Clearing a Paper Jam or Double Feed Error ... 2-9
5. Fingerprint Sensor (ScanFront 300P)............ 2-11
   Cautions for Handling the Fingerprint Sensor ....2-11
   Fingerprint Authentication .................................2-12
1. Documents

The ScanFront can scan documents in a range of sizes from business cards to Legal/A4.
It is possible to feed documents of the following sizes and thicknesses depending on the feeding method used.

- **Plain Paper**
  
  **Size**
  
  Width: 2” to 8 1/2” (50.8 mm to 216 mm)
  Length: 2 1/8” to 14” (53.9 mm to 355.6 mm)
  (up to 39.3” (1,000 mm) in Long Document mode)

  **Thickness for Page Separation ON**
  
  14 lb to 57 lb bond (52 g/m² to 209 g/m²)

  **Thickness for Page Separation OFF**
  
  11 lb to 57 lb bond (40 g/m² to 209 g/m²)

- **Business Card**
  
  **Size**
  
  Width: 2” (50.8 mm) and above
  Length: 2 1/8” (53.9 mm) and above

  **Thickness**
  
  82 lb Cover (300 g/m²) and below

- **IMPORTANT**

  A document must meet the following criteria to be scannable:
  
  - When scanning a multipage document, pages must be grouped together so that they have the same size, thickness, and weight. Scanning different types of paper at one time can cause the scanner to jam.
  
  - Always make sure that the ink on a document is dry before scanning it. Scanning documents with the ink still wet may soil the rollers or scanning glass, cause lines or smudges to appear on images, or dirty other documents.
  
  - Always clean the rollers or scanning glass after scanning a document written in pencil. Scanning documents with pencil written on them may soil the rollers or scanning glass, cause stripes to appear in images, or dirty other documents.
  
  - When scanning a two-sided document that is printed on thin paper, the image on the opposite side of each page may show through. Adjust the brightness in the scanning conditions before scanning the document.

- **Note that scanning the following types of documents can cause a paper jam or malfunction. To scan such a document, make a photocopy of the document and then scan the photocopy.**

  - Wrinkled or creased documents
  - Curled documents
  - Torn documents
  - Documents with paper clips or staples
  - Carbon paper
  - Coated paper
  - Extremely thin, translucent paper
  - Document with square punch holes
Card

Size
2.12" × 3.37" (53.9 × 85.5 mm) (Conforming to ISO Standards)

Thickness
0.0299" (0.76 mm) and below

Insertion orientation
Landscape

⚠️ IMPORTANT
• Insert cards one at a time.
• Be careful when inserting cards to avoid damaging them.
2. Preparing the Scanner

When placing a document in the scanner, pull out the document eject tray so that it matches the size of the document, and then move the feed selection lever to the appropriate position for the desired feed method (Page Separation ON or OFF) for the document.

Preparing the Document Feed Tray and Eject Tray

Prepare the trays in accordance with the type of document.

1. Open the document feed tray ①.
2. Open the document eject tray ②.

Hint
Open the center tray extension when output documents are likely to fall out of the tray.

Hint
If the output documents curl in the eject tray when scanning particularly thin documents, remove the eject tray.

To remove the document eject tray, push in on the illustrated portions of the tray on both sides in the direction of the arrows ① and pull out ②.

To reattach the eject tray, insert the protrusions on both sides of the tray into the holes on the scanner.

After connecting the tray, make sure that it is attached securely.
Feed Selection Lever
Change the position of the lever to the desired feed method for the document.

Page Separation ON
Move the lever downward to separate a stack of documents one page at a time in order to continuously feed the documents.

Page Separation OFF
Move the lever upward to feed a document with multiple pages attached together such as an invoice one page at a time without separating the pages.

IMPORTANT
Moving the lever upward (Page Separation OFF) and then scanning a stack of documents will cause multiple pages to be fed at the same time.

USB Port
You can insert a USB memory device to store image files.

You can also connect a USB keyboard and USB mouse to operate the ScanFront.

IMPORTANT
• The scanner will not start if you turn the power ON while a USB memory device is inserted. Insert the USB memory device after the scanner has started up.
• Use USB memory that is not write-protected. If the USB memory is write-protected, data cannot be written to the USB memory.
• This scanner does not support USB memory equipped with password security, data encryption, or functions other than data storage.
• Make sure that the USB memory has sufficient space to store images.
3. Placing Documents

When placing documents into the scanner, place them face down into the tray with the top edge of the document at the bottom of tray.

- Placing a Document
  
  Follow the procedure below to place a document.
  
  1. Adjust the document guides to be wider than the width of the document.

  2. Fan the document to offset the pages so that the top edge of the first page is the lowest.

  3. Place the document face down with its top edge at the bottom of the tray.

  4. Adjust the document guides to fit the width of the document.
Make sure that document stacks placed in the feed tray do not exceed the document guides.

The number of sheets that you can place in the scanner at one time varies by paper size as follows.
Legal/A4 Size or Smaller:
50 sheets (stack 5 mm thick) or less
Sizes Larger than Legal/A4:
30 sheets (stacks 3 mm thick) or less

Placing a Folded Document
Folio Scan enables you to scan documents that are larger than Legal/A4 and therefore do not fit in the feeder. (The maximum size is 11" X 17"/A3.) To use the function, fold the document in half lengthwise and place it into the feeder. The ScanFront 300/300P will scan both sides and combine the scanned images into a single image.

Placing a Long Document
You can scan documents up to 39.3" (1,000 mm) in length.

When placing folded documents, place the document into the scanner so that the fold is on the right side. The side of the folded document facing you will become the right side of the combined image.

Hint
When scanning folded documents, switch the feed selection lever to OFF. (See p. 2-5.)

When placing folded documents, place the document into the scanner so that the fold is on the right side. The side of the folded document facing you will become the right side of the combined image.

When scanning a document that is folded in half, set [Resolution (dpi)] to 300 dpi or less.

When scanning a document that is folded in half, the [Double feed detection by Ultrasonic] function cannot be used.

Placing a Long Document
You scan documents up to 39.3" (1,000 mm) in length.

When scanning a long document, set [Page Size] to [Auto size (Long)].

When scanning a long document, set [Resolution (dpi)] to 200 dpi or less.

Placing a Card

When you want to scan a card, follow the procedure below to place the card.

1. Move the feed selection lever upward (OFF).
   
   ! IMPORTANT
   
   When scanning cards, set the feed selection lever to OFF and make sure to scan the cards one at a time.

2. Adjust the document guides to match the width of the card.

3. Place the card face down with the top edge at the bottom of the tray.

---

CAUTION

- A card placed into the document feed tray in the portrait orientation may not be output properly because a load is placed on it during feeding. Furthermore, removing a card that has caused a feeding error may damage the card, so make sure to correctly insert the card.
- Pull the lock lever and open the panel unit before removing a placed card. Inserting a finger into the scanner while the panel unit is closed may result in an injury.
4. Clearing a Paper Jam or Double Feed Error

When a paper jam or double feed error is detected, feeding and scanning stops.

1. Check the displayed message.
   If a paper jam or double feed error is detected at the first page of a document, the following messages appear.

   ![Message Image]

   **Hint**
   - If you press [Complete], the display returns to the previous screen.
   - If you want to continue scanning, reset the document before progressing with screen operations. Press [Continue] to resume scanning.

   ![Reset Image]

   If a paper jam or double feed error is detected in the middle of a document, the following messages appear.

   ![Message Image]

   **Hint**
   - If you press [Abort], the scanned images are canceled, and the display returns to the previous screen.
   - If you want to continue scanning, clear the document first before touching the screen. After you reset the cleared document, press [Continue] to resume scanning.
   - If you press [Complete], the scanned images up until the paper jam or double feed error are saved and scanning completes. The display switches to the Send screen.

   ![Complete Image]
When the message above is displayed and the scanner transitions to Low Power Mode, all of the data scanned up until that point is discarded. (See “Low Power Mode” on p. 6-31.)

2. Remove the scanned documents from the document eject tray, and any documents remaining in the document feed tray.

3. Pull the lock lever toward you and then fully open the panel unit.

4. Pull out the jammed document in the direction that seems the easiest to remove it.

5. Close the panel unit and then place the document again.

- If double feed errors occur repeatedly, reduce the number of sheets you place in the document feed tray to about 10.
- A dirty or worn feed roller, or documents stuck together as a result of static electricity are common causes of paper jams or double feed errors.

If the feed roller is dirty, clean it. If paper jams or double feed errors continue to occur even after cleaning, purchase an Exchange Roller Kit and replace the rollers (feed roller and retard roller), and document holding guides. (See p. 9-8.)
5. Fingerprint Sensor *(ScanFront 300P)*

The ScanFront 300P is equipped with a fingerprint sensor for registering fingerprints and authenticating users. The fingerprint sensor is a precision component. Be careful when handling this sensor.

- **Cautions for Handling the Fingerprint Sensor**

  - The following actions may damage the fingerprint sensor or cause it to malfunction. Read this information carefully to avoid damaging the sensor.
    - Dropping an object on the fingerprint sensor, or otherwise subjecting it to a strong impact
    - Scratching the surface of the fingerprint sensor, or poking it with a pointed object
    - Pressing a hard object such as a fingernail or metal item against the fingerprint sensor
    - Touching the fingerprint sensor with dirty hands
    - Placing a sticker on the surface of the fingerprint sensor, or covering the surface with ink or another substance
  
  - If fingerprint authentication fails frequently, the fingerprint sensor may be dirty. Clean the surface of the fingerprint sensor regularly.
  
  - When cleaning the fingerprint sensor, use a soft, dry cloth to wipe dirt off the surface.

  - Do not use a pointed object to remove any dirt that accumulates around the fingerprint sensor. Doing so may cause the fingerprint sensor to malfunction.
  
  - Touching the fingerprint sensor while charged with static electricity may cause the fingerprint sensor or scanner unit to malfunction. Before touching the fingerprint sensor, discharge any static electricity by touching a piece of metal. Be especially careful during dry periods, such as the winter season, when the likelihood of being charged with static electricity is high.
Fingerprint Authentication

Follow the procedure below to use fingerprint registration and authentication.

1. Align the first joint of a finger on the sensor and press the finger on the fingerprint sensor.
2. Keep the finger pressed while slowly sliding it straight at a constant speed to scan the fingerprint.

Fingerprint authentication uses the unique information of fingerprints. The fingerprint authentication function may not work properly for a finger with a fingerprint that is worn down or has few distinguishable features.

The same finger needs to be scanned three times to register the fingerprint.

The authentication performance differs depending on the condition of the fingerprint when it is registered and when it is authenticated. The following conditions may cause an error in fingerprint authentication:

- The finger is wet or sweaty
- The finger is dirty
- The grooves of the fingerprint are filled with sweat or oil
- The finger is dry (dry skin)
- Part of the fingerprint is missing because of, for example, a wound or burn injury
- The fingerprint has worn thin

Authentication performance may improve if the condition of the fingerprint is improved as a result of washing your hands or applying hand cream.

Authentication may not be performed properly depending on the speed with which you slide your finger over the sensor. In this case, adjust the speed with which you slide your finger in accordance with the message that appears.

Fingerprint authentication does not necessarily guarantee the authentication and verification of the identity of a person.

Hint
For details on the procedures for fingerprint registration and authentication, see Chapter 5 “Operating Procedures".

1. Before Setting Up the Scanner

Before setting up the scanner, you need to move it to the installation site, and connect the AC adaptor and network cable.

- **Installation Location**

  The performance of this scanner is affected by the environment in which it is installed. Make sure that the location where the scanner is installed meets the following environmental requirements.
  - Provide adequate space around the scanner for operation, maintenance, and ventilation.
  - Avoid installing the machine in direct sunlight. If this is unavoidable, use curtains to shade the scanner.
  - Avoid locations where a considerable amount of dust accumulates.
  - Avoid warm or humid locations, such as in the vicinity of a water faucet, water heater, or humidifier, and avoid locations where the fumes from ammonia, paint thinner, or other volatile chemicals may be present.
  - Avoid locations that are subject to vibration.
  - Avoid exposing the scanner to rapid changes in temperature. If the room in which the scanner is installed is cold but rapidly heated, water droplets (condensation) may form inside the scanner. This may result in a noticeable degradation in scanning quality.
    - The following conditions are recommended for optimal scanning quality:
      - Room temperature: 10 °C to 32.5 °C (50 °F to 90.5 °F)
      - Humidity: 20% to 80% RH
  - Avoid installing the scanner near equipment that generates a magnetic field (e.g. speakers, televisions, or radios).
Connecting the AC Adapter

Follow the procedure shown below to connect the AC adapter.

⚠️ CAUTION
Make sure to use only the AC adapter and power cord included with the scanner.

1. Connect the power cord and AC adapter.
2. Insert the plug of the AC adapter into the power connector.
3. Connect the power cord to the wall outlet.

Connecting the Network Cable

Insert the network cable connector (RJ-45) into the LAN port.
2. **Turning the Power ON and OFF**

Use the power switch to turn the scanner ON, and press the [Power off] button on the touch panel to turn it OFF.

晞 **Turning the Power ON**

Press the power switch to turn the scanner ON. The power indicator lights, and the Home screen or the login screen appears.

晞 **Turning the Power OFF**

Press the [Power off] button displayed at the bottom left of the panel to turn the scanner OFF.

晞 **IMPORTANT**

- It takes approximately 40 seconds for the Home screen to appear after the power switch is turned on.
- When the power indicator is lit but nothing appears on the touch panel, Display Off has activated to turn the panel display off. You can touch the panel to restore the display. (See “Display Off” on p. 6-31.)
- When the power indicator is flashing but nothing appears on the touch panel, the Low Power mode has activated to temporarily stop scanner operations. To switch out of Low Power mode, press the power switch or touch the touch panel. (See “Low Power Mode” on p. 6-31.)

晞 **IMPORTANT**

- When restarting the scanner, wait at least 5 seconds after turning the power OFF before turning it ON again.
- If the scanner stops responding, press and hold the power switch to shut down the system, and then press the power switch to turn the scanner ON again. In such cases, settings configured immediately before shutting down may be lost.
3. Configuring the Scanner Settings

The scanner setup consists of configuring the initial network settings from the [Administrator setting] screen, and then configuring the settings needed to use the scanner as described in Chapter 6 “Web Menu (Administrator Mode)”.

☑ Administrator Settings

The following items are available for administrator settings. For details, see “Configuring Administrator Settings” on p. 3-8.

Hint

Except for the scanner maintenance items (roller counter reset, touch panel adjustment, and initialization), the administrator setting items can be configured from the Web Menu (Administrator Mode). For details, see “Web Menu (Administrator Mode)” on p. 3-6 or Chapter 6 “Web Menu (Administrator Mode)”.

<table>

<td>Yes (See p. 6-42)</td>
<td>No</td>
</tr>
</tbody>
</table>
4. **Configuring Administrator Settings**

Enter the administrator password and log in to configure administrator settings.

- **Logging In to the Administrator Settings**
  
  Follow the procedure below to configure the [Device name] and [IP address] needed to connect the scanner to a network.

  1. Press [Administrator setting].

      ![Administrator setting screen](image)

      The [Administrator Password] input box appears.

      No administrator password is set by default.

    3. Select the setting item to configure.
Network Settings

Under Network Settings, configure the device name and IP address needed to connect the scanner to a network.

Network Setting screen

- **IMPORTANT**
  - Configure network settings while the network cable is connected to the scanner. If the network cable is not connected to the scanner, you will not be able to verify or modify settings in the network settings screen.
  - The device name is the name for the scanner used on the network. When changing this setting, make sure to select a unique name that is different from those of all other devices.
  - The device name can be a combination of letters (A-Z, a-z), numbers (0-9), and hyphens (-) up to 15 characters long.
  - The device name must begin with a letter. You cannot end the device name with a hyphen.
  - When a DHCP server is not used to assign IP addresses, clear the [DHCP server Enable] check box, and enter a fixed address. For details, contact your network administrator.
  - If the DHCP server is enabled and the DNS server and WINS server information is not obtained properly, clear the [Automatic retrieval of DNS (WINS) server] check box, and enter the appropriate server addresses.

Administrator Password

Set the password required to log in to [Administrator setting] and the Web Menu (Administrator Mode).

Administrator setting screen

- **CAUTION**
  - Be careful with the administrator password. If you forget the password, you will have to reformat the scanner, and all registered data will be lost.
Backup/Restore Setting Information

Back up/restore setting information using a shared folder on the network or USB memory device at the following times.

When adding another ScanFront
When adding, for instance, another ScanFront, back up the setting information that was set on the first ScanFront, and then restore the setting information on the other ScanFront.

When updating the version of the ScanFront
Back up the setting information before you update the version of the ScanFront, and then restore the setting information after the version update is finished.

When submitting the ScanFront for repairs
Before you submit the ScanFront for repairs, back up the setting information of the ScanFront.

IMPORTANT

Before you submit the ScanFront for repairs, back up the setting information and then initialize the ScanFront. (See “Initializing ScanFront” on p. 10-13.)

Hint

- Scanner setting information can be backed up to a folder on a USB memory device if the device is inserted when [Backup / Restore all settings] is pressed.
- Backup / Restore all settings can also be configured from the [System Settings] screen (see p. 6-38) of the Web Menu (Administrator Mode).

Select Login Type

Set the screen that appears when users log in. For details, see “Login Screen” on p. 5-4.
❖ **Roller Counter Reset**
Reset the counter after replacing the feed roller when the scanner no longer feeds properly. For details, see “Replacing the Rollers and Document Holding Guide” on p. 9-8.

When submitting the ScanFront for repairs
Before you submit the ScanFront for repairs, initialize the ScanFront to protect the saved user information.

When changing the operating environment
Delete all the user information registered on the ScanFront when, for instance, the users have changed because you have changed the installation location.

❖ **Format ScanFront 300**
Initialize the ScanFront 300 clears all the settings registered to the ScanFront.

Initialize the ScanFront 300 at the following times. For details, see “Initializing ScanFront” on p. 10-13.

❖ **Touch Panel Adjustment**
You can adjust the touch panel when it does not operate as expected. For details, see “Adjusting the Touch Panel” on p. 10-11.
Display Language Setting

You can select the language displayed on touch panel. If you change this setting, restart the scanner.

Hint

The display language setting can also be configured in [Language/Timezone] on the Web Menu (Administrator Mode) (see p. 6-30).

Network Test

Confirm whether communication is enabled between the ScanFront and other devices on the network. Enter the IP address of a device and press the [Execute] button to ping the specified IP address and confirm whether communication with the device is enabled.
Chapter 4  ScanFront Service

1. About ScanFront Service ........................................... 4-2
2. Installing ScanFront Service ..................................... 4-3
   System Requirements ........................................... 4-3
   Installation ...................................................... 4-3
3. ScanFront Service Setup ......................................... 4-6
   ScanFront Settings ............................................. 4-6
   Changing the Port Number Used for Communication ........ 4-6
1. About ScanFront Service

ScanFront Service is software that supplements the network functions of the ScanFront. To use this software, install it on a computer connected to the same network as the ScanFront. (The computer on which ScanFront Service is installed will be herein referred to as the “ScanFront Service Server”.)

By configuring a ScanFront Service Server, you can send scanned images to locations on the network, such as the following, where direct transfer from the ScanFront is disabled.

- Destinations (folders on computers, printers, etc.) located on different segments of a network on which a WINS server is not configured
- Printers on the network
- Shared folders on a computer that is specified by IP address
- Certain NAS (network-attached storage)

Scanned images from the ScanFront are sent via the ScanFront Service Server to the user specified destination. Up to 100 ScanFront scanners can be connected to a single ScanFront Service Server. However, only up to 15 ScanFront scanners can communicate with the ScanFront Service Server at any one time.
2. Installing ScanFront Service

- **System Requirements**
  Install ScanFront Service on a computer that is connected to the same network as the ScanFront, and that meets the following requirements.

  **Operating System**
  - Windows XP
  - Windows Server 2003
  - Windows Vista
  - Windows Server 2008
  - Windows 7

  **IMPORTANT**
  ScanFront Service is compatible with only the 32-bit editions of the above operating systems. Installation and use on the 64-bit editions is not supported.

- **Installation**

  1. Insert the INSTRUCTIONS AND UTILITIES CD-ROM into the computer.
  2. Start the ScanFront Service installer.
     Use Windows Explorer, for example, to locate the installer in the following folder on the CD-ROM, and double-click the installer to start it.
     For Windows 7, Windows Vista, or Windows Server 2008:
     Q:\ScanFrontService\Vista and 2008Server\English\setup.exe ("Q" is the letter assignment for the CD-ROM drive)
     For Windows XP or Windows Server 2003:
     Q:\ScanFrontService\XP and 2003Server\English\setup.exe ("Q" is the letter assignment for the CD-ROM drive)

  - **Hint**
    An installer for the Japanese version of ScanFront Service is also stored on the INSTRUCTIONS AND UTILITIES CD-ROM. If necessary, you can install the Japanese version of ScanFront Service by replacing “English” in the folders mentioned above with “Japanese”.
    You can only install one version of the software. Do not install both versions on the same computer.

  3. Click [Next].

    The license agreement appears.
4. Read the license agreement, click [I Agree] if you agree to it, and then click [Next].

A screen for selecting the installation folder appears.

5. Click [Next].

A screen for entering account information appears.

6. Enter the account information, and click [Next].

Use an administrator account on the computer on which the service will be installed.

- When entering a local account on the computer, include “./” at the beginning of the account name.
- If the computer is part of a domain and you are entering the domain account here, enter the account in one of the following formats.

<table>
<thead>
<tr>
<th>Entry Format</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>&lt;NetBIOS name&gt;/&lt;domain user name&gt;</code></td>
<td>area1\SFUser</td>
</tr>
<tr>
<td><code>&lt;domain user name&gt;@&lt;FQDN domain name&gt;</code></td>
<td><a href="mailto:SFUser@area1.example.com">SFUser@area1.example.com</a></td>
</tr>
</tbody>
</table>

- Confirm the password by entering it again in [Password (Re-input)].

**IMPORTANT**

Make sure to specify an administrator account. In addition, be aware that ScanFront Service will not function properly with accounts for which a password is not configured.

A screen for specifying whether to start the service immediately appears.
7. Specify [Execute now] if you want to start the service immediately, or [Execute later] if you want to start the service after restarting the computer, and then click [Next].

An install confirmation screen appears.

8. Click [Next].

Installation starts. When installation is complete, a screen indicating that installation is complete appears.

9. Click [Close].

Notes on Installing ScanFront Service
- When you install ScanFront Service on a computer running Windows Vista, Windows 7, or Windows Server 2008, the following event will be registered to the System log of the Windows logs. However, you can proceed and use ScanFront Service safely.
  - Level: Warning
  - Event ID: 3004
  - Source: Windows Defender
- If installation of ScanFront Service fails, a temporary file (i.e., file with extension ".tmp") will remain in the install destination folder specified during setup.
- Before reinstalling ScanFront Service, uninstall the previous installation. Do not perform a repair installation. Doing so may result in an error or cause ScanFront Service to shut down during operations.
- ScanFront Service creates log files during operations. As a result, these log files and the install destination folder will not be deleted, even after ScanFront Service is uninstalled.
3. *ScanFront Service Setup*

**ScanFront Settings**

You must configure the following setting on the ScanFront to send scanned images using the ScanFront Service Server.

1. Log in to the Web Menu in Administrator Mode *(see p. 6-5)*.
2. Click [Server Settings], and then [Extended Service Server].
3. Enter the computer name (host name) of the ScanFront Service Server.

![Extended Service Server](image)

**IMPORTANT**

- ScanFront Service uses port number 50000 to communicate with the ScanFront. Do not change the port number value from 50000.
- To use ScanFront Service, you must start the ScanFront Service Server before turning ON the ScanFront.

**Changing the Port Number Used for Communication**

If port number 50000 is already in use, for example, and you want to use a different port number for communication with the ScanFront, modify the following ini file before specifying the new port number.

**Folder:**

C:\Program Files\Canon Electronics Inc\ScanFront Service\etc

**File name:**

ScanFront.ini

**Area to be modified:**

Replace the port number that appears in “port=50000” with the port number you want to use.

**Settings for Environments with Firewalls**

If a firewall is installed on the computer on which ScanFront Service is installed and the firewall is enabled, ScanFront Service will not run. In such cases, you must change the firewall settings and restrictively open the port used by ScanFront Service. For details, refer to the operating instructions for your firewall.

1. Flow of Scanner Operations

The procedure and screen transitions for the process from turning the scanner ON, to sending an image file are as follows. For descriptions of the various settings, refer to the appropriate reference pages.

Turn the power ON
(See p. 5-3.)

No user is registered
* When no user is registered and only the Shared Address Book and Shared Job Button are used

Users are registered (device/server authentication)
* Set the screen that appears after login in the user settings.
* When you use server authentication, the user that logged in is registered automatically.

Login screen
(See p. 5-4.)

Home screen
(See p. 5-8.)

Job Button screen
(See p. 5-8.)

* Users restricted by [Use only Job Buttons] in the function restrictions cannot scan from the Home screen.

Address selection screen
(See p. 5-15.)

Scan/Delivery Options screen
(See p. 5-27.)

Scan (The process after scanning differs depending on the Delivery Options)
(See p. 5-34.)

Scanning finishes
(A document confirmation message appears)
(See p. 5-19.)

Send/Image Confirmation screen
(See p. 5-20.)

Address Confirmation screen
(See p. 5-21.)

Send (The screen displayed after sending differs depending on the Delivery Options)
(See p. 5-34.)

The image is sent without the address being confirmed.

The document and image are not checked
After scanning of the document ends, the image is sent as is and the process ends.

User Settings screen
(See p. 5-9.)

Password setting screen
(See p. 5-9.)

Fingerprint registration screen
(See p. 5-10.)

* The User Settings screen enables setting a password for the user that logged in, and registration for the ScanFront 300P.
2. Turning the Power ON and OFF

Use the power switch to turn the scanner ON, and press the [Power off] button on the touch panel to turn it OFF.

- **Turning the Power ON**

  Press the power switch to turn the scanner ON. The power indicator lights, and the Home screen or the login screen appears.

  - **Hint**

    - It takes approximately 40 seconds for the Home screen to appear after the power switch is turned on.
    - If users have been registered, the login screen appears. (See “Login Screen” on p. 5-4.)
    - When the power indicator is lit but nothing appears on the touch panel, Display Off has activated to turn the panel display off. You can touch the panel to restore the display. (See “Display Off” on p. 6-31.)
    - When the power indicator is flashing but nothing appears on the touch panel, the Low Power mode has activated to temporarily stop scanner operations. To switch out of Low Power mode, press the power switch or touch the touch panel. (See “Low Power Mode” on p. 6-31.)

- **Turning the Power OFF**

  Press the [Power off] button displayed at the bottom left of the panel to turn the scanner OFF.

  - **IMPORTANT**

    - When restarting the scanner, wait at least 5 seconds after turning the power OFF before turning it ON again.
    - If the scanner stops responding, press and hold the power switch to shut down the system, and then press the power switch to turn the scanner ON again. In such cases, settings configured immediately before shutting down may be lost.
3. **Login Screen**

The login screen appears at the startup when the scanner is turned ON.

- **Login Screen Types**
  There are two types of login screen: a list type login screen for selecting from a list of registered users, and a key in type login screen for entering a user name and password.

  **List Type Login Screen**

  ![List Type Login Screen](image1)

  **Key in Type Login Screen**

  ![Key in Type Login Screen](image2)

- **Hint**
  - Set the type of login screen from [Device Operation] of the Web menu (see p. 6-31) or [Login type setting] in the administrator settings of the ScanFront (see p. 3-10).
  - Fingerprint authentication is enabled when you are using the ScanFront 300P. (See "Fingerprint Authentication (Only Available with the ScanFront 300P)" on p. 5-7.)

- **When Using Server Authentication**
  The login screen when you use server authentication is a key in type, and a list box is displayed for selecting Device Authentication and Server Authentication.

  ![Server Authentication Login Screen](image3)

  **IMPORTANT**
  When you use server authentication to log in, you are registered as a new user of server authentication.
List Type Login

Use the procedure below to log in to the list type login screen.

1. Select the user to log in as from the list, and then press [Next].

The password input screen appears.

2. Press [Password].

The keyboard screen appears.

3. Enter a password and then press [OK].

![Password screen]

IMPORTANT
Passwords are case-sensitive. Make sure to enter the password correctly.

4. Press [Login] to log in to the scanner.

![Login screen]

5. The Home screen (or Job Button screen) appears.
Key in Type Login

In the key in type login screen, enter your user name and password to log in.

1. Press [User name] ([Password]).

The keyboard screen appears.

2. Enter your user name (password) and then press [OK].

3. Press [Login] to log in to the scanner.

4. The Home screen (or Job Button screen) appears.

IMPORTANT

- User names and passwords are case-sensitive. Make sure to enter the user and password registered during device authentication correctly.
- If you do not know the user name and password registered for server authentication, contact the domain server administrator.
Fingerprint Authentication (Only Available with the ScanFront 300P)

Use the procedure below for fingerprint authentication. For details on fingerprint registration, see “Fingerprint Registration (Only Available with the ScanFront 300P)” on p. 5-10.

1. Perform fingerprint authentication using the finger with the registered fingerprint.

   ![Fingerprint Authentication Screen]

**IMPORTANT**

Perform fingerprint authentication by gently pressing the finger while slowly sweeping it at a constant speed to scan the fingerprint.

2. The Home screen (or Job Button screen) appears if the fingerprint is authenticated correctly.

   ![Home Screen]

   **Hint**

   - When fingerprint authentication fails, the cause of the failure and a solution appear on the screen. Follow the instructions in the solution, and perform fingerprint authentication again.

   - If a user fingerprint is registered for server authentication, and the user password is changed on the server while the user is logged in via fingerprint authentication, the following message will appear on the screen. In this case, without using fingerprint authentication, enter your user name and changed password to log in, and then re-register your fingerprints.
4. **Screen Displayed after Login**

You can set the screen (Home screen or Job Button screen) that is displayed after a user logs in. (See p. 6-7 and p. 8-4.)

- **Home Screen**
  
  ! Select destination (E-mail, FTP, FAX, Shared folder, USB memory, and Printer) buttons
  
  These buttons open an address selection screen. (See “Scanning Procedures” on p. 5-13.)
  
  ![Home Screen Diagram]

  - **Hint**
    - The USB memory button is enabled when USB memory is inserted in a USB port.
    - [Printer] is enabled when the ScanFront is connected to a network environment that is running ScanFront Service.
  
  - **[User settings] button**
    
    Enables setting of the user password and fingerprint registration (only with the ScanFront 300P). (See “User Settings Screen” on p. 5-9.)
  
  - **[Administrator setting] button**
    
    Opens the Administrator Settings screen. For details, see “Configuring Administrator Settings” on p. 3-8.

  ![Important Image]

  **IMPORTANT**

  If a user whose use of the Home screen is restricted logs in, the Home screen is not available. For details, contact the administrator.

- **Job Button Screen**

  This screen enables you to select a job button to scan using the conditions registered to the job button, and then send the image file. (See “Scanning Procedures” on p. 5-13.)

  ![Job Button Screen Diagram]

  **IMPORTANT**

  - The document is scanned immediately after you press the job button. Make sure to place your document before you press the job button. (See “Placing Documents” on p. 2-6.)
  
  - Perform job button registration and editing via the Web menu.
  
  - If you are unable to edit a job button, the editing of job buttons has been restricted by the ScanFront administrator. For details, contact the administrator.
5. **User Settings Screen**

The User Settings screen enables you to edit the user password and register a fingerprint (only available with the ScanFront 300P).

- **Fingerprint Registration**
  
  Fingerprint registration is enabled when you are using the ScanFront 300P. For details on fingerprint registration, see “Fingerprint Registration (Only Available with the ScanFront 300P)” on p. 5-10.

- **Change Password**
  
  You can register a new user password or change a user password registered via the Web menu.

- **Hint**
  
  The old password does not need to be entered in order to change a password. The new password that you entered is registered.
6. **Fingerprint Registration (Only Available with the ScanFront 300P)**

Fingerprint authentication is a function for registering the fingerprints of users that will log in when the device authentication or server authentication method is used, and enables users to log in by authenticating their fingerprints. When fingerprint authentication is used, there is no need to select a user in the list type login screen or enter a user name and password in the key in type login screen. For details on handling the fingerprint sensor, see “Fingerprint Sensor (ScanFront 300P)” on p. 2-11.

- **Fingerprint Authentication**
  - Follow the procedure below to use fingerprint registration and authentication.
    1. Align the first joint of a finger on the sensor and press the finger on the fingerprint sensor.
    2. Keep the finger pressed while slowly sliding it straight at a constant speed to scan the fingerprint.

- Fingerprint authentication uses the unique information of fingerprints. The fingerprint authentication function may not work properly for a finger with a fingerprint that is worn down or has few distinguishable features.
- The same finger needs to be scanned three times to register the fingerprint.
- The authentication performance differs depending on the condition of the fingerprint when it is registered and when it is authenticated. The following conditions may cause an error in fingerprint authentication:
  - The finger is wet or sweaty
  - The finger is dirty
  - The grooves of the fingerprint are filled with sweat or oil
  - The finger is dry (dry skin)
  - Part of the fingerprint is missing because of, for example, a wound or burn injury
  - The fingerprint has worn thin
- Authentication performance may improve if the condition of the fingerprint is improved as a result of washing your hands or applying hand cream.
- Authentication may not be performed properly depending on the speed with which you slide your finger over the sensor. In this case, adjust the speed with which you slide your finger in accordance with the message that appears.
- Fingerprint authentication does not necessarily guarantee the authentication and verification of the identity of a person.
Registering a Fingerprint

Register a fingerprint from the User Settings screen accessed from the Home screen.

**IMPORTANT**
If the Home screen is not displayed, use of the Home screen has been restricted for the user by the ScanFront administrator. Confirm this with the administrator.

1. Press [User settings].

The User Settings screen appears.

2. Press [Fingerprint Registration].

The Fingerprint Registration screen appears.

3. Scan your fingerprint.
Repeat scanning until the same fingerprint has been successfully scanned three times.

**IMPORTANT**
- If any of the messages below appears, there was an error scanning the fingerprint. Try scanning your fingerprint again.
  - Failed to read fingerprint. Please try again.
  - Sweep speed was too fast. Please sweep more slowly.
  - Sweep speed was too slow. Please sweep more faster.
- If any of the messages below appears, start fingerprint registration again from the beginning.
  - Can not verify the fingerprint data. Start registration again.
  - Time out error has occurred. Start registration again.

4. After you have successfully scanned your fingerprint three times, press [Register/Test].

The Test Mode screen appears.
5. Perform an authentication test for the registered fingerprint by scanning your fingerprint.

⚠️ IMPORTANT

If you want to change the registered fingerprint, start registration again from the beginning.
7. Scanning Procedures

You can perform scanning from the Home screen or the Job Button screen.

- **Scanning From the Home Screen**
  
  Press a destination selection (E-mail, FTP, Fax, Shared folder, or USB memory) button to open an address selection screen and then select an address to send an image file.

  ![Address selection screen](image)

  If you press the USB memory destination selection button, press [Downward] and specify the folder in the USB memory to which you want to save the image file.

  ![USB memory selection](image)

  If you press the Printer destination selection button, configure the printer settings.

  ![Printer settings](image)

  If you select an address and then press [Next], the Scan/Delivery Options screen appears. Set the scanning conditions and then start scanning.

  ![Scan/Delivery Options](image)

- **IMPORTANT**
  
  If the network environment to which the ScanFront is connected is not running ScanFront Service, [Printer] is grayed out and cannot be selected.
Scanning From the Job Button Screen

If you press a job button, the Scan/Delivery Options screen appears. Confirm the address and scanning settings registered to the job button and then start scanning. For details on the scanning procedure, read from the setting of scanning conditions in Step 5.

IMPORTANT

- The settings screen display and the screen displayed after scanning differ depending on the job button settings. For details on the overall flow from configuring settings to sending an image file, see “Flow of Scanner Operations” on p. 5-2.
- Job buttons cannot be used to save image files to USB memory or send them to printers for printing.
Address Selection Screen

From the address selection screen, you can select the address to send an image file and register addresses.

1. Address Book type
   Selects the address book type (Shared Address Book or My Address Book). If the address book server setting is enabled, [LDAP Address Book] is added.

2. Address type
   If you select the type of address (e-mail, fax, shared folder, FTP, and groups) to display in the address list, addresses of the selected type are displayed.

3. Address List
   Displays registered addresses and enables you to select the address to send an image file.

Hint

- The following icons are used to indicate the types of address.
  - E-mail
  - Shared folder
  - Fax
  - FTP
  - Group
- Pressing an address adds a checkmark (✓) to the icon and selects the address. Pressing a selected address again clears the selection.
- An address is not selected as an address if there is no checkmark added to the icon, even if the background of the address is colored and the address appears selected.

- Each time you press an e-mail or group icon, the send condition changes (To, Cc, Bcc).
  - To
  - Cc
  - Bcc
  - Selection cleared

4. Jump Keys
   If there are many addresses and the address you want is not displayed in the address list, you can use these keys to specify a keyword to search for and display the address.

5. [Clear All] button
   Clears all address selections.

6. [Edit] button
   Enables you to register new addresses and edit addresses.

7. [Details] button
   Displays detailed information for the address.

**USB Memory Screen**

The USB Memory screen enables you to specify the folder in the USB memory to save the image file.

1. **Path**
   Enter the folder path of the USB memory. You can also press [Downward] to select a folder.

2. **USB Memory Display**
   Displays the inserted USB memory.

**Hint**
- If you insert two or more USB memory sticks, numbers are allocated to sticks from the second one onwards. For example, the first one that was inserted is displayed as "USB memory", and the second one inserted is displayed as "USB memory 2".
- If you want to insert or replace a USB memory stick while the USB memory screen is open, press the [Back] button to return to the Home screen, update the USB memory information, and then reopen the USB memory screen.

3. **[Upward] button**
   Enables you to move to a higher level folder when a lower level folder is selected in the memory.

4. **[Downward] button**
   Enables you to move to a lower level folder in the USB memory.

5. **[Edit] button**
   Enables you to register new folders and edit folders.

6. **[Format] button**
   Enables you to format the USB memory.
Print Settings Screen

The print settings screen enables you to specify the printer, paper size, and other print settings.

1. Printer name
   Select the printer that will be used to print the scanned images. Printers that are compatible with the ScanFront Service Server can be selected.

2. Paper size
   Select the paper size.

3. Print format
   Specify the method in which the scanned image is scaled for printing.
   - Actual size
     Prints the scanned image in the same size as the original document.
   - Fit to paper
     Prints while expanding or reducing the scanned image to fit the paper size.
   - Actual pixel
     Prints while matching the resolution of the scanned image.

4. Orientation
   Press [Portrait] or [Landscape] to specify the orientation for printing.

5. Copy number
   Specify the number of copies to print.

6. Duplex print
   When you want to perform duplex printing, light this button by pressing it.

7. Color print
   When you want to perform color printing, light this button by pressing it.

**IMPORTANT**

The print settings you can configure will vary depending on your printer. Settings and functions that are not supported by your printer cannot be configured in this screen.
Scanning
This section describes the procedure for scanning. If you want to save the image file to USB memory, specify the folder in the USB memory to save the image file in Steps 2 to 4. (See “USB Memory Screen” on p. 5-16.)

1. Select a destination.
Press a destination button to select a destination.

The address selection screen appears.

2. Use [Address Book type] and [Address type] to display the address to send the image file.

3. Press a displayed address to select it.
A checkmark (√) is added to the icon for the selected address. Pressing a selected address again clears the selection.

! IMPORTANT
An address is not selected as an address to send data to if there is no checkmark, even if the background is shaded.

4. Make sure the selected address has a checkmark and then press [Next].

Hint
When a different type of address is selected, you can confirm the selected address by pressing [Selected address] in the Address type drop-down list.

The Scan/Delivery Options screen appears.
5. Set the scan conditions. (See “Scan/Delivery Options” on p. 5-27.)

**IMPORTANT**

When you use a job button for scanning, the subsequent procedure varies as follows in accordance with the job button settings. For details, see “Registering New Job Buttons” on p. 6-21.

- If [When you select this Job Button] is set to [Skip Scan Setting Screen] and you press a job button, scanning is started without displaying the Scan/Delivery Options screen of Step 4.
- If [Send the files immediately after scanning] is set to [ON], scanning ends without displaying the continue to scan confirmation screen of Step 7 and then the address confirmation screen of Step 10 appears.
- If [Confirm addresses before sending] is set to [OFF], the image is sent without displaying the address confirmation screen of Step 10 and the operation ends.

Scanning stops after the document has been scanned.

**IMPORTANT**

- If [Send the files immediately after scanning] is set to [ON] in Delivery Options of the Scan/Delivery Options screen, scanning ends without displaying the continue to scan confirmation screen, and the address confirmation screen of Step 10 appears.
- When the confirmation message is left displayed and the scanner transitions to Low Power Mode, all of the data scanned up until that point is discarded. (See “Low Power Mode” on p. 6-31.)

7. Check the document and go to the next step.

- Press [Abort] to cancel the scanned images and return to the Scan/Delivery Options screen.
- Press the [Continue] button to resume scanning.
- Press [Complete] to go to the Send screen.
8. Check the scanned images.

- : Display the image of the next page.
- : Display the image of the previous page.
- : Move the viewing area around an image when an enlarged view of the image is shown.
- : Rotate the image 90 degrees counterclockwise.
- : Rotate the image 90 degrees clockwise.
- : Enlarge the image.
- : Reduce the image.

💡 Hint

When the preview image is enlarged, you can drag your finger on the image to scroll.
9. Press [Send].

The address confirmation message appears.

10. Confirm the address and press [OK] to send the scanned image.

\textbf{IMPORTANT}

If [Confirm addresses before sending] is set to \textit{OFF} in Delivery Options of the Scan/Delivery Options screen, the image is sent without displaying the address confirmation screen and the operation ends.

11. Returns to the screen set for [Screen after sending] in Delivery Options of the Scan/Delivery Options screen.

\textbf{IMPORTANT}

If a send error message appears, check the address settings and send destination and try again.
8. Registering and Editing Addresses

If an address to which you want to send an image file is not registered in the address book or the information of a registered address has not been updated, use the procedure below to register a new address or modify an address in the address book.

Registering a New Address

1. Make selections for [Address Book type] and [Address type], press [Edit], and then press [New].

2. Register the address in accordance with the setting conditions of the address type.

E-mail Registration Screen

- **Name**
  Enter the name to appear in the address book.

- **E-mail address**
  Enter the sender’s address for when image files are sent by e-mail.

Shared Folder Registration Screen

- **Name**
  Enter the name to appear in the address book.

- **Host name**
  Enter the name of the computer containing the publicly shared folder. When the ScanFront Service is running, you can enter the IP address instead of a host name.

- **Folder path**
  Enter the name of the shared folder and the path of the sub-folder to register.
Hint
If the path of the sub-folder is unknown, use the procedure below to specify the sub-folder.
1. Enter the host name, user name, password, and domain, and then press [Browse] to access the computer that is making the shared folder public.
Sub-folders on computers running Windows 7 or Windows Server 2008 R2 cannot be browsed by pressing the [Browse] button. In such cases, enter the computer name and path up until the top-most folder of that computer in [Folder path], and then press [Browse].
2. Specify any sub-folder within the displayed folder.
3. Press [Downward] to move to a level lower than the selected folder, or press [Edit] and [Create a new folder] to create a new folder.

- User name/Password
Enter the user name and password of an account with write permission for the shared folder.
- Domain/Workgroup
If the computer containing the shared folder is part of a domain, enter the domain name.
- Save password
Save the entered password.

FTP Registration Screen

- Name
Enter the name to appear in the address book.
- FTP server
Enter the address of the FTP server.
- Folder path
Enter the path of the sub-folder when specifying a sub-folder on the FTP server.

Hint
If the path of the sub-folder is unknown, use the procedure below to specify the sub-folder.
1. Enter the server address, user name, and password, and click [Browse] to log in to the FTP server.
2. Specify any sub-folder at the level of the displayed folder and click [OK].
- User name/Password
Enter the user name and password for logging in to the FTP server.

⚠️ IMPORTANT
Enter the user name and password of an account with write permission for the FTP server.
- Port number
Enter the port number. The standard port number is 21.
- Save password
Save the entered password.
- Use passive mode
Use passive mode for sending to the FTP server.

⚠️ IMPORTANT
Use passive mode when normal communication with the FTP server cannot be established. However, be aware that communication may not be possible if the network is not functioning properly.
Fax Registration Screen

- **Name**
  Enter the name to appear in the address book.
- **Fax number**
  Enter the recipient fax number.

Group Registration Screen

- **Name**
  Enter the name that you want to appear in the address book.

- **[Add] button**
  Select addresses to register to the group from [Address Book type] and [Address type]. The selected addresses are displayed in the list.

**IMPORTANT**

- [Add] button
  Select addresses to register to the group from [Address Book type] and [Address type]. The selected addresses are displayed in the list.

**IMPORTANT**

- When you add shared folders to groups, do not add multiple shared folders with different access privileges to one group.
- Using a group to simultaneously send to shared servers and the like and multiple shared folders with different access privileges may result in a send error.
Modifying an Address

Modify an address when there is a send error because the information of the transfer destination registered for the address is wrong or has been changed.

1. Select the type of the address to modify and press [Details].

Detailed information for the address appears.

2. Check the detailed information for the selected address.

3. Press [Edit], and then press [Modify].

The edit screen for the address appears.

4. Modify the address.

**Hint**
For details on editing items, see “Registering a New Address” on p. 5-22.

Copying an Address

You can copy addresses between My Address Book and Shared Address Book.

1. Select the address book entry to copy.

2. Select the address, press [Edit], and then press [Copy].

The selected address is copied to memory.

3. Select the address book type, press [Edit], and then press [Paste].
A confirmation message appears.

4. Press [New] and paste the address.

Hint
If the address book already has an address with the same name as the pasted one, the following message appears.

- If you select [New], an address with the same name is created in the address book.
- If you select [Overwrite], the existing address with the same name is overwritten.
# 9. Scan/Delivery Options

This section describes the scan settings and send settings for the scanner.

- **Address Display Area**
  - Displays the selection that you made on the address selection screen or the addresses registered to the job button.

- **Details**
  - Displays detailed information for the address with the colored background.

- **Scan Settings**
  - Sets the scan conditions. (See “Scan Settings” on p. 5-28.)

- **Detailed settings**
  - Configures detailed settings for scan conditions. (See “Detailed Settings” on p. 5-29.)

- **File format**
  - Checks the displayed file format and press the [File format] button to configure the settings. (See “File Formats” on p. 5-32.)

- **Delivery Options**
  - Sets the send conditions. (See “Delivery Options” on p. 5-34.)

- **[Default] button**
  - Resets any modified settings to the default values of the scanner.

  **IMPORTANT**
  - If you press [Default] in the Scan/Delivery Options screen opened from a job button, the settings are reset not to the setting values registered to the job button, but to the default values of the scanner.

- **[Start] button**
  - Starts scanning.

- **[Deskew] button**
  - The scanner detects from the scanned image that the document was fed askew and then straightens the image.

- **[Prescan] button**
  - When scanning starts, the first page of the document is scanned and then scanning stops. You can view the image of the first page to check and adjust the brightness and contrast before scanning the entire document.

  **Hint**
  - Scanning pauses after the first page of the document is scanned, and the image of the first page is displayed.
  - Use the displayed image to confirm and adjust the brightness and contrast. Press [Continue] to confirm the adjusted brightness and contrast for the first image and continue scanning.

- **[Back] button**
  - Returns the display to the previous screen.
Scan Settings

The scan settings include basic condition settings (page size, mode, resolution, scanning side, and brightness) and detailed settings for scanning.

Basic Condition Settings

Paper Size
Select the size of the document you want to scan.

- **Hint**
- Select [Auto size] to automatically detect the size of the scanned document.
- When scanning a long document, select [Auto size (Long)].

! IMPORTANT
A resolution of [300 dpi] or more cannot be set when [Auto size (Long)] is selected.

Mode
Select the mode for scanning.

! IMPORTANT
- The selection of modes is limited depending on the setting set for File Format (see p. 5-32).

Resolution
Select the resolution for scanning.

- **IMPORTANT**
- A resolution of [300 dpi] or more cannot be set when [Auto size (Long)] is selected for [Page Size].
- A resolution of [400 dpi] or more cannot be set when [Folio] is selected for [Scanning Side].

Scanning Side
Select the method for scanning the document (Simplex, Duplex, Skip Blank Page).

- **Hint**
- The Skip Blank Page option scans both sides of a document and skips saving any image it determines to be a blank page.
- Selecting Skip Blank Page enables the skip blank page setting in the detailed settings. (See “Skip Blank Page” on p. 5-29.)
- When you select Folio, documents that are folded in half for which duplex scanning is performed can be scanned as a single image.

- **IMPORTANT**
- The scanning speed may be reduced when [Skip Blank Page] is selected.
- A resolution of [400 dpi] or more cannot be set when [Folio] is selected. In addition, [Double feed detection by Ultrasonic] is grayed out and cannot be selected.
Brightness
Adjust the brightness to match the density of the document.

💡 Hint
When you want to scan both sides of a document that has front and back sides of different densities, you can change the settings for the brightness of the front side and back side separately in the detailed settings and then perform scanning.

Detailed Settings
Press the [Detailed settings] button to open the Detailed Settings screen.

Double feed detection by Ultrasonic (Only Available with the ScanFront 300P)
The scanner uses an ultrasonic sensor to detect when two or more documents are fed together, and stops feeding when a double feed is detected.

⚠️ IMPORTANT
- This method is effective when documents overlap by 1.97" (50 mm) or more. It does not function if only a slight portion of the document is overlapping.
- When using the ScanFront 300, the [Double feed detection by Ultrasonic] setting is set to [OFF].
- When [Scanning Side] is set to [Folio], [Double feed detection by Ultrasonic] is grayed out and cannot be selected.

Double feed detection by length
The scanner detects by document length when two or more documents are fed together, and stops feeding when a double feed is detected.

⚠️ IMPORTANT
- Using the length of the first page of the document as a reference, the scanner determines a double feed when it detects a document with a length at least 1.38" (35 mm) longer or shorter than the reference length.
- Set [Double feed detection by length] to [OFF] when scanning a document that contains pages of different lengths.

Skip Blank Page
When [Skip Blank Page] is selected in the scanning side settings, this setting is enabled, and you can adjust the sensitivity level for skipping blank pages.
Hint

- The initial value for the Skip Blank Page option is set to “90.”
- As you lower the value from the default setting, pages of the document with text become more likely to be skipped as well.
- As you raise the value from the default setting, pages of the document that are blank become less likely to be skipped.

**IMPORTANT**

- As you lower the Skip Blank Page value from the default setting, it is then set so that pages of the document with text are more likely to be skipped.
- As you raise the Skip Blank Page value from the default setting, it is then set so that blank pages of the document are less likely to be skipped.

**Document orientation**

Rotates the scanned image a specified amount.

**Hint**

If you select [Auto], the orientation of text within the document is detected and the image is rotated so that the orientation of the text is correct.

**IMPORTANT**

The scanning speed may be reduced when [Auto] is selected.

**Deskew**

The scanner detects from the scanned image that the document was fed askew and then straightens the image.

- **Prefer Quality**
  Image processing is performed to minimize the loss of quality of an image that has deteriorated as result of deskewing.
- **Prefer Speed**
  The image deteriorates slightly as a result of deskewing.

**IMPORTANT**

If you select [Prefer Quality], the scanning speed is reduced. If you are scanning a large number of pages, select [Prefer Speed] to prevent a decrease in scanning speed.

**Bleed-through reduction**

Eliminates bleed-through images, in which images on the reverse side of a scanned document appear on the scanned page, such as when scanning thin documents with text or images on both sides.

**IMPORTANT**

Bleed-through reduction cannot be set when the [Text enhance] mode is selected.
Hint
When using bleed-through reduction, adjust the bleed-through reduction level to match the type of document.

Contrast

Adjust the contrast for the images to scan.

Back side Brightness/contrast

This is enabled when you scan both sides of a document and should be used when the document has front and back sides of different density. Select [Use back side brightness (contrast)] to change the settings for the brightness and contrast of the front and back sides of the document.

Front side (Back side) color drop-out

The color drop-out function has a “drop-out” effect that leaves out a specified color (red, blue, or green) while scanning, and a “color enhancement” effect that emphasizes a specified color. You can set each of these effects for the front side and back side.

⚠️ IMPORTANT
The color drop-out settings are disabled when the scanning mode is set to [Color].

Auto Color Detection Settings

This is enabled when Auto Color Detection is selected, and allows you to configure the following detection settings for determining whether to scan a document in color or black and white.

- **Mode in case of binary**
  Specify the scanning mode to use when a black and white document is detected.

- **Threshold intensity to judge the document as color**
  Adjust the sensitivity to colors in a document.

- **Aresize to judge the document as color**
  Specify the ratio of colored regions in a document.

⚠️ IMPORTANT
- The [Auto Color Detection] function cannot be used simultaneously with the color drop-out or prescan function.
- The scanning speed may be reduced when the Auto Color Detection function is used.
File Formats

You can select from the three available file formats TIFF, JPEG, and PDF, and the modes available for scanning vary, depending on the file format setting. (See “Mode” on p. 5-28.)

TIFF format

Select [Single page (Front/back separate file)] to save each side of each page as a separate image file, [Single page (Front/back same file)] to save each page as a separate image file, or [Multi page] to save one image file containing multiple pages when scanning multiple pages.

JPEG format

Select the compression rate for JPEG compression.

PDF format

Configure the following settings for saving in PDF format.

• Compression
  Select the compression method.

• Quality
  Adjust the quality for the specified compression method.

• Multi page settings
  Select [Single page (Front/back separate file)] to save each side of each page as a separate image file, [Single page (Front/back same file)] to save each page as a separate image file, or [Multi page] to save one image file containing multiple pages when scanning multiple pages.

• OCR (Character Recognition)
  If OCR is set to On, character recognition is performed for the text within the scanned document, and the text is embedded in the PDF file as text information. The [Language setting] button enables you to select the language for character recognition.

• Encryption (Security)
  If you set encryption to On and then press the [Security settings] button, the Security settings screen appears, and you can configure the security settings for the PDF file. For details, see “Security Settings for PDF Files” on p. 5-33.
Security Settings for PDF Files

Apply security to the PDF file.

Encryption Level
High (128-bit RC4) and low (40-bit RC4) level settings are available.

**IMPORTANT**
Using the High (128-bit RC4) level setting is recommended. The Low (40-bit RC4) level setting provides less security.

Requires a password to open the document
Viewing of the document is restricted by a password.

**IMPORTANT**
Take care not to forget the password once it is set. If you forget the password, the document can no longer be opened.

Use permissions password to restrict editing security settings
The following settings are restricted by the permissions password.

- **Printing allowed**
  This permits printing of the PDF file with a printer.
- **Changes allowed**
  This permits editing of the PDF file; for example, adding and deleting pages.
- **Enable copying of text, images, and accessibility.**
  This enables the copying of text information embedded with OCR software and reading of the PDF file with voice software.

**IMPORTANT**

- Password protection is recommended when the permissions of the PDF file are restricted.
- You can change the permissions and cancel password protection for a password protected PDF file in an application capable of editing PDF files such as Adobe Acrobat.
Delivery Options

E-mail settings (subject, message)
Set the subject and message for sending via e-mail.

File name
Specify a name for the image file to be sent.

Auto file name
The scanner adds 17 digits that indicate the date and time to the file name of the image to be sent.
Ex.) May 14, 2010, 3:40:30 p.m.
   yyyymmdd: File name + 20100514154030123
   mmddyyyy: File name + 05142010154030123
   ddmmyyyy: File name + 14052010154030123
* The last three digits indicate the number of milliseconds.
When custom file name settings are configured in the Web Menu, you can select [Custom] to add the custom file name to the file name of the scanned image (see p. 6-8).

IMPORTANT
• Make sure you set either [File name] or [Auto file name]. A message appears if you do not enter a file name and then set [Auto file name] to [None].
• If you select [Single page] of TIFF format, or JPEG format, a 4-digit sequential number starting with “0001” is added automatically to the end of file names.
• The following characters cannot be used to set the custom file name:
   / : ? * " < > |
Screen after sending
Select the screen to display after sending images.

- **Home screen (Job Button screen)**
  Redisplay the Home screen (Job Button screen) after sending images.

⚠️ IMPORTANT
- The [Screen after Login] setting that is set via the Web menu by the user applies to the Home screen (Job Button screen) setting.
- The Job Button screen is displayed for a user for which use of the Home screen is restricted by the ScanFront administrator.

- **Logout**
  The user is logged out after sending images.

- **Select screen after sending**
  A dialog box for selecting the screen after sending images is displayed.

💡 Hint
When no user is registered, the Logout option does not appear.

Send index file
Specify whether to send index files (metadata) with images.
When sending index files, enter an index string.
Index files are created according to the settings configured in the Web Menu (see p. 6-9).

⚠️ IMPORTANT
The following characters cannot be used in strings contained in the index file:
& " ' < >

1. Web Menu Overview

The Web Menu function enables you to access and configure the scanner from the Web browser of a remote computer. It can be used to perform tasks such as user registration, basic network communication settings, and job button registration, as well as making scan settings. (See “Web Menu (Administrator Mode)” on p. 3-6.)

**IMPORTANT**

- For a Web browser, use Microsoft Internet Explorer 6.0 or later or Firefox 3.5 or later.
- In some cases, settings cannot be changed from the Web Menu when the ScanFront administrator or another user is logged in to the scanner.
- Use the device name or IP address assigned to the scanner as the URL for logging in to the Web Menu. (See “Logging In to the Web Menu” on p. 6-5.)
- When you open the Web Menu using Internet Explorer 7 or later, an SSL-certificate warning will appear. However, you can proceed and open the Web Menu safely.
The Web Menu features an Administrator Mode for configuring administrator settings and a User Mode for user access, from which the following settings can be configured.

**Administrator Mode**

1. **User Administration** *(See “User Administration” on p. 6-6.)*
   Use to register and manage users and to restrict the functions available to users.

2. **Address Book Settings** *(See “Address Book Settings” on p. 6-14.)*
   Use to register and manage entries in the Shared Address Book available to all users.

3. **Job Button Settings** *(See “Job Button Settings” on p. 6-20.)*
   Use to register and manage the Shared Job Button available to all users.

4. **Device Configuration** *(See “Device Configuration” on p. 6-29.)*
   Use to configure the scanner.

5. **Server Settings** *(See “Server Settings” on p. 6-33.)*
   Use to configure mail server settings for sending e-mail from the scanner, settings for using an authentication server compatible with a directory service, settings for using an address book server compatible with LDAP, settings for using a function that transfers a scan result log during transfer to the FTP server, and settings for using the NTP server.

6. **System Settings** *(See “System Settings” on p. 6-38.)*
   Use to configure the following settings for managing the scanner:
   - Backup and restoration of all settings
   - Confirmation of ScanFront version information and module updates
   - Management of the usage log
User Mode
For details on configuring the User Mode settings, see Chapter 8 “Web Menu (User Mode”).

① User Settings (See “User Settings” on p. 8-4.)
Use to change the user settings.

② Address Book Settings (See “Address Book Settings” on p. 8-8.)
Use to register and manage entries in the Shared Address Book, and the My Address Book provided for each user.

③ Job Button Settings (See “Job Button Settings” on p. 8-15.)
Use to register and manage the Shared Job Button, and the My Job Button provided for each user.
2. Logging In to the Web Menu

You can log in to the Web Menu using the following procedure.

**IMPORTANT**
Use the device name or the IP address assigned to the scanner as the URL for accessing the Web Menu. For details on the device name and the IP address, see “Configuring Administrator Settings” on p. 3-8.

1. Turn the scanner ON.

2. Log in to [Administrator setting], open the network settings, and confirm the device name or the IP address. (See “Configuring Administrator Settings” on p. 3-8.)

3. Launch the Web browser on the computer.

4. Enter the device name or the IP address as the URL to open the Web Menu.
   Ex.) http://scanfront300 when the device name is ScanFront300, and http://172.19.xxx.xxx for the IP address.

5. Click [Login] to log in to the Web Menu (Administrator Mode).

**Hint**
If the Web Menu does not appear in the desired language, select the desired language in the [Language] box to switch the Web Menu display.

**IMPORTANT**
- If a password has been set under [Administrator setting] on the scanner, enter the Administrator password to log in.
- Passwords are case-sensitive. Make sure to enter the password correctly.
3. User Administration

From the User Administration screen, you can register and manage users and restrict the functions available to users.

- **[New User] button**
  Registers a new user. (See “Registering New Users” on p. 6-7.)

- **[Select All] button**
  Selects all of the displayed users.

- **[Except All] button**
  Deselects all of the displayed users.

- **Export from ScanFront 300**
  Exports the user data as a file. (See “Exporting and Importing Users” on p. 6-12.)

- **Import to ScanFront 300**
  Imports a previously exported user data file. (See “Exporting and Importing Users” on p. 6-12.)

- **[Functional Restriction] button**
  Restricts the functions available to the selected user. Only enabled when a user is selected. (See “Restricting User Functions” on p. 6-10.)

- **[Delete] button**
  Deletes the selected user. Only enabled when a user is selected. However, <Default User> cannot be deleted.

- **[Delete by Server synchronization] button**
  If the authentication server is enabled (see “Server Settings” on p. 6-33), this deletes users that are not registered on the authentication server from the user list.

9 **User List**

- **Check box**: Select this check box to select a user. If the check boxes of multiple users are selected, you can set function restrictions or perform the delete operation for all selected users simultaneously.
- **Name**: Displays the names of registered users. <Default User> is the default setting when registering a new user.
- **Functional Restriction**: Displays whether user functions are restricted.
- **E-mail address**: Displays the originating e-mail address for the user when sending by e-mail. If this field is left blank, the administrator’s e-mail address is used as the originating e-mail address.
- **Edit**: Click to edit the user’s settings. For the <Default User>, you can change the default setting for the [Screen after Login].
- **Edit Address Book**: Registers and edits entries in the My Address Book provided for each user.
- **Edit Job Button**: Registers and edits the My Job Button provided for each user.
Registering New Users

Click [New User] to register a new user.

**IMPORTANT**
- When using an authentication server (see p. 6-35), users that are logged in from an authentication server account are registered automatically.
- If an e-mail address is registered for the authentication server account, the e-mail address is also registered automatically.
- If an e-mail address is not registered for the authentication server account, the e-mail address is not registered. Register an e-mail address by editing the user settings (see p. 6-11).

User Settings

• Authentication Server: Device
  The authentication method for newly registered users is Device, and user authentication is performed on the ScanFront (device).

  **Hint**
  For users logged in from an authentication server account and automatically registered, the authentication method is the domain name of the authentication server.

• User name/Password
  Enter the user name and password to use for login.

• Password (confirmation)
  Enter the same password again for confirmation.

• Mail Address
  Enter the originating address for e-mail sent from the scanner.

  **IMPORTANT**
  - Users are not permitted to register and change e-mail addresses. Make sure e-mail addresses are registered and changed by the administrator.

  • If no e-mail address is registered, the administrator’s e-mail address is used as the originating e-mail address. (See “Device Configuration” on p. 6-29.)

  • SMTP/POP Before SMTP Authentication
    Appears when [Auth Method] is configured to any setting other than [SMTP] in the mail server settings (see p. 6-34). Enter the [User name] and [Password] that will be used for mail server authentication here.

    **IMPORTANT**
    Confirm the [User name] and [Password] with the user before entering them. Otherwise, have the user enter them directly under [User Settings] of the Web Menu (User Mode) (see p. 8-5).

• Screen after Login
  Select the Home screen or the Job Button screen as the first screen to appear after the user logs in.
Job Button Screen

- **Separator**
  Select the [Enable] check box to include a separator between character strings in the file name, and select a character to use as the separator in the list box.

- **String**
  Specify a string to include in the file name.

- **User name**
  Select the [Enable] check box to include the user name in the file name.

- **Date**
  Select the [Enable] check box to include the date in the file name, and select a format for the date in the list box.

- **Time**
  Select the [Enable] check box to include the time in the file name, and select a format for the time in the list box.

- **Device name**
  Select the [Enable] check box to include the device name in the file name.

- **Counter/Start number/Number of digits**
  Select the [Enable] check box to include a counter in the file name. When this is enabled, you can specify the starting value and number of digits used for the counter.

**IMPORTANT**
The setting for the startup screen after login also affects which screen appears after a scanned image is sent. (See “Delivery Options” on p. 6-21.)

**Custom File Name Settings**
Specify the method in which file names used for saving scanned images are created. When you select to use custom file names during a scanning procedure, the image files will be saved under file names that are determined by the settings configured here. Components of the custom file name will be included in the order that they appear on this screen.

**IMPORTANT**
The following characters cannot be used to set the custom file name:
/ : ? * " < > |
**Index Settings**

Specify the content of index files (metadata) that are attached to scanned image files. Components of the index file will be included in the order that they appear on this screen.

**IMPORTANT**

The following characters cannot be used in strings contained in the index file:

- `&` " ' < >

- **Index string/Field name**
  Enter a string for the index. You can change the default field name (“String”) as necessary.

- **User name**
  Select the [Enable] check box to include the user name in the index file. You can change the default field name (“User”) as necessary.

- **Date**
  Select the [Enable] check box to include the date in the index file, and select a format for the date in the [Format] list box. You can change the default field name (“Date”) as necessary.

- **Time**
  Select the [Enable] check box to include the time in the index file, and select a format for the time in the [Format] list box. You can change the default field name (“Time”) as necessary.

- **Device name**
  Select the [Enable] check box to include the device name in the index file. You can change the default field name (“Device”) as necessary.

- **Counter/Start number/Number of digits**
  Select the [Enable] check box to include a counter in the index file. When this is enabled, you can specify the starting value and number of digits used for the counter. You can change the default field name (“Counter”) as necessary.

- **File name**
  Select the [Enable] check box to include the file name in the index file. You can change the default field name (“FileName”) as necessary.

- **File size**
  Select the [Enable] check box to include the file size in the index file. You can change the default field name (“FileSize”) as necessary.

- **Number of Pages**
  Select the [Enable] check box to include the number of pages that are in the scanned image in the index file. You can change the default field name (“PageNumber”) as necessary.

- **Destination path**
  Select the [Enable] check box to include the destination path in the index file. You can change the default field name (“Folder”) as necessary.

- **Index file format**
  Specify a file format for the index files.
[OK] button
Registers a user with the specified parameters, and updates the display on the scanner.

💡 Hint
- When a user is registered, the startup display on the scanner switches from the Home screen to the Login screen. *(See “Login Screen” on p. 5-4.)*

- When a user is registered, the link for User Mode login is added to the Web Menu login screen.

⚠️ Restricting User Functions
To restrict the functions available to a user, select the user and click [Functional Restriction].

⚠️ IMPORTANT
If you restrict the functions of the <Default User>, the function restrictions are applied to newly registered users and users registered automatically by server authentication.

💡 Hint
If multiple users are selected, function restrictions are set for all selected users simultaneously.

_use only Job Buttons_
Disables scanning from the Home screen and displays the Job Button screen when the user logs in.
Restriction to Send
Restricts the destinations to which the scanner can send images. Deselect a destination to disable it. Ex.) When the destinations are restricted to shared folders only:

![Image of restriction settings]

Restriction to Edit
Restricts the ability to edit address books and job buttons. Deselect an address book or job button to disable editing for it.

💡 Hint
Configure the following settings to make only the existing address books and job buttons available to the user.

Restriction to Use
Restricts the use of the LDAP Address Book when use of an address book server is enabled in the Server Settings. (See p. 6-33.)

[OK] button
Sets the specified usage restrictions for the user.

 наличие пользователей. Вы можете изменить настройки зарегистрированных пользователей.

Правка
Доступ для правки настроек пользователя.

![Image of user settings]

[OK] кнопка
Устанавливает указанные ограничения использования для пользователя.
When you edit <Default User>, you can change only the default setting for the [Screen after Login].

### Edit Address Book
Enables you to register and edit entries in the user’s My Address Book. For details on configuring address books, see “Address Book Settings” on p. 6-14.

### Edit Job Button
Enables you to register and edit the user’s My Job Button. For details on configuring job buttons, see “Job Button Settings” on p. 6-20.

### Exporting and Importing Users
You can back up your users as files, and import the backed up user data to another ScanFront unit.

#### Hint
If you have multiple ScanFront units, you can use the same users on all of them by importing the user settings file registered on one ScanFront unit to the other units.

#### Exporting from the Scanner
You can save the user data to a specified folder.

1. Select the user to export.
2. Click [Export from ScanFront 300].
3. Click [Save], specify a save location, and save the user data.
**Importing to the Scanner**

You can import previously exported user data to the scanner.

1. Click [Import to ScanFront 300].

2. Click [Browse] and specify a previously exported user settings file.

3. Select a processing method for importing the user settings file.
   - Replaces the whole data: Deletes the currently registered user and overwrites it with the imported user data.
   - Appends data: Adds the imported user data to the currently registered user.

4. Click [Execute].
   Confirm the message that appears, and click [OK] to import the data.

**Hint**

When importing is completed, the following message appears. Click [OK] to return to User Settings and confirm the imported address data.
4. Address Book Settings

From the Address Book Settings screen, you can register entries in the Shared Address Book, which is available to all users.

- **Type of Address Book**
  - Under normal conditions, you can only select the Shared Address Book here. If you enable the address book server settings, however, the LDAP Address Book becomes selectable. The address type is set to [E-mail] when the LDAP Address Book is selected. (You can manage the My Address Book provided for each user from the User Administration menu.)

- **Export from ScanFront 300**
  - Exports the address book data as a file in CSV format. (See “Exporting and Importing Address Books” on p. 6-18.)

- **Import to ScanFront 300**
  - Imports a previously exported address book data file. (See “Exporting and Importing Address Books” on p. 6-18.)

- **Address type**
  - Selects the type of addresses (E-mail, FTP Server, Shared folder, Group, or All) to display.

- **[New Address] button**
  - Registers a new address entry. (See “Registering New Addresses” on p. 6-15.)

- **[Select All] button**
  - Selects all of the displayed addresses.

- **[Except All] button**
  - Deselects all of the displayed addresses.

- **[Copy] button**
  - Copies the selected address. Only enabled when an address is selected. (See “Copying Addresses” on p. 6-18.)

- **[Delete] button**
  - Deletes the selected address. Only enabled when an address is selected.

- **Address List**
  - Displays the registered addresses.
    - **Check box:** Select this check box to select an address.
    - **Address type (icon):**
      - FTP
      - Shared folder
      - E-mail
      - Fax
      - Group
    - **Edit:** Click to edit an address.
Registering New Addresses

Click [New Address] to register a new address.

**Hint**
- The number of addresses that can be registered to the Shared Address Book is up to 1000 in combination with the total number of addresses included in the Shared Job Button.
- For the number mentioned above, the count for a group is the number of addresses registered to the group (maximum of 99 addresses) plus the group name, so a group with 99 addresses registered to it is counted as having 100 addresses.
- The available settings vary, depending on the type of address (E-mail, FTP Server, Shared folder, Fax, or Group).

**Address type: E-mail**

This option registers an e-mail address.

**Name**
Enter the name to display on the scanner.

**E-mail Address**
Enter the destination e-mail address.

**[OK] button**
Registers a new e-mail address with the specified parameters.

**Address type: FTP Server**

This option registers a network FTP server.

**IMPORTANT**
FTP servers that require firewall settings cannot be registered.

**Name**
Enter the name to display on the scanner.

**FTP server**
Enter the IP address or host name of the FTP server.

**Folder path**
To specify a subfolder on the FTP server, enter the path to the subfolder.

**Hint**
If you are unsure of the subfolder's path, use the following procedure to specify the subfolder:
1. After entering the [FTP server], [User name], and [Password], click [Browse] and log in to the FTP server.
2. In the folder that appears, specify any subfolder and click [OK].

**User name/Password**
Enter the user name and password required to log in to the FTP server.

**Port number**
Enter the port number. The standard port number is 21.

**Save Password**
Saves the entered password.
Passive Mode
Uses passive mode to send transmissions to the FTP server.

⚠️ IMPORTANT
Use passive mode when normal communication with the FTP server cannot be established. However, be aware that communication may not be possible if the network is not functioning properly.

[OK] button
Registers a new FTP server with the specified parameters.

Address type: Shared folder
This option registers a folder shared publicly on the network.

[Browse] button
Shows a list of computers connected to the network for you to specify a shared folder.

💡 Hint
You can display the shared folders using the following procedure.
1. After entering the computer name, user name, password, and domain/workgroup, click [Browse]. Access the computer containing the publicly shared folder. Sub-folders on computers running Windows 7 or Windows Server 2008 R2 cannot be browsed by clicking the [Browse] button. In such cases, enter the computer name and path up until the top-most folder of that computer in [Folder path], and then click [Browse].
2. Specify any subfolder from the displayed computer and click [OK].

⚠️ IMPORTANT
- If you click [Browse] without entering the user account information, only computers and workgroups within the same network address will display.
- When displaying workgroups that are not part of a domain, you cannot display computers or workgroups with different network addresses.
- Not all workgroups and computers in the network can be displayed immediately after the ScanFront is started. If some workgroups and computers are not displayed, wait a few minutes and then press [Browse].
- A new folder cannot be created in a specified folder via the Web Menu. If you want to create a new folder, use the computer set as the FTP server or the address editing functions of the ScanFront to create a folder beforehand.

Name
Enter the name to display on the scanner.

Computer Name (Host Name)
Enter the name of the computer containing the publicly shared folder. When the ScanFront Service is running, you can enter the IP address instead of a host name.

Folder path
Enter the path to the subfolder that you want to register as the name of the shared folder.

User name/Password
Enter the user name and password of an account with the authority to write data to the shared folder.

Domain/Workgroup
If the computer containing the shared folder is part of a domain, enter the domain name.
**IMPORTANT**
- If the computer containing the publicly shared folder is part of a domain, enter the user name and password registered with the domain, and the domain name.
- If the computer containing the publicly shared folder is not part of a domain, there is no need to enter a [Domain/Workgroup].

**Save Password**
Select this check box to save the password to the address.

**IMPORTANT**
If you do not save the password, password entry will be required each time you send.

**[OK] button**
Registers a new shared folder with the specified parameters.

**Address type: Fax**
This option registers a fax destination.

**Address type: Group**
This option registers several registered addresses together as a group.

**Hint**
Different types of address, such as e-mail addresses and shared folders, can be registered as a group, and up to 99 addresses can be registered to 1 group.

**Name**
Enter the name to display on the scanner.

**Add from Address Book**
Allows you to select an address from an address book, add it to the group, and display it in the list.

**[OK] button**
Registers a new group with the specified parameters.

**Fax number**
Enter the fax number of the destination.

**[OK] button**
Registers a new fax destination with the specified parameters.
Copying Addresses
You can copy an address and register it as a new address.

Hint
• Use this function when you want to copy an address from the Shared Address Book and register it as a different address after changing some of the settings.
• By copying addresses from User Administration, you can copy addresses between the Shared Address Book and the My Address Book.

1. Add a checkmark to the check box of the address you want to copy and then click [Copy].

2. Click [OK] to copy the address.

3. Change the name and settings of the copied address, and register it as a new address.

Exporting and Importing Address Books
You can back up your address books as files in CSV format, and import the backed up address book data to another ScanFront unit.

Hint
If you have multiple ScanFront units, you can use the same address books on all of them by importing the address book settings file registered on one ScanFront unit to the other units.

Exporting from the Scanner
You can save the address book data to a specified folder.

1. Click [Export from ScanFront 300].
2. Click [Save], specify a save location, and save the address book data.

**Hint**
- You can open the saved CSV file with software that supports CSV files such as spread sheet software in order to check the structure of the file.
- You can match the structure of a CSV file created in another mailer to that of a CSV file saved on the ScanFront, and then import the address book of the other mailer and use it on the ScanFront.

**Importing to the Scanner**
You can import previously exported address book data to the scanner.

1. Click [Import to ScanFront 300].

2. Click [Browse] and specify a previously exported address book settings file.

   - **Replaces the whole data**: Deletes the currently registered address book and overwrites it with the imported address book data.
   - **Appends data**: Adds the imported address book data to the currently registered address book.

4. Click [Execute].
Confirm the message that appears, and click [OK] to import the data.

**Hint**
When importing is completed, the following message appears. Click [OK] to return to Address Book Settings and confirm the imported address data.
5. **Job Button Settings**

From the Job Button Settings screen, you can register the Shared Job Button, which is available to all users.

1. **Job Button Type**
   - You can only select Shared Job Button here. You can manage the My Job Button, provided for each user, from the User Administration menu.

2. **Export from ScanFront 300**
   - Exports the job button data as a file in DAT format. (See “Exporting and Importing Job Buttons” on p. 6-27.)

3. **Import to ScanFront 300**
   - Imports a previously exported job button data file. (See “Exporting and Importing Job Buttons” on p. 6-27.)

4. **[New Job Button] button**
   - Registers a new job button. (See “Registering New Job Buttons” on p. 6-21.)

5. **[Select All] button**
   - Selects all of the displayed job buttons.

6. **[Except All] button**
   - Deselects all of the displayed job buttons.

7. **[Copy] button**
   - Copies the selected job button. Only enabled when a job button is selected. (See “Copying Job Buttons” on p. 6-26.)

8. **[Delete] button**
   - Deletes the selected job button. Only enabled when a job button is selected.

9. **Job Button List**
   - Displays the registered job buttons.
   - **Check box**: Select this check box to select a job button.
   - **Edit**: Click to edit a job button.
Registering New Job Buttons

Click [New Job Button] to register a new job button.

Job Button Settings

Name of Job Button
Enter the job button name to display on the touch panel.

Hint
• Job buttons are sorted and displayed by job button name. If you want to set to display job buttons in a particular order, insert sequential letters or numbers before the name when registering each job button. Ex.) 01_xxxx
• If you enter a job button name that is two lines long, the job button display will be two lines long.

Color of Job Button
Specify a color for the job button.

When you select this Job Button
• Display Scan Setting Screen
  Displays the Scan Setting screen when the job button is pressed.
• Skip Scan Setting Screen
  Starts scanning without displaying the Scan Setting screen when the job button is pressed.

IMPORTANT
If you select [Skip Scan Setting Screen], scanning starts as soon as the job button is pressed, whether a document is inserted or not.

Address

Click [Add from Address Book], open the Address page, and select the address to send to.

IMPORTANT
• You can register up to 100 addresses to a job button.
• For the number mentioned above, the count for a group is the number of addresses registered to the group (maximum of 99 addresses) plus the group name, so a group with 99 addresses registered to it is counted as having 100 addresses.

Scan Settings/Detailed settings
For details on Scan Settings/Detailed settings, see “Scan Settings Overview” on p. 6-22.

E-mail settings

Subject
Enter a subject for the e-mail message.

Message
Enter the text of the e-mail message.

Delivery Options
**Action when the same named file exists**
Select the action to take when a file of the same name exists at the destination.

- **Display a message**
  Displays a message confirming that the file will be overwritten.
- **Abort sending**
  Cancels sending.
- **Overwrite the file**
  Overwrites the identically named file without displaying a confirmation message.

**Send the files immediately after scanning**
- **ON**
  Starts sending when scanning completes.
- **OFF**
  Starts sending after you confirm the scanned image when scanning completes.

**Confirm addresses before sending**
- **ON**
  Displays the Address Confirmation screen, and then starts sending after you confirm the address.
- **OFF**
  Sends the image without confirming the address.

**Screen after sending**
Select the screen to display after an image is sent.
- **Initial Screen**
  Returns to the startup screen set for [Screen after Login] in the User Settings.
- **Logout**
  Logs out after the images are sent.
- **Select screen after sending**
  Displays a message dialog for selecting from the above actions after the images are sent.

**Index Settings**
Specify whether to attach metadata (index files) to scanned images.

<table>
<thead>
<tr>
<th>Index settings</th>
<th>Description of setting</th>
<th>Sends index file:</th>
<th>OK</th>
<th>Cancel</th>
<th>Default</th>
</tr>
</thead>
<tbody>

<td></td>
</tr>
</tbody>
</table>

**Scan Settings Overview**
The scan settings include basic and detailed settings for scanning parameters and individual settings by file format.

**Scan Settings**

**Page Size**
Select the size of the document to scan from the list.

**Hint**
- The [Auto size] option automatically detects the size of the scanned document during scanning.
- When scanning a long document, select [Auto size (Long)]

**IMPORTANT**
A resolution of [300 dpi] or more cannot be set when [Auto size (Long)] is selected.
Mode
Select the scanning mode (Black and White, Error Diffusion, Text enhance, Gray, Color, Auto Color Detection).
When [Auto Color Detection] is selected, the scanner automatically detects whether the document is color or black and white. When this option is selected, you can also configure the following settings.

• Mode in case of binary
  Specify the scanning mode to use when a black and white document is detected.

• Threshold intensity to judge the document as color
  Adjust the sensitivity to colors in a document.

• Aresize to judge the document as color
  Specify the ratio of colored regions in a document.

IMPORTANT
• The [Auto Color Detection] function cannot be used simultaneously with the color drop-out or prescan function.
• Depending on the selected mode, the file formats available for saving may be limited. A warning message appears when an unavailable combination is selected.

</table>

Resolution (dpi)
Select the scanning resolution (100, 150, 200, 300, 400, or 600 dpi).

Scanning Side
Select the method for scanning the document (Simplex, Duplex, Skip blank page, Folio).

Hint
• The Skip Blank Page option scans both sides of a document and skips saving any image it determines to be a blank page.
• You can adjust the sensitivity of the Skip Blank Page option under [Contents detection sensitivity].
• The initial value for the Skip Blank Page option is set to “90.” As you lower the value from the default setting, pages of the document with text become more likely to be skipped as well. As you raise the value from the default setting, pages of the document that are blank become less likely to be skipped.

IMPORTANT
• The scanning speed may be reduced when [Skip Blank Page] is selected.
• A resolution of [400 dpi] or more cannot be set when [Folio] is selected. In addition, [Double feed detection by Ultrasonic] cannot be selected.

Prescan
Enables you to preview an image of the first page of the document before scanning the entire document.

Hint
• Scanning pauses after the first page of the document is scanned, and the image of the first page is displayed.
• Use the displayed image to confirm and adjust the brightness and contrast. Press [Continue] to confirm the adjusted brightness and contrast for the first image and continue scanning.

File name
Specify a name for the image file to be sent.
Add Date to File name
The scanner adds 17 digits that indicate the date and time to the file name of the image to be sent.
Ex.) May 14, 2010, 3:40:30 p.m.
   yyyyymmdd: File name + 20100514154030123
   mmddyyyy: File name + 05142010154030123
   ddmmyyyy: File name + 14052010154030123
* The last three digits indicate the number of milliseconds.
You can select [Custom] to configure additional file name settings. The additional settings are identical to those in “Custom File Name Settings” on p. 6-8.

When you select this Job Button
Specify whether the file name entry screen appears when you start scanning using the job button.

File format
Select a file format for the image file, and configure the corresponding settings.

TIFF: Multi page settings
Select [Single page (Front/back separate file)] to save each side of each page as a separate image file, [Single page (Front/back same file)] to save each page as a separate image file, or [Multi page] to save one image file containing multiple pages when scanning multiple pages.

JPEG: Compression
Select a compression ratio for images saved in JPEG format.

PDF:
Configure the settings for compression ratio, multi page, OCR (optical character recognition), and security.

Compression Method
Specify a compression level by selecting [Standard] or [High Compression] as the compression method.

OCR (Optical Character Recognition)
When OCR is set to [ON], the scanner performs character recognition on textual portions of the document, and embeds the detected characters as editable text information in the PDF file.

Hint
When you set OCR to [ON], make sure to select the OCR language that matches the document text.

Encryption
Apply security to the PDF file.

IMPORTANT
Using the High (128-bit RC4) level setting is recommended. The Low (40-bit RC4) level setting provides less security.

Protect Document
The ability to view the document is protected by a password.
**IMPORTANT**

Take care not to forget the password once it is set. If you forget the password, the document can no longer be opened.

**Protect Permission**
Permissions for printing and editing the PDF file are protected by a password.

**Printing allowed**
Enables the PDF file to be printed from a printer.

**Changes allowed**
Enables editing of the PDF file, such as adding or deleting pages.

**Enable copying of text, images, and accessibility**
Enables text information embedded by OCR to be copied and the PDF file to be read aloud by text-to-speech software.

**IMPORTANT**
- Protecting PDF file permissions is recommended when the permissions have been restricted.
- You can change the permissions and cancel password protection for a password protected PDF file in an application capable of editing PDF files such as Adobe Acrobat.

**Detailed settings**

**IMPORTANT**
The [Double feed detection by Ultrasonic] setting only appears when using the ScanFront 300P.

**Brightness (Front)**
Adjusts the brightness of the image to be scanned.

**Brightness (Back)**
Enabled for duplex scanning. Use this option when the front and back sides of a document are shaded differently. To change the brightness settings for the front and back sides, clear the [Same as front] check box.

**Contrast (Front)**
Adjusts the contrast of the image to be scanned.

**Contrast (Back)**
Enabled for duplex scanning. Use this option when the front and back sides of a document are shaded differently. To change the contrast settings for the front and back sides, clear the [Same as front] check box.

**Double feed detection by Ultrasonic (Only available with the ScanFront 300P)**
The scanner uses an ultrasonic sensor to detect when two or more documents are fed together, and stops feeding when a double feed is detected.

**IMPORTANT**
- This method is effective when documents overlap by 1.97” (50 mm) or more. It does not function if only a slight portion of the document is overlapping.
- When [Scanning Side] is set to [Folio], [Double feed detection by Ultrasonic] cannot be selected.

**Double feed detection by length**
The scanner detects by document length when two or more documents are fed together, and stops feeding when a double feed is detected.
IMPORTANT
• Using the length of the first document page as a reference, the scanner detects a double feed when a subsequent page is longer or shorter than the reference page by 1.38” (35 mm) or more.
• Set [Double feed detection by length] to [OFF] when scanning a document that contains pages of different lengths.

Document orientation
Rotates the scanned image to the specified angle.

Hint
When [Auto] is selected, the scanner detects text orientation within the document and rotates the image so that the orientation of the text is correct.

IMPORTANT
The scanning speed may be reduced when [Auto] is selected.

Deskew
Detects when a document has been fed askew from the scanned image, and then straightens the image.
• Prefer Quality
  Image processing is performed to minimize the loss of quality of an image that has deteriorated as result of deskewing.
• Prefer Speed
  The image deteriorates slightly as a result of deskewing.

IMPORTANT
If you select [Prefer Quality], the scanning speed is reduced. If you are scanning a large number of pages, select [Prefer Speed] to prevent a decrease in scanning speed.

Bleed-through reduction
Eliminates bleed-through images, in which images on the reverse side of a scanned document appear on the scanned page, such as when scanning thin documents with text or images on both sides.

IMPORTANT
The bleed-through reduction setting is disabled when the scanning mode is set to [Text enhance].

Hint
When using bleed-through reduction, adjust the bleed-through reduction level to match the type of document.

Color drop-out
The color drop-out function has a “drop-out” effect that leaves out a specified color (red, blue, or green) while scanning, and a “color enhancement” effect that emphasizes a specified color.

IMPORTANT
The color drop-out setting is disabled when the scanning mode is set to [Color].

Hint
The OCR recognition rate is sometimes improved by deleting colored ruled lines and other objects with the color drop-out function.

Copying Job Buttons
You can copy the settings of a job button and register it as a new job button.

Hint
• Use this function when you want to copy a Shared Job Button and register it as a different job button after changing some of the settings.
• By copying job buttons from User Administration, you can copy job buttons between the Shared Job Button and the My Job Button.

1. Select the job button you want to copy, and click the [Copy] button.
2. Click [OK] to copy the job button.

Exporting from the Scanner
You can save the job button settings file to a specified folder.

1. Click [Export from ScanFront 300].

2. Click [Save], specify a save location, and save the job button settings file.

Importing to the Scanner
You can import a previously exported job button settings file to the scanner.

1. Click [Import to ScanFront 300].

2. Specify a previously exported job button settings file.

3. Select a processing method for importing the job button settings file.
   - Replaces the whole data: Deletes all currently registered job buttons and overwrites them with the imported job buttons.
   - Appends data: Adds the imported job button to the currently registered job button.

3. Change the name and settings of the copied job button, and register it as a new job button.

Editing Jobs
You can edit the settings of a registered job by clicking [Edit] in the job button list. The settings that can be edited are identical to those in “Registering New Job Buttons” on p. 6-21.

Exporting and Importing Job Buttons
You can back up your job button data as a settings file in DAT format, and import the backed up job button settings file to another ScanFront unit.

Hint
If you have multiple ScanFront units, you can use the same job buttons on all of them by importing the job button settings file registered on one ScanFront unit to the other units.
4. Click [Execute].
Confirm the message that appears, and click [OK] to import the data.

Hint
When importing is completed, the following message appears.
Click [OK] to return to Job Button Settings and confirm the imported job button.
6. Device Configuration

From the Device Configuration screen, you can configure the scanner settings.

1. Network Setting
   Confirm or change the network settings of the scanner. (See “Network Setting” on p. 6-30.)

2. Language/Timezone
   Configure the language displayed on the touch panel and the region where it is being used. (See “Language/Timezone” on p. 6-30.)
   **IMPORTANT**
   The time zone setting also effects the time stamp on sent e-mail.

3. Device Operation
   Configure the settings for [Display off], [Auto Logout] and [Low Power Mode]. (See “Device Operation” on p. 6-31.)

4. Login Options
   Select the type of screen that appears when users log in. (See “Login Options” on p. 6-31.)

5. Administrator Settings
   Set the password and e-mail address of the Administrator. (See “Administrator Settings” on p. 6-32.)
   **IMPORTANT**
   The e-mail address of the Administrator is used as the originating address when a user without a registered e-mail address sends an e-mail message.
Network Setting
You can confirm the network settings configured under [Administrator setting] on the scanner.

Network Setting
Confirm or change the network settings configured under [Administrator setting] on the scanner.

- **IMPORTANT**
  - The device name can be a combination of letters (A-Z, a-z), numbers (0-9), and hyphens (-) up to 15 characters long.
  - The device name must begin with a letter. You cannot end the device name with a hyphen.
  - You must restart the scanner after changing the device name.

Security of Web Menu
Add a checkmark to always use SSL for communication with the Web Menu.

- **Hint**
  - If you add a checkmark for [Be sure to use SSL], [Login with SSL] and [Do Not Use SSL] are no longer displayed in the login screen for the Web menu.
  - When you open the Web Menu using Internet Explorer 7 or later, an SSL-certificate warning will appear. However, you can proceed and open the Web Menu safely.

Language/Timezone
You can confirm or change the language and regional settings that appear on the scanner.

Language on the device
Set the language displayed on the touch panel.

- **IMPORTANT**
  - You must restart the scanner after changing the display language setting.

Time Zone
Set the region in which the scanner will be used.

Enable daylight saving time
Select this check box to apply the Daylight Saving Time for the specified region set in the Time Zone.

- **IMPORTANT**
  - If the correct time zone is not set, the time stamps that are saved for the send time of e-mail messages, and for the saved image files will be incorrect.
  - When the daylight saving time mode is enabled, the correct time may not be reflected. In this case, set the correct time.
Device Operation

You can configure the operation conditions of the scanner.

Display Off
Set the scanner to turn off the touch panel display after a specified period of inactivity.

*IMPORTANT*
When Display Off activates and the touch panel display turns off, touch the panel to restore the display.

Auto Logout
Set the scanner to automatically log users out after a specified period of inactivity.

Low Power Mode
Set the scanner to switch to Low Power mode after a specified period of inactivity.

*IMPORTANT*
- When the scanner switches to Low Power mode, the touch panel display turns off and the power indicator flashes. To switch out of Low Power mode, press the power switch or touch the touch panel.
- The scanner does not transition to Low Power mode during the flow of data on the network when connected to a network.
- Note that if the scanner transitions to Low Power mode when the placed documents run out after scanning is started, or scanning is suspended because of a paper jam or double feed, all the images that were scanned prior to the suspending of scanning and that were not yet transmitted are discarded.
- You will not be able to operate the scanner immediately after power is restored from Low Power mode. Operation will be enabled after about 15 seconds, so please wait a moment before attempting operation.

Login Options

You can set the type of user login screen that appears.

*Hint*
The login setting can also be changed under [Administrator setting] on the scanner.

List type login
Log in by selecting a user from the list.

Key in type login
Log in by entering a user name and password.

*IMPORTANT*
When using an authentication server, the login type is set to [Key in type login], and users log in by selecting [Device Authentication] and [Server Authentication]. (See “Authentication Server” on p. 6-35.)
❑ Administrator Settings

You can set the password and e-mail address of the Administrator.

Administrator Password
Change the Administrator password.

Administrator Address
Register the Administrator e-mail address.

⚠️ IMPORTANT
- The e-mail address of the Administrator is used as the originating address when a user without a registered e-mail address sends an e-mail message.
- When a sent e-mail message results in an error due to, for example, an incorrect e-mail address, an error notification is delivered from the mail server to the e-mail address of the administrator.
7. Server Settings

From the Server Settings screen, you can configure mail server settings for sending images via e-mail, and settings for accessing a network authentication server compatible with a directory service.

**IMPORTANT**

- You can simplify user administration on the scanner by using e-mail addresses registered on an LDAP server, or by logging in from user accounts that are registered on a domain server and are compatible with Active Directory or LDAP servers.
- Configure the server settings only after consulting your network administrator.

1. **E-mail Server / Fax Settings**
   Configure the mail server to be used for sending e-mail, or the Internet fax service provider to be used for sending fax. For details, consult your e-mail system administrator. (See “E-mail Server/Fax Settings” on p. 6-34.)

2. **Authentication Server**
   Configure the domain server (authentication server) on which user accounts have been registered with Active Directory. (See “Authentication Server” on p. 6-35.)

3. **Address Book Server**
   Configure these settings when using an LDAP server. (See “Address Book Server” on p. 6-36.)

4. **FTP server**
   Configure this function to transfer a scan result log along with an image file during transfer to the FTP server. (See “FTP server” on p. 6-36.)

5. **NTP Server**
   Configure the NTP server to synchronize the ScanFront with the correct time. (See “NTP Server” on p. 6-37.)

6. **ScanFront Service Server**
   When a ScanFront Service Server (i.e., a computer on which ScanFront Service is installed) exists on the network, use this to specify the host name of the server and the port number used for transmission.
E-mail Server/Fax Settings

You can configure the mail server settings for sending e-mail messages and the fax server settings for sending faxes.

Hint
The scanner sends a large volume of data by e-mail. Make sure to confirm the mail server settings with your e-mail system administrator before configuring the settings.

E-mail Server

- **E-mail Host Name (Address)**
  Enter the name or address of the SMTP server (for sending e-mail messages).

- **Port number**
  Change the port number if necessary. The standard port number is 25.

- **Divided E-mail Size**
  If the image file attached to an e-mail message is too large to send, the file is divided into pieces of the specified size before being sent.

Fax Server Authentication Method
Configure this setting based on the authentication method of your mail server. For details on the mail server authentication method, consult your e-mail system administrator.

FAX Settings
Configure the following settings concerning the Internet fax service you are using.

- **Provider name**
  If you are using an Internet fax service and provider name specification is necessary, enter the provider name specified by your provider here.

- **User name**
  If you are using an Internet fax service and user information specification is necessary, enter the user name registered with your provider here.

- **Password**
  To use the password of the user specified in [User name], select [Change Password] and enter the password.

- **To, Subject, Message**
  Enter the e-mail address (To), subject, and message for e-mails that will be sent to the Internet fax service.
If you enter the following substitution strings for these settings, the strings will be replaced with the following strings when the fax is sent.

<table>
<thead>
<tr>
<th>Substitution String</th>
<th>Replacement String</th>
</tr>
</thead>
<tbody>
<tr>
<td>%n%</td>
<td>Fax number that is registered in the address book and selected before sending the image file.</td>
</tr>
<tr>
<td>%h%</td>
<td>Provider name</td>
</tr>
<tr>
<td>%u%</td>
<td>User name</td>
</tr>
<tr>
<td>%pw%</td>
<td>Password</td>
</tr>
</tbody>
</table>

For example, the substitution strings that you enter will be replaced as follows when the fax number is “00111222”, the provider name is “FaxService”, and the user name is “SFUser”.

<table>
<thead>
<tr>
<th>Entered String</th>
<th>Replacement String</th>
</tr>
</thead>
<tbody>
<tr>
<td>%n%@%h%</td>
<td>0011112222@FaxService</td>
</tr>
<tr>
<td>Fax delivery notification (from %u%)</td>
<td>Fax delivery notification (from SFUser)</td>
</tr>
</tbody>
</table>

- **Enable Authentication Server**
  Select this check box to permit users registered on the authentication server to log in.
- **Authentication Method**
  Select one of the following based on the directory service used by the authentication server.
  - Select [Simple] if the directory service used by the authentication server is OpenLDAP.
  - Select [Active Directory] if the directory service used by the authentication server is Active Directory.
- **Search Base**
  Enter the search base for referring e-mail addresses registered on the authentication server.

---

**IMPORTANT**
- After configuring an authentication server, restart the scanner to update its display.
- When the authentication server and address book server (LDAP server) are the same, enter values for all of the settings.

For details on the use and configuration of an authorization server, consult your server administrator.

---

**Enable Authentication Server**
Select this check box to permit users registered on the authentication server to log in.

**Authentication Method**
Select one of the following based on the directory service used by the authentication server.
- Select [Simple] if the directory service used by the authentication server is OpenLDAP.
- Select [Active Directory] if the directory service used by the authentication server is Active Directory.

**Search Base**
Enter the search base for referring e-mail addresses registered on the authentication server.

**IMPORTANT**
For information on the character strings to enter for the search base, consult your system administrator.

**Host Name (Address)**
Enter the host name or address of the authentication server.

**Domain**
Enter a domain name supported by Active Directory.

**Port number**
Enter the port number used for the LDAP protocol. The standard port number is 389.

**User name**
When using the authentication server as an address book server, enter a user name for referring e-mail addresses.
Change Password
When you want to enter a password for the above user, add a checkmark and enter a password.

💡 Hint
Changing the password updates the password information saved on the scanner, but does not alter the password registered on the server.

When server authentication is configured, list boxes for selecting device authentication or server authentication are added to the login screens of the ScanFront scanner and Web Menu (User Mode).

- Web Menu (User Mode) Login Screen

- ScanFront Login Screen

🗺 Address Book Server
You can configure the settings for using an address book server (LDAP server). You can configure up to four address book servers.

![Address Book Server](image)

### Address Book Server Setting
Select one of these options when using an address book server (LDAP server). If the authentication server and address book server are different, make sure to enter values for all of the settings.

For details on each setting, see the settings under “Authentication Server” on p. 6-35.

💡 Hint
When using an address book server that is different from the authentication server, select [Anonymous] for [Authentication Method].

🗺 FTP server
You can use a function that transfers a scan result log along with an image file during transfer to the FTP server. When this function is enabled, a scan result log with the same file name as the image file is transferred to the same FTP folder as the image file. The extension for the log file is “.log”.

![FTP server](image)
NTP Server

You can configure the NTP server settings to synchronize the ScanFront with the correct time.

### NTP Server Setting
Select this check box to synchronize with the NTP server.

#### NTP Server (primary)
Enter the host name or IP address of the main NTP server.

#### NTP Server (secondary)
Enter the host name or IP address of the secondary NTP server.

**IMPORTANT**
The NTP server and ScanFront are synchronized when [OK] is clicked on the settings screen to complete the settings and every time the ScanFront is started.

ScanFront Service Server

When a ScanFront Service Server (i.e., a computer on which ScanFront Service is installed) exists on the network, use this to specify the host name of the server and the port number used for transmission.

**Hint**
ScanFront Service uses port number 50000 to communicate with the ScanFront by default. If the default port number used by ScanFront Service has been changed (see p. 4-6), make sure to specify the changed port number here.
8. **System Settings**

From the System Settings screen, you can backup and restore setting information, update module versions, and configure logs used by the scanner.

- **Backup/Restore**
  - Backs up or restores the scanner settings. *(See “Backup and Restore” on p. 6-39.)*
  - Be aware that the following settings are not backed up:
    - IP address
    - Device name
    - Touch panel adjustment values

- **Module Version Information/Version Up**
  - Displays the OS and module version information of the scanner. You can also acquire a version update file to update the ScanFront version. *(See “Module Version Information/Update” on p. 6-40.)*
  - **IMPORTANT**
    - For details on acquiring version update files, contact your dealer or a Canon service representative.

- **Log Settings**
  - Records usage statistics to a log file. *(See “Log Settings” on p. 6-42.)*
[Backup and Restore]

You can backup or restore the scanner settings using the following procedure.

**Backup All Settings**

This option saves all the ScanFront settings to a specified folder.

⚠️ **IMPORTANT**

The following settings are not included in the backup data because they are unique to the scanner unit:
- IP address
- Device name
- Touch panel adjustment values

1. Click [Backup All Settings].

2. Click [Save].

3. Specify a save location for the backup data, and save the backup data.
**Restore All Settings**

This option restores backed up data to the scanner.

1. Confirm that no administrator or user is logged in to the scanner.

   ![Hint](image)

   If a user or administrator is logged in to the scanner, an error will occur when the restoration is performed.

2. Click [Browse], and specify the backup data to use.

3. Click [Restore].

4. Confirm the message that appears, and click [OK] to perform the restoration.

5. Click [OK] to complete the restoration.

6. Confirm the restored settings.

**Module Version Information/Update**

You can display the version information, and update the version, of the module in use on the scanner.

![Important](image)

If the scanner malfunctions, the version information is required when contacting support services.

**Acquiring Update Files**

For details on acquiring the update files needed to update the scanner, consult your dealer or a Canon service representative.
**Updating the Scanner**

You can update the scanner with an acquired update file.

⚠️ **IMPORTANT**

- Make sure to back up your scanner data before performing a version update.
- Use the following procedure to update the scanner. Once the version update starts, do not touch the scanner until it restarts.
  1. Transfer the update file to the scanner.
  2. Update the version of the scanner.
  3. Restart the scanner (automatic).

1. Confirm that no one is using the scanner.
2. Back up all settings. (See “Backup and Restore” on p. 6-39.)
3. Click [Browse], and specify the update file to use.
4. Click [Version Up].

5. Confirm the message that appears, and click [OK] to perform the version update.

⚠️ **IMPORTANT**

It takes several minutes to transfer the update file to the scanner. Do not operate the Web Menu or scanner until the Web Menu changes to the following display.

6. Click [OK] to close the Web Menu.

⚠️ **IMPORTANT**

When the update file finishes transferring, the version update starts. Do not operate the scanner until the version update is complete and the scanner restarts.

7. Configure the IP address, and then restore the backup file from the Web Menu.
Log Settings

You can configure settings for log files.

Make Log File
Select this check box to create a log file.

PC Name (Host Name)
Enter the name of the computer containing the publicly shared folder where the log file will be saved.

Location
Enter the name of the shared folder. You can also press [Browse] to select a folder to save.

User name/Password
Enter the name and password of a user with the authority to write data to the shared folder.

Domain/Workgroup
If the computer containing the shared folder is part of a domain, enter the domain name.

**IMPORTANT**
If the computer containing the shared folder is part of a domain, enter the user name and password registered with the domain, and the domain name.

File name
Enter a name for the log file.

**Hint**
The date and time that the log file was created are added to the entered file name.

1. About ScanFront Administration Tool

ScanFront Administration Tool is software that allows you to manage multiple ScanFront scanners at one time. To use this software, install it on a computer connected to the same network as the ScanFront scanners.

The following operations can be performed for ScanFront scanners on the same network.

- Checking the current status of the ScanFront and network configuration information
- Changing passwords
- Configuring the ScanFront
- Checking connections
- Updating software
- Backing up and restoring configuration data
- Removing users
2. Installing ScanFront Administration Tool

- **System Requirements**
  Install ScanFront Administration Tool on a computer that is connected to the same network as the ScanFront scanners, and that meets the following requirements.

  **Operating System**
  - Windows XP (32 bit/64 bit)
  - Windows Server 2003 (32 bit/64 bit)
  - Windows Vista (32 bit/64 bit)
  - Windows Server 2008 (32 bit/64 bit)
  - Windows Server 2008 R2
  - Windows 7 (32 bit/64 bit)

- **Installation**
  1. Insert the INSTRUCTIONS AND UTILITIES CD-ROM into the computer.
  2. Start the ScanFront Administration Tool installer.
     Use Windows Explorer, for example, to locate the installer in the following folder on the CD-ROM, and double-click the installer to start it.
     For Windows 7, Windows Vista, or Windows Server 2008:
     Q:\AdministrationTool\Vista and 2008Server
     English\setup.exe (“Q” is the letter assignment for the CD-ROM drive)
     For Windows XP or Windows Server 2003:
     Q: \AdministrationTool\XP and 2003Server
     English\setup.exe (“Q” is the letter assignment for the CD-ROM drive)

  3. Click [Next].
4. Change the install location and user setting if necessary, and click [Next].

5. Click [Next].

Installation starts. When installation is complete, a screen indicating that installation is complete appears.

6. Click [Close].
3. ScanFront Administration Tool Setup

Starting ScanFront Administration Tool
Click the [Start] button, [All Programs], [ScanFront Administration Tool], and then [ScanFront Administration Tool]. ScanFront Administration Tool starts.

Quitting ScanFront Administration Tool
Click [Close] in the [File] menu.

Registering ScanFront Scanners
To manage a ScanFront scanner using ScanFront Administration Tool, add the ScanFront to the ScanFront Administration Tool list as follows.

2. Enter information for the ScanFront you want to register.
   - Enter the IP address of the ScanFront in [IP address/Device name].
   - If an administrator password is configured for the ScanFront, enter it in [Password].
   - After you enter an IP address for a ScanFront, another information entry row will be added below. This allows you to enter information for multiple ScanFront scanners.
3. Click [OK]. The registered ScanFront scanners are added to the ScanFront Administration Tool list.

Deleting Registered ScanFront Scanners
In the ScanFront Administration Tool list, select the check box at the far left of the row for the ScanFront you want to delete, and then click [Delete] in the [Edit] menu.
4. Managing the ScanFront Scanners

You can change administrator passwords, check connections, and manage users for ScanFront scanners registered in ScanFront Administration Tool.

Selecting a ScanFront

To manage a ScanFront scanner with ScanFront Administration Tool, select it in the ScanFront Administration Tool list. Selecting a check box at the far left of each row in the list selects the corresponding ScanFront. If you click [Select All], all of the ScanFront scanners in the list will be selected. If you select [Except All], all of the selections in the list will be cleared.

Checking ScanFront Connections

Select a ScanFront scanner in the list, and click [Check the connection] to check the connection of the selected ScanFront. The results of the check appear in the [Status] column. For example, “Connection Possible” appears when the ScanFront is properly connected.

Changing Passwords

Select a check box at the far left of each row in the list, click the [Change Password] button to display the [Password] dialog box, and then change the password for the selected ScanFront. After you enter the new password and click [OK], the [Password] dialog box will close, and the password will be changed.

Hint

If multiple ScanFront scanners are selected, a dialog box for changing the password of the first selected ScanFront in the list appears. A dialog box for changing the password of the next ScanFront appears when you click [OK]. To configure the same password for all the ScanFront scanners, select the [Do this for the all password input] check box before clicking [OK].
Changing IP Addresses and Device Names

Double-click a ScanFront scanner in the list to display the [IP Address / Device Name] dialog box, and then change the IP address or device name of the selected ScanFront.

After you enter the IP address or device name and click [OK], the dialog box will close, and the specified IP address or device name will be applied.

Checking Detailed Information on the ScanFront

Click the [Check Details] button that appears for the ScanFront scanners registered in the list to display the [Details] window.

IMPORTANT
You can only perform this operation for ScanFront scanners to which ScanFront Administration Tool is able to connect.

IMPORTANT
You can only perform this operation for ScanFront scanners to which ScanFront Administration Tool is able to connect.

Displaying the Web Menu

When you select a ScanFront scanner in the list and click the [Open Web Menu] button, the Web browser starts and the Web Menu for the selected ScanFront is displayed.

IMPORTANT
You can only perform this operation for ScanFront scanners to which ScanFront Administration Tool is able to connect.

Batch Processing

You can select multiple ScanFront scanners in the list, and select a command in the [Processing] menu to perform the same operation all of the selected ScanFront scanners at one time.

The following commands are available in the [Processing] menu.

[Restore All Settings]
Load backed up ScanFront data stored on the computer, and restore settings on all selected ScanFront scanners.

[Backup All Settings]
Save the backup data of all selected ScanFront scanners to any location on the computer.

[Import User Data]
Load ScanFront user data stored on the computer, and register it to all selected ScanFront scanners.
[Export User Data]
Save the user data of all selected ScanFront scanners to any location on the computer.

[Version Up]
Load ScanFront firmware stored on the computer, and update the firmware version of all selected ScanFront scanners.

- Importing/Exporting Administration Data
  You can export administration data for ScanFront Administration Tool to any location on the computer, and import exported administration data.

  **Exporting Administration Data**
  Click [Export] in the [Edit Data] menu, specify a destination and file name for the administration data in the dialog box that appears, and then click [Save].

  **Importing Administration Data**
  Click [Import] in the [Edit Data] menu, specify the storage location and file name for the administration data in the dialog box that appears, and then click [Open].

1. Web Menu Overview

The Web Menu function enables you to access and configure the scanner from the Web browser of a remote computer. From the Web Menu, you can register address books and job buttons.

**IMPORTANT**

- For a Web browser, use Microsoft Internet Explorer 6.0 or later or Firefox 3.5 or later.
- In some cases, settings cannot be changed from the Web Menu when the ScanFront administrator or another user is logged in to the scanner.
- Use the device name or IP address assigned to the scanner as the URL for logging in to the Web Menu. (See p. 8-3.)
- When you open the Web Menu using Internet Explorer 7 or later, an SSL-certificate warning will appear. However, you can proceed and open the Web Menu safely.

**Web Menu (User Mode)**

1. **User Settings** *(See “User Settings” on p. 8-5)*
   - Use to change the user settings.

2. **Address Book Settings** *(See “Address Book Settings” on p. 8-8)*
   - Use to register and manage entries in the Shared Address Book available to all users, and the My Address Book provided for each user.

3. **Job Button Settings** *(See “Job Button Settings” on p. 8-15)*
   - Use to register and manage the Shared Job Button available to all users, and the My Job Button provided for each user.
2. **Logging In to the Web Menu**

You can log in to the Web Menu using the following procedure.

![Hint](image)

Use the device name or the IP address assigned to the scanner as the URL for accessing the Web Menu. Contact the ScanFront administrator for the device name and the IP address.

1. Turn the scanner ON.
2. Confirm the IP address with the administrator.
3. Launch the Web browser on the computer.
4. Enter the device name or the IP address as the URL to open the Web Menu.
   Ex.) http://scanfront300 when the device name is ScanFront300, and http://172.19.xxx.xxx for the IP address.

![Hint](image)

If the Web Menu is set to Administrator Mode, click [To User Mode].

![IMPORTANT](image)

If [Authentication Method] appears above [User name] on the login screen, users can log in from an account registered on a domain server (Server Authentication), instead of logging in from an account registered on the scanner (Device Authentication). For details, consult the ScanFront administrator.

5. Enter a user name and password to log in to the Web Menu.

![IMPORTANT](image)

User names and passwords are case-sensitive. Make sure to enter them correctly.
3. User Settings

From the User Settings screen, you can change the information of a user logged in by Device Authentication.

① Setting (See “User Settings” on p. 8-4)
Allows you to edit a user’s settings.
User Settings

Click [Setting] to edit the user information.

User Settings

- **User name**
Enter a new user name.

- **Change Password**
Select the [Change Password] check box, and then enter the new password and confirmation password.

- **Mail Address (Not Changeable)**
To change the e-mail address, contact the ScanFront administrator.

- **SMTP/POP Before SMTP Authentication**
Appears when [Auth Method] is configured to any setting other than [SMTP] by the administrator in the mail server settings (see p. 6-34). Enter the [User name] and [Password] that will be used for mail server authentication here.

**IMPORTANT**

- When entering a [Password], select the [Change Password] check box before entry.
- [Change Password] updates the password information saved on the scanner, but does not alter the password registered on the server.
- For a user logged in by Server Authentication, you can only select a setting for [Screen after Login].
- E-mail address may not be registered for a user logged in by Server Authentication. For details on e-mail address settings, consult the ScanFront administrator.

- **Screen after Login**
Select the Home screen or the Job Button screen as the first screen to appear after the user logs in.
Custom File Name Settings
Specify the method in which file names used for saving scanned images are created. When you select to use custom file names during a scanning procedure, the image files will be saved under file names that are determined by the settings configured here. Components of the custom file name will be included in the order that they appear on this screen.

<table>
<thead>
<tr>
<th>Custom file name Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Custom file name</td>

</tr>
<tr>
<td>0</td>
</tr>
</tbody>
</table>

**IMPORTANT**
The following characters cannot be used to set the custom file name:
/ : ? " * < > |

- **Separator**
  Select the [Enable] check box to include a separator between character strings in the file name, and select a character to use as the separator in the list box.

- **String**
  Specify a string to include in the file name.

- **User name**
  Select the [Enable] check box to include the user name in the file name.

- **Date**
  Select the [Enable] check box to include the date in the file name, and select a format for the date in the list box.

- **Time**
  Select the [Enable] check box to include the time in the file name, and select a format for the time in the list box.

- **Device name**
  Select the [Enable] check box to include the device name in the file name.

- **Counter/Start number/Number of digits**
  Select the [Enable] check box to include a counter in the file name. When this is enabled, you can specify the starting value and number of digits used for the counter.

**Index Settings**
Specify the content of index files (metadata) that are attached to scanned image files. Components of the index file will be included in the order that they appear on this screen.

**IMPORTANT**
The following characters cannot be used in strings contained in the index file:
& " ' < >
• **Index string/Field name**
  Enter a string for the index. You can change the default field name (“String”) as necessary.

• **User name**
  Select the [Enable] check box to include the user name in the index file. You can change the default field name (“User”) as necessary.

• **Date**
  Select the [Enable] check box to include the date in the index file, and select a format for the date in the [Format] list box. You can change the default field name (“Date”) as necessary.

• **Time**
  Select the [Enable] check box to include the time in the index file, and select a format for the time in the [Format] list box. You can change the default field name (“Time”) as necessary.

• **Device name**
  Select the [Enable] check box to include the device name in the index file. You can change the default field name (“Device”) as necessary.

• **Counter/Start number/Number of digits**
  Select the [Enable] check box to include a counter in the index file. When this is enabled, you can specify the starting value and number of digits used for the counter. You can change the default field name (“Counter”) as necessary.

• **File name**
  Select the [Enable] check box to include the file name in the index file. You can change the default field name (“FileName”) as necessary.

• **File size**
  Select the [Enable] check box to include the file size in the index file. You can change the default field name (“FileSize”) as necessary.

• **Number of Pages**
  Select the [Enable] check box to include the number of pages that are in the scanned image in the index file. You can change the default field name (“PageNumber”) as necessary.

• **Destination path**
  Select the [Enable] check box to include the destination path in the index file. You can change the default field name (“Folder”) as necessary.

• **Index file format**
  Specify a file format for the index files.

[**OK** button]
Updates the user information with the changed settings.
4. Address Book Settings

From the Address Book Settings screen, you can register entries in the Shared Address Book, which is available to all users, and the My Address Book, which is provided for each user.

① Type of Address Book
Selects the address book (Shared Address Book or My Address Book) to edit.
The LDAP Address Book is also selectable if the address book server settings are enabled and permission to use the LDAP address book has been granted to the user. The address type is set to [E-mail] when the LDAP Address Book is selected.

② Export from ScanFront 300
Exports the address book data as a file in CSV format. (See “Exporting and Importing Address Books” on p. 8-13.)

③ Import to ScanFront 300
Imports a previously exported address book data file. (See “Exporting and Importing Address Books” on p. 8-13.)

④ Address type
Selects the type of addresses (E-mail, FTP Server, Shared folder, Group, or All) to display.

⑤ [New Address] button
Registers a new address book entry. (See “Registering New Addresses” on p. 8-10.)

⑥ [Select All] button
Selects all of the displayed addresses.

⑦ [Except All] button
Deselects all of the displayed addresses.

⑧ [Copy] button
Copies the selected address. Only enabled when an address is selected. (See “Copying Addresses” on p. 8-13.)

⑨ [Delete] button
Deletes the selected address. Only enabled when an address is selected.

⑩ Address List
Displays the registered addresses.
- Check box: Select this check box to select an address.
- Address type (icon)
  - : FTP
  - : Shared folder
  - : E-mail
  - : Fax
  - : Group
- Edit: Click to edit an address.
If the ScanFront administrator has restricted editing of the address books, the following Address Book settings apply. For details, consult the ScanFront administrator.

- If editing is restricted for only one address book (either the My Address Book or the Shared Address Book), users can only copy addresses from the restricted address book and paste them into the unrestricted address book.

- If editing is restricted for both the My Address Book and the Shared Address Book, users can only view detailed address information.
Registering New Addresses

Select the type of address book (Shared Address Book or My Address Book), and click [New Address] to register a new address.

💡 Hint
- The number of addresses that can be registered to the Shared Address Book (My Address Book) is up to 1000 in combination with the total number of addresses included in the Shared Job Button (My Job Button).
- For the number mentioned above, the count for a group is the number of addresses registered to the group (maximum of 99 addresses) plus the group name, so a group with 99 addresses registered to it is counted as having 100 addresses.
- The available settings vary, depending on the type of address (E-mail, FTP Server, Shared folder, Fax, or Group).

Address type: E-mail

This option registers an e-mail address.

**Name**
Enter the name to display on the scanner.

**E-mail Address**
Enter the destination e-mail address.

**[OK] button**
Registers a new e-mail address with the specified parameters.

Address type: FTP Server

This option registers a network FTP server.

⚠️ IMPORTANT
FTP servers that require firewall settings cannot be registered.

**Name**
Enter the name to display on the scanner.

**FTP server**
Enter the IP address or host name of the FTP server.

**Folder path**
To specify a subfolder on the FTP server, enter the path to the subfolder.

💡 Hint
If you are unsure of the subfolder’s path, use the following procedure to specify the subfolder:
1. After entering the [FTP server], [User name], and [Password], click [Browse] and log in to the FTP server.
2. In the folder that appears, specify any subfolder and click [OK].

**User name/Password**
Enter the user name and password required to log in to the FTP server.

⚠️ IMPORTANT
Make sure to enter the user name and password of an account with the authority to write data to the FTP server.

**Port number**
Enter the port number. The standard port number is 21.
Save Password
Saves the entered password.

Passive Mode
Uses passive mode to send transmissions to the FTP server.

⚠️ IMPORTANT
Use passive mode when normal communication with the FTP server cannot be established. However, be aware that communication may not be possible if the network is not functioning properly.

[OK] button
Registers a new FTP server with the specified parameters.

Address type: Shared folder
This option registers a folder shared publicly on the network.

Name
Enter the name to display on the scanner.

Computer Name (Host Name)
Enter the name of the computer containing the publicly shared folder. When the ScanFront Service is running, you can enter the IP address instead of a host name.

Folder path
Enter the path to the subfolder that you want to register as the name of the shared folder.

[Browse] button
Shows a list of computers connected to the network for you to specify a shared folder.

💡 Hint
You can display the shared folders using the following procedure.
1. After entering the computer name, user name, password, and domain/workgroup, click [Browse]. Access the computer containing the publicly shared folder. Sub-folders on computers running Windows 7 or Windows Server 2008 R2 cannot be browsed by clicking the [Browse] button. In such cases, enter the computer name and path up until the topmost folder of that computer in [Folder path], and then click [Browse].
2. Specify any subfolder from the displayed computer and click [OK].

⚠️ IMPORTANT
• If you click [Browse] without entering the user account information, only computers and workgroups within the same network address will display.
• When displaying workgroups that are not part of a domain, you cannot display computers or workgroups with different network addresses.
• Not all workgroups and computers in the network can be displayed immediately after the ScanFront is started. If some workgroups and computers are not displayed, wait a few minutes and then press [Browse].
• A new folder cannot be created in a specified folder via the Web Menu. If you want to create a new folder, use the computer set as the FTP server or the address editing functions of the ScanFront to create a folder beforehand.

User name/Password
Enter the user name and password of an account with the authority to write data to the shared folder.

Domain/Workgroup
If the computer containing the shared folder is part of a domain, enter the domain name.
**IMPORTANT**

- If the computer containing the publicly shared folder is part of a domain, enter the user name and password registered with the domain, and the domain name.
- If the computer containing the publicly shared folder is not part of a domain, there is no need to enter a [Domain/Workgroup].

**Save Password**
Select this check box to save the password to the address.

**IMPORTANT**
If you do not save the password, password entry will be required each time you send.

**[OK] button**
Registers a new shared folder with the specified parameters.

**Address type: Group**
This option registers several registered addresses together as a group.

**Hint**
Different types of address, such as e-mail addresses and shared folders, can be registered as a group, and up to 99 addresses can be registered to 1 group.

**Address Book Settings > My Address Book > New Address**

**Name**
Enter the name to display on the scanner.

**Add from Address Book**
Allows you to select an address from an address book, add it to the group, and display it in the list.

**[OK] button**
Registers a new group with the specified parameters.

**Address type: Fax**
This option registers a fax destination.

**Fax number**
Enter the fax number of the destination.

**[OK] button**
Registers a new fax destination with the specified parameters.
Copying Addresses
You can copy an address and register it as a new address. You can also copy an address from one address book to another.
As an example, this section describes how to copy from the Shared Address Book to the My Address Book.

Hint
Use this function when you want to copy an address between the Shared Address Book and My Address Book or copy an address and register it as a different address in the same address book after changing some of the settings.

1. Select Shared Address Book for the [Type of Address Book].
2. Add a checkmark to the check box of the address you want to copy and then click [Copy].
3. Select My Address Book for the copy destination, and click [OK].
4. Confirm the copied address.

Exporting and Importing Address Books
You can back up your address books as files in CSV format, and import the backed up address book data to another ScanFront unit.

Hint
If you have multiple ScanFront units, you can use the same address books on all of them by importing the address book settings file registered on one ScanFront unit to the other units.

Exporting from the Scanner
You can save the address book data to a specified folder.
1. Click [Export from ScanFront 300].
2. Click [Save], specify a save location, and save the address book data.

Hint
- You can open the saved CSV file with software that supports CSV files such as spread sheet software in order to check the structure of the file.
- You can match the structure of a CSV file created in another mailer to that of a CSV file saved on the ScanFront, and then import the address book of the other mailer and use it on the ScanFront.
**Importing to the Scanner**

You can import previously exported address book data to the scanner.

1. Click [Import to ScanFront 300].

2. Click [Browse] and specify a previously exported address book settings file.

   - **Replaces the whole data**: Deletes all currently registered address book entries and overwrites them with the imported address book data.
   - **Appends data**: Adds the imported address book data to the currently registered address book.

4. Click [Execute].

Confirm the message that appears, and click [OK] to import the data.

**Hint**

When importing is completed, the following message appears. Click [OK] to return to Address Book Settings and confirm the imported address data.
5. Job Button Settings

From the Job Button Settings screen, you can register the Shared Job Button, which is available to all users, and the My Job Button, which is provided for each user.

1. Job Button Type
   Select the job button (Shared Job Button or My Job Button) that you want to edit.

2. Export from ScanFront 300
   Exports the job button data as a file in DAT format. (See “Exporting and Importing Job Buttons” on p. 8-23.)

3. Import to ScanFront 300
   Imports a previously exported job button data file. (See “Exporting and Importing Job Buttons” on p. 8-23.)

4. [New Job Button] button
   Registers a new job button. (See “Registering New Job Buttons” on p. 8-17.)

5. [Select All] button
   Selects all of the displayed job buttons.

6. [Except All] button
   Deselects all of the displayed job buttons.

7. [Copy] button
   Copies the selected job button. Only enabled when a job button is selected. (See “Copying Job Buttons” on p. 8-22.)

8. [Delete] button
   Deletes the selected job button. Only enabled when a job button is selected.

9. Job Button List
   Displays the registered job buttons.
   • Check box: Select this check box to select a job button.
   • Edit: Click to edit a job button.
IMPORTANT

If the ScanFront administrator has restricted editing of the job buttons, the following Job Button settings apply. For details, consult the ScanFront administrator.

- If editing is restricted for only one set of job buttons (either the My Job Button or the Shared Job Button), users can copy job buttons from the restricted set of job buttons and paste them into the unrestricted set.

- If editing is restricted for both the My Job Button and the Shared Job Button, users can only view detailed job button information.
Registering New Job Buttons

Click [New Job Button] to register a new job button.

Job Button Settings

Name of Job Button
Enter the job button name to display on the touch panel.

Hint
- Job buttons are sorted and displayed by job button name. If you want to set to display job buttons in a particular order, insert sequential letters or numbers before the name when registering each job button. Ex.) 01_xxxx
- If you enter a job button name that is two lines long, the job button display will be two lines long.

Color of Job Button
Specify a color for the job button.

When you select this Job Button
- Display Scan Setting Screen
  Displays the Scan Setting screen when the job button is pressed.
- Skip Scan Setting Screen
  Starts scanning without displaying the Scan Setting screen when the job button is pressed.

IMPORTANT
If you select [Skip Scan Setting Screen], scanning starts as soon as the job button is pressed, whether a document is inserted or not.

Address

Click [Add from Address Book], open the Address page, and select the address to send to.

IMPORTANT
- You can register up to 100 addresses to a job button.
- For the number mentioned above, the count for a group is the number of addresses registered to the group (maximum of 99 addresses) plus the group name, so a group with 99 addresses registered to it is counted as having 100 addresses.

Scan Settings/Detailed settings
For details on Scan Settings/Detailed settings, see “Scan Settings Overview” on p. 8-18.

E-mail settings

Subject
Enter a subject for the e-mail message.

Message
Enter the text of the e-mail message.

Delivery Options

If you select [Skip Scan Setting Screen], scanning starts as soon as the job button is pressed, whether a document is inserted or not.
Action when the same named file exists
Select the action to take when a file of the same name exists at the destination.

- **Display a message**
  Displays a message confirming that the file will be overwritten.
- **Abort sending**
  Cancels sending.
- **Overwrite the file**
  Overwrites the identically named file without displaying a confirmation message.

Send the files immediately after scanning

- **ON**
  Starts sending when scanning completes.
- **OFF**
  Starts sending after you confirm the scanned image when scanning completes.

Confirm addresses before sending

- **ON**
  Displays the Address Confirmation screen, and then starts sending after you confirm the address.
- **OFF**
  Sends the image without confirming the address.

Screen after sending
Select the screen to display after an image is sent.

- **Initial Screen**
  Returns to the startup screen set for [Screen after Login] in the User Settings.
- **Logout**
  Logs out after the images are sent.
- **Select screen after sending**
  Displays a message dialog for selecting from the above actions after the images are sent.

Index Settings
Specify whether to attach metadata (index files) to scanned images.

Scan Settings Overview
The scan settings include basic and detailed settings for scanning parameters and individual settings by file format.

Scan Settings

Page Size
Select the size of the document to scan from the list.

**Hint**

- The [Auto size] option automatically detects the size of the scanned document during scanning.
- When scanning a long document, select [Auto size (Long)]

**IMPORTANT**
A resolution of [300 dpi] or more cannot be set when [Auto size (Long)] is selected.
Mode
Select the scanning mode (Black and White, Error Diffusion, Text enhance, Gray, Color, Auto Color Detection).
When [Auto Color Detection] is selected, the scanner automatically detects whether the document is color or black and white. When this option is selected, you can also configure the following settings.

- **Mode in case of binary**
  Specify the scanning mode to use when a black and white document is detected.

- **Threshold intensity to judge the document as color**
  Adjust the sensitivity to colors in a document.

- **Aresize to judge the document as color**
  Specify the ratio of colored regions in a document.

**IMPORTANT**

- The [Auto Color Detection] function cannot be used simultaneously with the color drop-out or prescan function.
- Depending on the selected mode, the file formats available for saving may be limited. A warning message appears when an unavailable combination is selected.

<table>
<thead>
<tr>
<th>Mode</th>
<th>TIFF</th>
<th>JPEG</th>
<th>PDF</th>
</tr>
</thead>
<tbody>
<tr>
<td>Black and White</td>
<td>Yes</td>
<td>No</td>
<td>Yes</td>

<td>Yes</td>
</tr>
<tr>
<td>Auto Color Detection</td>
<td>No</td>
<td>No</td>
<td>Yes</td>
</tr>
</tbody>
</table>

- When [Text enhance] is selected, [Bleed-through reduction] cannot be selected.

**Resolution (dpi)**
Select the scanning resolution (100, 150, 200, 300, 400, or 600 dpi).

**Hint**

- The Skip Blank Page option scans both sides of a document and skips saving any image it determines to be a blank page.
- You can adjust the sensitivity of the Skip Blank Page option under [Contents detection sensitivity].
- The initial value for the Skip Blank Page option is set to “90.” As you lower the value from the default setting, pages of the document with text become more likely to be skipped as well. As you raise the value from the default setting, pages of the document that are blank become less likely to be skipped.

**IMPORTANT**

- The scanning speed may be reduced when [Skip Blank Page] is selected.
- A resolution of [400 dpi] or more cannot be set when [Folio] is selected. In addition, [Double feed detection by Ultrasonic] cannot be selected.

**Prescan**
Enables you to preview an image of the first page of the document before scanning the entire document.

**Hint**

- Scanning pauses after the first page of the document is scanned, and the image of the first page is displayed.
- Use the displayed image to confirm and adjust the brightness and contrast. Press [Continue] to confirm the adjusted brightness and contrast for the first image and continue scanning.

**File name**
Specify a name for the image file to be sent.
Add Date to File name
The scanner adds 17 digits that indicate the date and time to the file name of the image to be sent.
Ex.) May 14, 2010, 3:40:30 p.m.
   yyyymmdd: File name + 20100514154030123
   mmddyyyy: File name + 05142010154030123
   ddmmyyyy: File name + 14052010154030123
   * The last three digits indicate the number of milliseconds.
You can select [Custom] to configure additional file name settings. The additional settings are identical to those in “Custom File Name Settings” on p. 8-6.

When you select this Job Button
Specify whether the file name entry screen appears when you start scanning using the job button.

File format
Select a file format for the image file, and configure the corresponding settings.

TIFF: Multi page settings
Select [Single page (Front/back separate file)] to save each side of each page as a separate image file, [Single page (Front/back same file)] to save each page as a separate image file, or [Multi page] to save one image file containing multiple pages when scanning multiple pages.

JPEG: Compression
Select a compression ratio for images saved in JPEG format.

PDF:
Configure the settings for compression ratio, multi page, OCR (optical character recognition), and security.

Compression Method
Specify a compression level by selecting [Standard] or [High Compression] as the compression method.

OCR (Optical Character Recognition)
When OCR is set to [ON], the scanner performs character recognition on textual portions of the document, and embeds the detected characters as editable text information in the PDF file.

Hint
When you set OCR to [ON], make sure to select the OCR language that matches the document text.

Encryption
Apply security to the PDF file.

IMPORTANT
Using the High (128-bit RC4) level setting is recommended. The Low (40-bit RC4) level setting provides less security.

Protect Document
The ability to view the document is protected by a password.

IMPORTANT
Take care not to forget the password once it is set. If you forget the password, the document can no longer be opened.
Protect Permission
Permissions for printing and editing the PDF file are protected by a password.

Printing allowed
Enables the PDF file to be printed from a printer.

Changes allowed
Enables editing of the PDF file, such as adding or deleting pages.

Enable copying of text, images, and accessibility
Enables text information embedded by OCR to be copied and the PDF file to be read aloud by text-to-speech software.

**IMPORTANT**
- Protecting PDF file permissions is recommended when the permissions have been restricted.
- You can change the permissions and cancel password protection for a password protected PDF file in an application capable of editing PDF files such as Adobe Acrobat.

Detailed settings

<table>
<thead>
<tr>
<th>Setting</th>
<th>Options</th>
</tr>
</thead>
<tbody>
<tr>
<td>Brightness (Front)</td>
<td>Normal, All</td>
</tr>
<tr>
<td>Contrast (Front)</td>
<td>Normal, All</td>
</tr>
<tr>
<td>Double feed detection by Ultrasonic</td>
<td>ON, OFF</td>
</tr>
<tr>
<td>Document size</td>
<td>Normal, All</td>
</tr>
<tr>
<td>Deskew</td>
<td>None, 5, 10, 15</td>
</tr>
<tr>
<td>Breakthrough reduction</td>
<td>ON, OFF</td>
</tr>
<tr>
<td>Color drop-out</td>
<td>None, Light, Medium, Dark</td>
</tr>
<tr>
<td>Color drop-out</td>
<td>None, Light, Medium, Dark</td>
</tr>
</tbody>
</table>

**IMPORTANT**
The [Double feed detection by Ultrasonic] setting only appears when using the ScanFront 300P.

Brightness (Front)
Adjusts the brightness of the image to be scanned.

Brightness (Back)
Enabled for duplex scanning. Use this option when the front and back sides of a document are shaded differently. To change the brightness settings for the front and back sides, clear the [Same as front] check box.

Contrast (Front)
Adjusts the contrast of the image to be scanned.

Contrast (Back)
Enabled for duplex scanning. Use this option when the front and back sides of a document are shaded differently. To change the contrast settings for the front and back sides, clear the [Same as front] check box.

Double feed detection by Ultrasonic (Only available with the ScanFront 300P)
The scanner uses an ultrasonic sensor to detect when two or more documents are fed together, and stops feeding when a double feed is detected.

**IMPORTANT**
- This method is effective when documents overlap by 1.97” (50 mm) or more. It does not function if only a slight portion of the document is overlapping.
- When [Scanning Side] is set to [Folio], [Double feed detection by Ultrasonic] cannot be selected.

Double feed detection by length
The scanner detects by document length when two or more documents are fed together, and stops feeding when a double feed is detected.

**IMPORTANT**
- Using the length of the first document page as a reference, the scanner detects a double feed when a subsequent page is longer or shorter than the reference page by 1.38” (35 mm) or more.
- Set [Double feed detection by length] to [OFF] when scanning a document that contains pages of different lengths.
**Document orientation**
Rotates the scanned image to the specified angle.

**Hint**
When [Auto] is selected, the scanner detects text orientation within the document and rotates the image so that the orientation of the text is correct.

**IMPORTANT**
The scanning speed may be reduced when [Auto] is selected.

**Deskew**
Detects when a document has been fed askew from the scanned image, and then straightens the image.

- **Prefer Quality**
  Image processing is performed to minimize the loss of quality of an image that has deteriorated as result of deskewing.

- **Prefer Speed**
  The image deteriorates slightly as a result of deskewing.

**IMPORTANT**
If you select [Prefer Quality], the scanning speed is reduced. If you are scanning a large number of pages, select [Prefer Speed] to prevent a decrease in scanning speed.

**Bleed-through reduction**
Eliminates bleed-through images, in which images on the reverse side of a scanned document appear on the scanned page, such as when scanning thin documents with text or images on both sides.

**IMPORTANT**
The bleed-through reduction setting is disabled when the scanning mode is set to [Text enhance].

**Hint**
When using bleed-through reduction, adjust the bleed-through reduction level to match the type of document.

**Color drop-out**
The color drop-out function has a “drop-out” effect that leaves out a specified color (red, blue, or green) while scanning, and a “color enhancement” effect that emphasizes a specified color.

**IMPORTANT**
The color drop-out setting is disabled when the scanning mode is set to [Color].

**Hint**
The OCR recognition rate is sometimes improved by deleting colored ruled lines and other objects with the color drop-out function.

**Copying Job Buttons**
You can copy the settings of a job button and register it as a new job button.
As an example, this section describes how to copy from the Shared Job Button to the My Job Button.

**Hint**
Use this function when you want to copy a job button between the Shared Job Button and My Job Button or register it as a different job button after changing some of the settings.

1. Select Shared Job Button for the [Job Button Type].
2. Select the job button you want to copy, and click [Copy].
3. Select My Job Button for the copy destination, and click [OK].

4. Confirm the copied job button.

- **Editing Jobs**
  You can edit the settings of a registered job by clicking [Edit] in the job button list. The settings that can be edited are identical to those in “Registering New Job Buttons” on p. 8-17.

- **Exporting and Importing Job Buttons**
  You can back up your job button data as a settings file in DAT format, and import the backed up job button settings file to another ScanFront unit.

  **Hint**
  If you have multiple ScanFront units, you can use the same job buttons on all of them by importing the job button settings file registered on one ScanFront unit to the other units.

---

**Exporting from the Scanner**
You can save the job button settings file to a specified folder.

1. Click [Export from ScanFront 300].

2. Click [Save], specify a save location, and save the job button settings file.

**Importing to the Scanner**
You can import a previously exported job button settings file to the scanner.

1. Click [Import to ScanFront 300].

2. Specify a previously exported job button settings file.

3. Select a processing method for importing the job button settings file.
   - **Replaces the whole data**: Deletes all currently registered job buttons and overwrites them with the imported job buttons.
   - **Appends data**: Adds the imported job buttons to the currently registered job buttons.
4. Click [Execute].
   Confirm the message that appears, and click [OK] to import the data.

Hint
When importing is completed, the following message appears.
Click [OK] to return to Job Button Settings and confirm the imported job button.
1. Routine Cleaning ............................................. 9-2
   Cleaning the Scanner Unit ..................................9-2
   Cleaning the Touch Panel .................................9-2
   Cleaning the Fingerprint Sensor
   (ScanFront 300P) ............................................9-2
   Cleaning the Scanning Glass and Rollers .............9-3
   Cleaning the Retard Roller ...............................9-5
   Cleaning the Feed Roller ................................9-6
2. Replacing the Rollers and Document
   Holding Guide ..............................................9-8
   Exchange Roller Kit .......................................9-8
   Replacement Method .........................................9-8
   Checking the Page Count and Resetting
   the Counter ..................................................9-9
1. **Routine Cleaning**

Clean the scanner on a regular basis, as described below, to maintain scanning performance.

**CAUTION**
- When cleaning the scanner, do not spray water or detergent directly on the scanner. Doing so may damage precision mechanisms, such as the light source.
- To clean the fingerprint sensor, use a dry commercially available cotton swab or a dry cloth to wipe off any dirt. If a cloth containing water or another liquid is used, the scanner may malfunction as a result of liquid getting inside the scanner.
- Never use thinner, alcohol, or other organic solvents to clean the touch panel. Such solvents may deform, discolor, or melt the touch panel, thus causing a malfunction.

**Cleaning the Scanner Unit**

To clean the surface of the scanner unit, use a cloth slightly dampened with water and well wrung out, to remove any dirt, and then use a clean, dry cloth to wipe the scanner.

**Cleaning the Touch Panel**

When cleaning the touch panel, use a soft, dry cloth to gently wipe the surface of the panel without applying pressure.

**Cleaning the Fingerprint Sensor (ScanFront 300P)**

To clean the fingerprint sensor, use a soft, dry cloth to wipe off any dirt.

**IMPORTANT**

The portion of the sensor where the fingers touch during fingerprint authentication can get particularly dirty. A dirty sensor may cause fingerprint authentication errors. Clean the sensor and its surrounding area regularly, regardless of how dirty they are.
Cleaning the Scanning Glass and Rollers

If scanned images contain streaks or scanned documents become dirty, the scanning glass and rollers inside the scanner may be dirty. Use the procedure below to clean them on a regular basis.

1. Pull the lock lever toward you and then fully open the panel unit.

   ![Lock lever](image)

   **CAUTION**
   The open/close movement of the panel unit is linked to the up/down movement of the document eject tray. Do not press on the document eject tray when you open the panel unit.

2. Use a commercially available air blower to remove any dust and paper particles that have accumulated inside the scanner.

3. Use a clean, dry cloth to wipe any dirt off the scanning glass.

   ![Scanning Glass](image)

   **Hint**
   There is one scanning glass for the front side of documents, and another for the back side. Wipe both of them clean.

   **CAUTION**
   Do not spray water or detergent directly on the scanner. Doing so may damage precision mechanisms, such as the light source.

   **IMPORTANT**
   Scratches on the scanning glass may cause streaks on scanned images, as well as feeding errors. If there are scratches on a scanning glass, contact your local authorized Canon dealer.
4. Remove any dirt from the rollers using a cloth that has been soaked in water and thoroughly wrung out.

![Image of rollers]

Clean the rollers while rotating them
Clean the visible portions

**IMPORTANT**
Rotate the rollers on the panel unit side while cleaning them. Do not rotate the rollers on the opposite side, and remove dirt on the visible portions only. Forcefully rotating the rollers on this side may cause feed errors.

5. Remove any dirt from the document holding guide using a cloth that has been soaked in water and thoroughly wrung out.

![Image of document holding guide]

**IMPORTANT**
After you remove the retard roller and feed roller and finish cleaning them, make sure to reattach them to the scanner.

6. Remove the retard roller and feed roller, and remove any dirt from them.
See “Cleaning the Retard Roller” on p. 9-5.
See “Cleaning the Feed Roller” on p. 9-6.

![Image of retard roller and feed roller]

**IMPORTANT**
After you remove the retard roller and feed roller and finish cleaning them, make sure to reattach them to the scanner.

7. Gently close the panel unit. Press on both sides of the unit until you hear a click, which indicates the unit is locked.

![Image of panel unit]

8. Gently close the document eject tray.
Cleaning the Retard Roller

Use the procedure below to remove and attach the retard roller during cleaning or replacement.

**CAUTION**

Do not use excessive force when removing or attaching the retard roller. Doing so may cause the roller to become deformed, resulting in feed errors.

1. Open the roller cover.

2. Lift up the roller lock lever ①, and slide it in the direction of the arrow ②.

3. Move the retard roller in the direction of the arrow ①, and then remove it from the shaft ②.

4. Remove any dirt from the roller using a cloth that has been soaked in water and thoroughly wrung out.

5. Place the roller in the roller compartment inside the roller cover, and then align the notch in the roller with the shaft of the scanner.
6. Slide the roller lock lever in the direction of the arrow, and then insert it into the hole of the retard roller.

7. Lower the lever to lock the shaft of the retard roller into position.

8. Close the roller cover. Make sure that you hear a click, which indicates the cover has returned to its original position.

Cleaning the Feed Roller

Use the procedure below to remove and attach the feed roller during cleaning or replacement.

CAUTION
Do not use excessive force when removing or attaching the feed roller. Doing so may cause the roller to become deformed, resulting in feed errors.

1. Open the roller cover.

2. Lift up the roller lock lever ①, and slide it in the direction of the arrow ②.
3. Move the feed roller in the direction of the arrow ①, and then remove it from the shaft ②.

4. Remove any dirt from the roller using a cloth that has been soaked in water and thoroughly wrung out.

5. Align the notch in the shaft of the roller with the shaft of the scanner, and place the feed roller into position.

6. Move the roller lock lever in the direction of the arrow, and then insert it into the hole in the feed roller.

7. Lower the roller lock lever to lock the feed roller into position.

8. Close the roller cover. Make sure that you hear a click, which indicates the cover has returned to its original position.
2. Replacing the Rollers and Document Holding Guide

When the rollers start to wear out, document feed errors such as paper jams are more likely to occur. If document feed errors continue to occur even after cleaning the rollers, purchase an Exchange Roller Kit, and replace the rollers (feed roller and retard roller) and their covers (feed roller cover and retard roller cover), and the document holding guide.

- Exchange Roller Kit
  The Exchange Roller Kit is a kit consisting of replacements for the feed roller, retard roller, and document holding guide. For details, contact your local authorized Canon dealer or service representative.
  Product name: Exchange Roller Kit
  Product code: 4593B001AA

- IMPORTANT
  - Rollers and their covers, and the document holding guide are consumable parts. When the total number of pages scanned with the rollers reaches 100,000 pages, purchase an Exchange Roller Kit and replace the parts. (See “Checking the Page Count and Resetting the Counter” on p. 9-9.)
  - When the rollers start to wear out, problems such as paper jams and improper document feeding become more likely to occur. If this happens, replace the rollers regardless of the page count.
  - Make sure to reset the roller counter after replacing the rollers.

- Replacement Method
  For details on how to replace the feed roller and retard roller, see p. 9-5 and p. 9-6.
  **Replacing the Retard Roller Cover and Document Holding Guide**
  1. Open the roller cover, and remove the document holding guide by sliding it up.
2. Open the retard roller cover, and pull it out straight.

3. Hook the new document holding guide (four hooks) onto the roller cover, and slide it down to set it in place.

4. Insert the retard roller cover straight with the document holding guide attached.

Replacing the Feed Roller Cover

1. Open the feed roller cover, and pull it out straight.

2. Insert the new feed roller cover straight.

Checking the Page Count and Resetting the Counter

Check the page count on the Roller Counter Reset screen of the Administrator Setting screen.

⚠️ IMPORTANT

The roller counter counts the number of pages fed by replaced rollers. Make sure to reset the counter when you replace the rollers since this enables a warning telling you when the page number limit has nearly been reached and the roller needs to be replaced.
1. Log in to the Administrator setting screen.

2. Press the [Roller counter reset] button to display the [Roller counter reset] screen.

3. Press the [Reset] button to reset the counter.

Total pages scanned
This counter is for the total number of document pages fed by the scanner.

Pages scanned from the previous roller change
This counter is for the number of document pages fed by the scanner since the roller was replaced and the counter was reset.
Chapter 10  Troubleshooting

1. Troubleshooting .................................................. 10-2
2. Error Messages (ScanFront) ............................... 10-6
3. Error Messages (Web Menu) ............................. 10-9
4. Adjusting the Touch Panel ................................. 10-11
5. Initializing ScanFront ....................................... 10-13
## 1. Troubleshooting

If any of the following problems occurs, solve the problem as described in the corresponding solution.

<table>
<thead>
<tr>
<th>Network, Web Menu</th>
<th>Cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot use an LDAP address book (certain users only)</td>
<td>The administrator has set user function restrictions. See “Restricting User Functions” on p. 6-10.</td>
<td>Contact the administrator of the ScanFront.</td>
</tr>
<tr>
<td>Cannot update the settings in the Web menu</td>
<td>The ScanFront is being used or a user has not logged out.</td>
<td>Check the ScanFront status and then try again.</td>
</tr>
<tr>
<td>Cannot access the Web menu</td>
<td>The IP address assigned from the DHCP server has changed.</td>
<td>Contact the administrator of the ScanFront, and check the IP address assigned to the ScanFront.</td>
</tr>
<tr>
<td>Cannot create a new folder (shared folder/FTP server)</td>
<td>Permission to write to the shared folder has not been granted for the user name and password that were entered.</td>
<td>Contact the administrator of the shared folder.</td>
</tr>
<tr>
<td>Specifying a mail address as the address and then starting scanning results in an error</td>
<td>The mail server settings have not been registered, or have been deleted.</td>
<td>Contact the administrator of the ScanFront.</td>
</tr>
<tr>
<td>Cannot edit the address book/job buttons (certain users only)</td>
<td>The administrator has set user function restrictions. See “Restriction to Edit” on p. 6-11.</td>
<td>Contact the administrator of the ScanFront.</td>
</tr>
<tr>
<td>Can only select certain destinations. For example, can only select shared folders (certain users only)</td>
<td>The administrator has set user function restrictions.</td>
<td>Contact the administrator of the ScanFront.</td>
</tr>
<tr>
<td>Cannot connect to an FTP server that can be accessed from outside the company</td>
<td>The scanner cannot connect to an FTP server that requires firewall settings to be configured.</td>
<td>Use an FTP server that does not require firewall settings to be configured.</td>
</tr>
<tr>
<td>The wrong send time is displayed for an e-mail message received at the destination</td>
<td>(1) The date and time settings are incorrect. (2) The time zone is set to a different country.</td>
<td>Contact the administrator, and check the “Language/Timezone” setting. (See p. 6-30.)</td>
</tr>
<tr>
<td>Issue</td>
<td>Cause</td>
<td>Solution</td>
</tr>
<tr>
<td>-------</td>
<td>-------</td>
<td>----------</td>
</tr>
<tr>
<td>The sender's address is not displayed at the destination of an e-mail message</td>
<td>The e-mail addresses of the user and administrator have not been registered. (See p. 6-7 and p. 6-32.)</td>
<td>Contact the administrator, and register the e-mail addresses.</td>
</tr>
<tr>
<td>Cannot connect to the network (IP address conflict problem)</td>
<td>The IP address that was set is already being used by another device.</td>
<td>Contact the system administrator of the network, and change the IP address setting.</td>
</tr>
<tr>
<td>Cannot connect to the network (LAN cable connection problem)</td>
<td>The LAN cable is not connected properly.</td>
<td>Check the connections of the LAN cable.</td>
</tr>
<tr>
<td>Cannot connect to the network (device name conflict problem)</td>
<td>The device name that was set is already being used by another device.</td>
<td>Contact the system administrator of the network, and change the device name setting. When you install two or more ScanFront scanners, take care to ensure duplicate device names are not set.</td>
</tr>
<tr>
<td>Cannot delete a folder</td>
<td>Data has been saved to the folder.</td>
<td>Contact the administrator of the shared folder.</td>
</tr>
<tr>
<td>Cause</td>
<td>Permission to change the shared folder has not been granted for the user name and password that were entered.</td>
<td>Contact the administrator of the shared folder.</td>
</tr>
<tr>
<td>Cannot scan from the Home screen (certain users only)</td>
<td>The administrator has set user function restrictions. See “Use only Job Buttons” on p. 6-10.</td>

<td>Log in failed. A version Password may be changed.</td>
<td>User password was changed on the authentication server while server authentication and fingerprint authentication are both used to log in.</td>
<td>Without using fingerprint authentication, enter your user name and changed password to log in, and then re-register your fingerprints.</td>
</tr>
<tr>
<td>Log in failed. Authentication server is not found.</td>
<td>The user specified when logging in does not exist in the authentication server.</td>
<td>Make sure you correctly enter your user name and password. Contact the administrator of the ScanFront if this problem persists.</td>
</tr>
</tbody>
</table>
**Not enough memory to execute scanner settings**

ScanFront uses internal memory to scan documents. This memory usage differs according to conditions such as document size and resolution. When setting scanning conditions that require a large amount of memory capacity, an error message saying “Not enough memory to execute current scanner settings” may appear and you may not be able to scan the document.

The following table details scanning conditions that may cause ScanFront to run out of memory. If scanning cannot be executed due to insufficient memory, refer to this table to reset scanning conditions.

4. Adjusting the Touch Panel

If there is no response when you press a button on the touch panel but there is a response when you press somewhere other than a button, the panel needs to be adjusted. Use the procedure below to adjust the touch panel.

**IMPORTANT**
- A commercially available touch-panel pen (or the equivalent) is required to adjust the touch panel. Provide a touch-panel pen before attempting to adjust the touch panel.
- Adjustment of the touch panel involves one cycle of tapping five places, but adjustment may sometimes not end after one cycle if any of the tapped places was not a target.
- To cancel touch panel adjustment, connect a USB keyboard and press the [Esc] key.

1. Log in to the Administrator setting screen.

2. Press the [Touch panel adjustment] button to display the adjustment screen of the touch panel.

3. Press the center of the displayed targets (+) with the touch-panel pen in the order of 1 to 5.

4. After you finish adjustment, tap the panel to end touch panel adjustment.
**IMPORTANT**

If you do not tap the panel within a period of 30 seconds after adjustment of the touch panel ends, the adjustment values will not take effect and the touch panel will return to the state prior to adjustment.
5. Initializing ScanFront

Initialize the ScanFront to protect user information when you submit the ScanFront for repairs or when you want to delete the user information because, for example, you are changing the operating location. This initializes all the information registered to the ScanFront, including user information, address books, and job buttons.

**IMPORTANT**
Initializing the ScanFront deletes all registered information. Always back up the data prior to initialization.

1. Log in to the Administrator setting screen.
2. Press the [Format ScanFront 300] button.
3. Confirm the message, and then press [Yes].
4. Confirm the message, and then press [Yes].
5. Confirm the message and press [Yes] to perform initialization, and the scanner will turn OFF.
6. Turn the scanner ON, and set up the scanner again.
Chapter 11   Appendices

1. Specifications................................................. 11-2
   Unit Specifications...........................................11-2
   Network Specifications......................................11-3

1. Specifications

- **Unit Specifications**
  - **Type**
    Pass-through desktop scanner with network compatibility
  - **Operation Panel**
    8.4" TFT-LCD touch panel
    SVGA (800 x 600 dot) display
  - **Scanning Document Specifications**
    Width: 2" to 8 1/2" (50.8 mm to 216 mm)
    Length: 2 1/8" to 14" (53.9 mm to 355.6 mm)
    (up to 39.3" (1,000 mm) in Long Document mode)
    Thickness:
    (Feeding with Page Separation ON)
    14 to 57 lb bond (52 g/m² to 209 g/m²)
    (Feeding with Page Separation OFF)
    11 to 57 lb bond (40 g/m² to 209 g/m²)
  - **Scanning Card Specifications**
    Size: 2.12" × 3.37" (53.9 × 85.5 mm)
    Card Thickness: Not more than 0.0299" (0.76 mm)
  - **Document Feeding Method**
    Automatic (feeding with Page Separation ON)
    Manual (feeding with Page Separation OFF)
  - **Loadable Sheets**
    Legal/A4 Size or Smaller:
    50 high-quality sheets, or stacks no thicker than 5 mm
    (including curls)
    Sizes Larger than Legal/A4:
    30 high-quality sheets, or stacks no thicker than 3 mm
    (including curls)
  - **Scanning Sensor**
    Contact image sensor
  - **Light Source**
    LED
  - **Scanning Side**
    Simplex/Duplex

- **Scanning Modes**
  - Black and White, Error Diffusion, Text Enhance, Gray, Color, and Auto Color Detection

- **Scanning Resolution (Primary Scan Lines x Secondary Scan Lines)**
  - 100 × 100 dpi / 150 × 150 dpi / 200 × 200 dpi
  - 300 × 300 dpi / 400 × 400 dpi / 600 × 600 dpi

- **Scanning Speed (For A4 size page)**

Network Specifications

Network
Microsoft Windows Network
Protocol
TCP/IP
IP Address
Obtained automatically (DHCP supported) or fixed address
Other
Active Directory (NTLM authentication) and OpenLDAP (simple authentication) supported

Transfer Destinations
E-mail
Fax (via Internet fax service)
FTP Server
Shared Folder
USB Memory
Printer

AC Adapter
Model
MG1-4314
Input
AC100-240V 50/60 Hz 83VA-108VA
Output
DC24V 2.2A
Weight
Approximately 0.71 lb (0.32 kg) (including power cord)

Specifications are subject to change without notice.
Consumable Parts

Exchange Roller Kit (product code: 4593B001AA)
Replacement kit for the rollers (feed roller and retard roller) and their covers (feed roller cover and retard roller cover), and the document holding guide. (See “Replacing the Rollers and Document Holding Guide” on p. 9-8.)

IMPORTANT

- Rollers are consumable parts. When the rollers start to wear out, problems such as paper jams and improper document feeding become more likely to occur. If this happens, replace the rollers regardless of the page count.
- For information about the Exchange Roller Kit, contact your local authorized Canon dealer or service representative.
