Information for your safety and comfort

Safety instructions

Read these instructions carefully. Keep this document for future reference. Follow all warnings and instructions marked on the product.

Turning the product off before cleaning

Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

Warnings

• Do not use this product near water.
• Do not place this product on an unstable cart, stand or table. If the product falls, it could be seriously damaged.
• Slots and openings are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug or other similar surface. This product should never be placed near or over a radiator or heat register, or in a built-in installation unless proper ventilation is provided.
• Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind onto or into the product.
• To avoid damage of internal components and to prevent battery leakage, do not place the product on a vibrating surface.

Using electrical power

• This product should be operated from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
• Do not allow anything to rest on the power cord. Do not locate this product where people will walk on the cord.
• If an extension cord is used with this product, make sure that the total ampere rating of the equipment plugged into the extension cord does not exceed the extension cord ampere rating. Also, make sure that the total rating of all products plugged into the wall outlet does not exceed the fuse rating.
• Do not overload a power outlet, strip or receptacle by plugging in too many devices. The overall system load must not exceed 80% of the branch
circuit rating. If power strips are used, the load should not exceed 80% of the power strip’s input rating.

- This product’s AC adapter is equipped with a three-wire grounded plug. The plug only fits in a grounded power outlet. Make sure the power outlet is properly grounded before inserting the AC adapter plug. Do not insert the plug into a non-grounded power outlet. Contact your electrician for details.

**Warning!** The grounding pin is a safety feature. Using a power outlet that is not properly grounded may result in electric shock and/or injury.

**Note:** The grounding pin also provides good protection from unexpected noise produced by other nearby electrical devices that may interfere with the performance of this product.

- Use the product only with the supplied power supply cord set. If you need to replace the power cord set, make sure that the new power cord meets the following requirements: detachable type, UL listed/CSA certified, type SPT-2, rated 7 A 125 V minimum, VDE approved or its equivalent, 4.6 meters (15 feet) maximum length.

**Product servicing**

Do not attempt to service this product yourself, as opening or removing covers may expose you to dangerous voltage points or other risks. Refer all servicing to qualified service personnel.

Unplug this product from the wall outlet and refer servicing to qualified service personnel when:

- the power cord or plug is damaged, cut or frayed
- liquid was spilled into the product
- the product was exposed to rain or water
- the product has been dropped or the case has been damaged
- the product exhibits a distinct change in performance, indicating a need for service
- the product does not operate normally after following the operating instructions

**Note:** Adjust only those controls that are covered by the operating instructions, since improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal condition.
Replacing the battery pack

The notebook uses lithium batteries. Replace the battery with the same type as that which came bundled with your product. Use of another battery may present a risk of fire or explosion.

⚠️ Warning! Batteries may explode if not handled properly. Do not disassemble or dispose of them in fire. Keep them away from children. Follow local regulations when disposing of used batteries.

Telephone line safety

- Disconnect all telephone lines from the equipment when not in use and/or before servicing.
- To avoid the remote risk of electric shock from lightning, do not connect the telephone line to this equipment during lightning or thunderstorms.

⚠️ Warning! For safety reasons, do not use non-compliant parts when adding or changing components. Consult your reseller for purchase options.

Disposal instructions

Do not throw this electronic device into the trash when discarding. To minimize pollution and ensure utmost protection of the global environment, please recycle. For more information on the Waste from Electrical and Electronics Equipment (WEEE) regulations, visit http://global.acer.com/about/sustainability.htm.

Mercury advisory

For projectors or electronic products containing an LCD/CRT monitor or display: Lamp(s) inside this product contain mercury and must be recycled or disposed of according to local, state or federal laws. For more information, contact the
ENERGY STAR is a government program (public/private partnership) that gives people the power to protect the environment in a cost effective way and without sacrificing quality or product features. Products that earn the ENERGY STAR prevent greenhouse gas emissions by meeting strict energy efficiency guidelines set by the US Environmental Protection Agency (EPA) and the US Department of Energy (DOE). In the average home, 75% of all electricity used to power home electronics is consumed while the products are turned off. ENERGY STAR qualified home electronic products in the off position use up to 50% less energy than conventional equipment. More information refers to http://www.energystar.gov and http://www.energystar.gov/powermangement.

As an ENERGY STAR partner, Acer Inc. has determined that this product meets the ENERGY STAR guidelines for energy efficiency.

This product has been shipped enabled for power management:

- Activate display' Sleep mode within 15 minutes of user inactivity.
- Activate computer’s Sleep mode within 30 minutes of user inactivity.
- Wake the computer from Sleep mode by pushing power button.

More power management settings can be done through Acer ePower Management.

**Tips and information for comfortable use**

Computer users may complain of eyestrain and headaches after prolonged use. Users are also at risk of physical injury after long hours of working in front of a computer. Long work periods, bad posture, poor work habits, stress, inadequate working conditions, personal health and other factors greatly increase the risk of physical injury.

Incorrect computer usage may lead to carpal tunnel syndrome, tendonitis, tenosynovitis or other musculoskeletal disorders. The following symptoms may appear in the hands, wrists, arms, shoulders, neck or back:

- numbness, or a burning or tingling sensation
- aching, soreness or tenderness
- pain, swelling or throbbing
- stiffness or tightness
- coldness or weakness

If you have these symptoms, or any other recurring or persistent discomfort and/or pain related to computer use, consult a physician immediately and inform your company's health and safety department.

The following section provides tips for more comfortable computer use.

Finding your comfort zone

Find your comfort zone by adjusting the viewing angle of the monitor, using a footrest, or raising your sitting height to achieve maximum comfort. Observe the following tips:

- refrain from staying too long in one fixed posture
- avoid slouching forward and/or leaning backward
- stand up and walk around regularly to remove the strain on your leg muscles
- take short rests to relax your neck and shoulders
- avoid tensing your muscles or shrugging your shoulders
- install the external display, keyboard and mouse properly and within comfortable reach
- if you view your monitor more than your documents, place the display at the center of your desk to minimize neck strain

Taking care of your vision

Long viewing hours, wearing incorrect glasses or contact lenses, glare, excessive room lighting, poorly focused screens, very small typefaces and low-contrast displays could stress your eyes. The following sections provide suggestions on how to reduce eyestrain.

Eyes
- Rest your eyes frequently.
- Give your eyes regular breaks by looking away from the monitor and focusing on a distant point.
- Blink frequently to keep your eyes from drying out.

Display
- Keep your display clean.
- Keep your head at a higher level than the top edge of the display so your eyes point downward when looking at the middle of the display.
- Adjust the display brightness and/or contrast to a comfortable level for enhanced text readability and graphics clarity.
- Eliminate glare and reflections by:
• placing your display in such a way that the side faces the window or any light source
• minimizing room light by using drapes, shades or blinds
• using a task light
• changing the display's viewing angle
• using a glare-reduction filter
• using a display visor, such as a piece of cardboard extended from the display's top front edge
• Avoid adjusting your display to an awkward viewing angle.
• Avoid looking at bright light sources, such as open windows, for extended periods of time.

Developing good work habits
Develop the following work habits to make your computer use more relaxing and productive:
• Take short breaks regularly and often.
• Perform some stretching exercises.
• Breathe fresh air as often as possible.
• Exercise regularly and maintain a healthy body.

Warning! We do not recommend using the computer on a couch or bed. If this is unavoidable, work for only short periods, take breaks regularly, and do some stretching exercises.

Note: For more information, please refer to "Regulations and safety notices" on page 81 in the AcerSystem User's Guide.
First things first

Thank you for choosing the Ferrari 1000 of notebook computers to meet your mobile computing needs.

Your guides

To help you use your Ferrari notebook, we have designed a set of guides:

- A handy **Quick Guide** is useful for quick glances at functional key combinations.

- The printed **User's Guide** introduces you to the basic features and functions of your new computer. For more on how your computer can help you to be more productive, please refer to the **AcerSystem User's Guide**. This guide contains detailed information on such subjects as system utilities, data recovery, expansion options and troubleshooting. In addition it contains warranty information and the general regulations and safety notices for your notebook. It is available in Portable Document Format (PDF) and comes preloaded on your notebook. Follow these steps to access it:
  1. Click on *Start, All Programs, AcerSystem*.
  2. Click on *AcerSystem User's Guide*.

  **Note:** Viewing the file requires Adobe Reader. If Adobe Reader is not installed on your computer, clicking on *AcerSystem User's Guide* will run the Adobe Reader setup program first. Follow the instructions on the screen to complete the installation. For instructions on how to use Adobe Reader, access the *Help and Support* menu.

Basic care and tips for using your computer

Turning your computer on and off

To turn on the computer, simply press the power button below the LCD screen. See "*System* on page 13" for the location of the power button.
To turn the power off, do any of the following:

- Use the Windows shutdown command
  Click on **Start, Turn Off Computer**, then click on **Turn Off**.
- Use the power button

You can also put the computer in sleep mode by pressing the sleep hotkey `<Fn>` + `<F4>`.

---

*Note:* If you cannot power off the computer normally, press and hold the power button for more than four seconds to shut down the computer. If you turn off the computer and want to turn it on again, wait at least two seconds before powering up.

### Taking care of your computer

Your computer will serve you well if you take care of it.

- Do not expose the computer to direct sunlight. Do not place it near sources of heat, such as a radiator.
- Do not expose the computer to temperatures below 0 ºC (32 ºF) or above 50 ºC (122 ºF).
- Do not subject the computer to magnetic fields.
- Do not expose the computer to rain or moisture.
- Do not spill water or any liquid on the computer.
- Do not subject the computer to heavy shock or vibration.
- Do not expose the computer to dust or dirt.
- Never place objects on top of the computer.
- Do not slam the computer display when you close it.
- Never place the computer on uneven surfaces.

### Taking care of your AC adapter

Here are some ways to take care of your AC adapter:

- Do not connect the adapter to any other device.
- Do not step on the power cord or place heavy objects on top of it. Carefully route the power cord and any cables away from foot traffic.
- When unplugging the power cord, do not pull on the cord itself but pull on the plug.
- The total ampere ratings of the equipment plugged in should not exceed the ampere rating of the cord if you are using an extension cord. Also, the total current rating of all equipment plugged into a single wall outlet should not exceed the fuse rating.
Taking care of your battery pack

Here are some ways to take care of your battery pack:

- Use only batteries of the same kind as replacements. Turn the power off before removing or replacing batteries.
- Do not tamper with batteries. Keep them away from children.
- Dispose of used batteries according to local regulations. Recycle if possible.

Cleaning and servicing

When cleaning the computer, follow these steps:

1. Turn off the computer and remove the battery pack.
2. Disconnect the AC adapter.
3. Use Acer cleaning cloth included in the box. For the best usage, please refer to the instructions below:
   - The fine micro-fiber surface (fine surface that bears an imprint) is designed for fine particle removal and dust cleaning.
   - The interlacing knitted surface (back of the imprint) is designed to clean fingerprints, grease and stubborn stains.
   - Clean the cloth after use to remove particles and avoid future scratching. (do not bleach or wash with soft agents)

If either of the following occurs:

- the computer has been dropped or the body has been damaged;
- the computer does not operate normally

please refer to *Frequently asked questions* on page 58.

  Troubleshooting tips 79
Acer Empowering Technology

Acer’s innovative Empowering Technology toolbar makes it easy for you to access frequently used functions and manage your new Acer computer. Displayed by default in the upper-right corner of your screen, it features the following handy utilities:

- **Acer ePower Management** extends battery power via versatile usage profiles.
- **Acer ePresentation Management** connects to a projector and adjusts display settings conveniently.
- **Acer eDataSecurity Management** protects data with passwords and advanced encryption algorithms (for selected models).
- **Acer eRecovery Management** backs up and recovers data flexibly, reliably and completely.
- **Acer eSettings Management** accesses system information and adjusts settings easily.
- **Acer ePerformance Management** improves system performance by optimizing disk space, memory and registry settings.

For more information, right click on the Empowering Technology toolbar, then select the Help or Tutorial function.

Empowering Technology password

Before using Acer eRecovery Management, you must initialize the Empowering Technology password. Right-click on the Empowering Technology toolbar and select “Password Setup” to do so. If you do not initialize the Empowering Technology password, you will be prompted to do so when running Acer eRecovery Management for the first time.

If you lose your password, there is no method to reset it except by reformatting your notebook or taking your notebook to an Acer Customer Service Center. Be sure to remember or write down your password.
Acer ePower Management

Acer ePower Management features a straightforward user interface. To launch it, select Acer ePower Management from the Empowering Technology interface.

AC mode (Adapter mode)

The default setting is "Maximum Performance." You can adjust CPU speed, LCD brightness and other settings, or click on buttons to turn the following functions on/off: Wireless LAN, Bluetooth, CardBus, FireWire(1394), Wired LAN and Optical Device if supported.

DC mode (Battery mode)

There are four pre-defined profiles — Entertainment, Presentation, Word Processing, and Battery Life. You can also define up to three of your own. When your system enters battery mode for the first time, the "Word Processing" profile will be selected by default. You can switch to a different profile by choosing it from the list. When entering battery mode on subsequent occasions, Acer ePower Management will default to the last profile selected.

To create a new power profile:

1. Change power settings as desired.
2. Click "Save as ..." to save to a new power profile.
3. Name the newly created profile.
4. Select whether this profile is for Adapter or Battery mode, then click OK.
5. The new profile will appear in the profile list.
Battery status

For real-time battery life estimates based on current usage, refer to the panel in the upper half of the window.

For additional options, click "Settings" to:

- Set alarms.
- Re-load factory defaults.
- Select what actions to be taken when the cover is closed or the power button is pressed.
- Set passwords for accessing the system after Hibernation or Standby.
Empowering Technology

Acer ePower Management

**Action for Low Battery**

- **Alarm Level**: 3%
- **Notification Method**: Message
- **Action after Alarm**: Hibernate
- **Run Program**: Disable

Enable Action for Low Battery

Enable Action for Critical Battery

Configure
Acer ePresentation Management

Acer ePresentation Management lets you project your computer's display to an external device or projector using the hot key: Fn + F5. If auto-detection hardware is implemented in the system and the external display supports it, your system display will be automatically switched out when an external display is connected to the system. For projectors and external devices that are not auto-detected, launch Acer ePresentation Management to choose an appropriate display setting.

If the restored resolution is not correct after disconnecting a projector, or you need to use an external resolution that is not supported by Acer ePresentation Management, adjust your display settings using Display Properties or the utility provided by the graphics vendor.
Acer eDataSecurity Management
(for selected models)

Acer eDataSecurity Management is a handy file encryption utility that protects your files from being accessed by unauthorized persons. It is conveniently integrated with Windows Explorer as a shell extension for quick and easy data encryption/decryption and also supports on-the-fly file encryption for MSN Messenger and Microsoft Outlook.

The Acer eDataSecurity Management setup wizard will prompt you for a supervisor password and default encryption. This encryption will be used to encrypt files by default, or you can choose to enter your own file-specific password when encrypting a file.

**Note:** The password used to encrypt a file is the unique key that the system needs to decrypt it. If you lose the password, the supervisor password is the only other key capable of decrypting the file. If you lose both passwords, there will be no way to decrypt your encrypted file! **Be sure to safeguard all related passwords!**
Note: Acer eDataSecurity supports Windows® XP Professional x64 Edition only.
Acer eRecovery Management

Acer eRecovery Management is a powerful utility that does away with the need for recovery disks provided by the manufacturer. The Acer eRecovery Management utility occupies space in a hidden partition on your system's hard drive. By default, user-created backups are stored on the D:\ drive.

Acer eRecovery Management provides you with:

- Password protection.
- Recovery of applications and drivers.
- Image/data backup:
  - Back up to HDD (set recovery point).
  - Back up to CD/DVD.
- Image/data recovery tools:
  - Recover from a hidden partition (factory defaults).
  - Recover from the HDD (most recent user-defined recovery point).
  - Recover from CD/DVD.
For more information, please refer to "Acer eRecovery Management" on page 76 in the AcerSystem User's Guide.

Note: If your computer did not come with a Recovery CD or System CD, please use Acer eRecovery Management’s "System backup to optical disk" feature to burn a backup image to CD or DVD. To ensure the best results when recovering your system using a CD or Acer eRecovery Management, detach all peripherals (except the external Acer ODD, if your computer has one), including your Acer ezDock.
Acer eSettings Management

Acer eSettings Management allows you to inspect hardware specifications, change BIOS passwords or other Windows settings, and to monitor the system health status.

Acer eSettings Management also:

- Provides a simple graphical user interface for navigation.
- Displays general system status and advanced monitoring for power users on Acer computer.
Acer ePerformance Management

Acer ePerformance Management is a system optimization tool that boosts the performance of your Acer computer. It provides an express optimization method to release unused memory and disk space quickly. The user can also enable advanced options for full control over the following options:

- Memory optimization — releases unused memory and check usage.
- Disk optimization — removes unneeded items and files.
- Speed optimization — improves the usability and performance of your Windows XP system.
A Ferrari tour

After setting up your computer, let us show you around your new Ferrari computer.

# Specifications

## Operating system
- Genuine Windows® XP Home Edition (Service Pack 2)
- Genuine Windows® XP Professional (Service Pack 2)
- Genuine Windows® XP Professional x64 Edition
- Genuine Windows® XP Media Center Edition 2005 (Rollup 2)

**Note:** Windows® Vista™ Capable PCs come with Windows® XP installed, and can be upgraded to Windows® Vista™. For more information on Windows® Vista™ and how to upgrade, go to: Microsoft.com/windowsvista.

## Platform
- AMD Turion™ 64 X2 TL-52/TL-56/TL-60 (1.6/1.8/2.0 GHz, 512 KB L2 cache) or TL-50 (1.6 GHz, 512 KB L2 cache) featuring:
  - Dual-core processing
  - Simultaneous 32- and 64-bit Windows®-compatible support
  - AMD PowerNow!™, AMD HyperTransport™ and Enhanced Virus Protection technology
- ATI RADEON® XPRESS 1150 Chipset
- WLAN: integrated Acer InviLink™ Nplify™ 802.11, supporting Acer SignalUp™ wireless technology

## System memory
Up to 2 GB of DDR2 667 MHz system memory, upgradeable to 4 GB using two soDIMM modules (dual-channel support)
| Display and graphics               | • 12.1” WXGA 200-nit Acer CrystalBrite™ high-brightness TFT LCD, 1280 x 800 pixel resolution, 16:10 viewing ratio, supporting simultaneous multi-window viewing on dual displays via Acer GridVista™  
|                                  | • 12.1” WXGA 200-nit high-brightness TFT LCD, 1280 x 800 pixel resolution, 16:10 viewing ratio, supporting simultaneous multi-window viewing on dual displays via Acer GridVista™  
|                                  | • ATI RADEON® XPRESS 1150 integrated 3D graphics, with up to 512 MB of HyperMemory™ (up to 256 MB of dedicated GDDR2 VRAM, up to 256 MB of shared system memory) supporting ATI PowerPlay™ 5.0, Microsoft® DirectX® 9.0, PCI Express®  
|                                  | • Simultaneous LCD and CRT display, with LCD panel refresh rate at 70 Hz  
|                                  | • Up to 2048 x 1536 resolution via non-interlaced CRT display  
|                                  | • MPEG-2/DVD hardware-assisted capability |
| Storage subsystem                | • 100/120 /160 GB SATA hard disk drive  
|                                  | • External IEEE 1394 bus-powered optical drive:  
|                                  | • 8X Slot-load DVD-Super Multi double-layer  
|                                  | • HD DVD-ROM  
|                                  | • 5-in-1 card reader, supporting Memory Stick® (MS), Memory Stick PRO™ (MS PRO), MultiMediaCard (MMC), Secure Digital (SD) and xD-Picture Card™ (xD) |
| Dimensions and weight            | • 302.3 (W) x 221.28 (D) x 20.8/34.5 (H) mm (11.90 x 8.72 x 0.82/1.36 inches)  
|                                  | • 1.75 kg (3.85 lbs.) with 6-cell Li-ion battery pack  
|                                  | • 1.60 kg (3.52 lbs.) with 3-cell Li-ion battery pack |
| Power subsystem                  | • ACPI 2.0 CPU power management standard: supports Standby and Hibernation power-saving modes  
|                                  | • 57 W 4800 mAh (6-cell) Li-ion battery pack and 22 W 2000 mAh (3-cell) Li-ion battery pack  
|                                  | • Acer QuicCharge™ technology:  
|                                  | • 80% charge in 1 hour  
|                                  | • 2-hour rapid charge system-off  
|                                  | • 2.5-hour charge-in-use  
|                                  | • 65 W AC adapter |
## Input devices
- 84-/85-key Acer FineTouch™ keyboard
- Touchpad pointing device
- 12 function keys, four cursor keys, two Windows® keys, hotkey controls, embedded numeric keypad, international language support
- Four easy-launch buttons
- Two front-access switches: WLAN and Bluetooth® (two-way spring switch)

## Audio
- High-Definition audio support
- S/PDIF (Sony/Philips Digital Interface) support for digital speakers
- Audio system with two built-in speakers
- MS Sound compatible
- Built-in microphone

## Communication
- Acer Video Conference featuring Voice and Video over Internet Protocol (VVoIP) support via Acer OrbiCam and Acer Ferrari Bluetooth® VoIP phone
- Acer Orbicam 1.3 megapixel CMOS camera (LCD panel-mounted) featuring (for selected models):
  - 225-degree ergonomic rotation
  - Acer VisageOn technology
  - Acer PrimaLite technology
- WPAN: Bluetooth® 2.0+EDR (Enhanced Data Rate)
- LAN: gigabit Ethernet; Wake-on-LAN ready
- Modem: 56K ITU V.92 with PTT approval; Wake-on-Ring ready
- WLAN: Acer InviLink™ Nplify™, 802.11 a/b/g or 802.11b/g Wi-Fi CERTIFIED™ solution, supporting Acer SignalUp™ wireless technology

## I/O interface
- 124-pin Acer ezDock port
- PC Card slot (one Type II)
- 5-in-1 card reader (MS/MS PRO/MMC/SD/xD)
- Three USB 2.0 ports
- IEEE 1394 port (6-pin)
- Fast infrared (FIR) port
- External display (VGA) port
- Headphones/speaker/line-out jack with S/PDIF support
- Microphone-in jack
- Line-in jack
- Ethernet (RJ-45) port
- Modem (RJ-11) port
- DC-in jack for AC adapter

## Easy-launch buttons

There are several conveniently located easy-launch buttons. They are: mail, Web browser, Empowering Key `<e>` and one user-programmable button.

Press `<e>` to run the Acer Empowering Technology. Please see "Acer Empowering Technology" on page 1. The mail and Web browser buttons are pre-set to email and Internet programs, but can be reset by users. To set the Web browser, mail and programmable buttons, run the Acer Launch Manager. See "Launch Manager" on page 55.

Touchpad

The built-in touchpad is a pointing device that senses movement on its surface. This means the cursor responds as you move your finger across the surface of the touchpad. The central location on the palmrest provides optimum comfort and support.

Touchpad basics

The following items show you how to use the touchpad:

- Move your finger across the touchpad (2) to move the cursor.
- Press the left (1) and right buttons located beneath the touchpad to perform selection and execution functions. These two buttons are similar to the left and right buttons on a mouse. Tapping on the touchpad is the same as clicking the left button.
When using the touchpad, keep it — and your fingers — dry and clean. The touchpad is sensitive to finger movement; hence, the lighter the touch, the better the response. Tapping harder will not increase the touchpad’s responsiveness.
Using the keyboard

The keyboard has full-sized keys and an embedded numeric keypad, separate cursor, lock, Windows, function and special keys.

Lock keys and embedded numeric keypad

The keyboard has three lock keys which you can toggle on and off.

<table>
<thead>
<tr>
<th>Lock key</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Caps Lock</td>
<td>When Caps Lock is on, all alphabetic characters typed are in uppercase.</td>
</tr>
<tr>
<td>Num Lock &lt;Fn&gt; + &lt;F11&gt;</td>
<td>When Num Lock is on, the embedded keypad is in numeric mode. The keys function as a calculator (complete with the arithmetic operators +, -, *, and /). Use this mode when you need to do a lot of numeric data entry. A better solution would be to connect an external keypad.</td>
</tr>
<tr>
<td>Scroll Lock &lt;Fn&gt; + &lt;F12&gt;</td>
<td>When Scroll Lock is on, the screen moves one line up or down when you press the up or down arrow keys respectively. Scroll Lock does not work with some applications.</td>
</tr>
</tbody>
</table>

The embedded numeric keypad functions like a desktop numeric keypad. It is indicated by small characters located on the upper right corner of the keycaps.
To simplify the keyboard legend, cursor-control key symbols are not printed on the keys.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Hotkeys

The computer employs hotkeys or key combinations to access most of the computer's controls like screen brightness, volume output and the BIOS utility.
To activate hotkeys, press and hold the `<Fn>` key before pressing the other key in the hotkey combination.

<table>
<thead>
<tr>

<td>Increases the screen brightness.</td>
</tr>
<tr>
<td>&lt;Fn&gt; + ←</td>
<td></td>
<td>Brightness down</td>
<td>Decreases the screen brightness.</td>
</tr>
</tbody>
</table>

The Euro symbol

1. Open a text editor or word processor.
2. Hold <Alt Gr> and then press the <5> key at the upper-center of the keyboard.

Note: Some fonts and software do not support the Euro symbol. Please refer to www.microsoft.com/typography/faq/faq12.htm for more information.

The US dollar sign

1. Open a text editor or word processor.
2. Hold <Shift> and then press the <4> key at the upper-center of the keyboard.

Note: This function varies according to the language settings.
Using Acer Bluetooth optical mouse

Your Ferrari 1000 notebook computer comes with a Bluetooth optical mouse and two AA batteries.

Installation

1. On your computer, enable Bluetooth communication (see "Closed front view" on page 14) and open "My Bluetooth Places" by double-clicking on the Bluetooth icon.

2. Turn the Mouse upside down; make sure the power switch is ON. Press and hold the "Bluetooth connection/pairing" button for three seconds. The Mouse is now in pairing mode and is ready to connect to your computer.

3. From the menu bar, select "Bluetooth", and then "Bluetooth Setup Wizard".

4. Select "I want to find a specific Bluetooth device and configure how this computer will use its devices". Then click "Next".

5. From the drop-down menu, select "Show mice, keyboards and joysticks", and then click on the "Search Again" button.

6. The Acer mouse will be discovered. Click on the Acer mouse icon, and then click "Next".

7. The services that are available from the device will be listed. Select "Bluetooth Mouse" and click "Finish".

8. Wait while the Mouse is installed. This may take several seconds.

9. Your mouse is now connected. Move your Mouse to verify the connection.

Usage

Use the Bluetooth mouse as you would a traditional mouse. For optimal performance, use a mouse pad. Using the Bluetooth mouse on a transparent or reflective surface will inhibit the ability of the optical sensor to track the cursor.
LED indicator

In pairing mode or when linking with the notebook the LED indicator on the body of the mouse blinks every second. If the mouse is not functioning correctly, press the "Bluetooth connection/pairing" button on the bottom of the mouse to re-initialize the Bluetooth connection.

In the low battery mode, the LED indicator flashes.

Using Acer external IEEE 1394 optical drive

Use the IEEE 1394 cable in the accessory box to connect to the IEEE 1394 port.

Press the drive eject button to eject the optical disk when the drive is connected to the computer and the computer is on.
Using Acer Bluetooth VoIP phone

</tbody>
</table>

Charging the phone

You need to charge the phone before initial use. It takes approximately four hours for a full charge.

To charge the phone:
1. Turn the notebook on.
2. Locate the PC Card (PCMCIA) slot.
3. Insert the phone to the slot label up. Make sure that the phone is completely pushed on the slot.

Note: The notebook detects the device and displays a **New Device Wizard** window. Click **No, not this time**, then close the window.
4. The power/charge indicator lights up during charge and turns off when the battery is full. Eject the phone from the PC Card slot when charging is finished.

Connecting the phone to your notebook

The Acer VCM (Voice Connection Manager) Bluetooth Headset Connection Center is a convenient tool to connect the phone to your notebook.

To connect the phone to your notebook:

1. Eject the phone from the PC Card slot, if necessary, then press the phone power button for three seconds. The phone beeps twice and the charge/power LED flashes to indicate that the phone is on.

2. Press the Bluetooth connection/pairing button for three seconds to put the phone in "pair-link mode". The phone beeps, and the connection/pairing and charge/power LEDs flash alternately.

3. Right-click the Acer VCM icon on the taskbar, then select Bluetooth Headset Connection Center... from the pop-up menu. If you have not paired any Bluetooth headset devices with the notebook previously, Acer VCM automatically scans all Bluetooth headset devices within range, then displays them in the Bluetooth Headset List with a New status. Otherwise, any previously paired Bluetooth headset device shows "Read to Use".

4. Click the Acer Bluetooth VoIP Phone from the list, then click Connect. Acer VCM automatically pairs the phone to the notebook, then changes the phone status to "Default Use".
Note: Click "Rescan" if the Acer Bluetooth VoIP Phone does not appear on the list. After pairing, Acer VCM automatically connects the phone to the notebook each time you turn the phone on. There is no need to connect the phone again.
Using the phone

You can use the phone in handheld or hands-free (speakerphone) mode. When you receive an Internet call from your Instant Messaging service (i.e. MSN® Messenger, Skype), press the Bluetooth connection/pairing button \( \text{Bluetooth} \). The incoming call voice automatically diverts to the phone speaker so you can receive the call.

\[ \text{Note: You can only receive/answer Internet calls through the phone when it is linked to the notebook. Every time you turn the phone on, Acer VCM automatically links it to the notebook. When linked, the Bluetooth connection/pairing indicator on the phone blinks slowly.} \]

To switch to hands-free mode, rotate the phone flip counterclockwise, then press the speakerphone button \( \text{Speakerphone} \). Refer to the illustration.
Using a computer security lock

The notebook comes with a Kensington-compatible security slot for a security lock.

Wrap the computer security lock cable around an immovable object such as a table or handle of a locked drawer. Insert the lock into the notch and turn the key to secure the lock. Keyless models are also available.
Audio

The computer comes with 32-bit High-Definition audio, and built-in stereo speakers.

Adjusting the volume

Use hotkeys to easily adjust the volume on your computer. See "Hotkeys" on page 31 for more information on adjusting the speaker volume.
Acer InviLink Nplify wireless technology

Acer InviLink Nplify wireless technology uses multiple radios to create a robust signal and deliver advanced wireless networking performance in addition to all-in-one compatibility.

Nplify supports Acer SignalUp technology and 802.11a/b/g (dual-band tri-mode) access points.

To enjoy Nplify performance, please refer to the Access Point user manual to optimize your wireless channel settings.
Acer OrbiCam

The Acer OrbiCam is a 1.3 megapixel CMOS camera appropriately mounted on top of the LCD panel. The camera's 225-degree ergonomic rotation allows you to capture high-resolution photos or videos up front or at the back of the LCD panel. The Acer OrbiCam fully supports the Acer Video Conference technology so you transmit the best video conference quality over an Instant Messenger service.

Getting to know your Acer OrbiCam

Rotating the Acer OrbiCam

The Acer OrbiCam rotates 225 degrees counterclockwise to achieve the desired angle. Refer to the illustrations below.

Note: DO NOT rotate the camera clockwise to prevent damage to the device.

For your convenience, the camera snaps to 45 degrees to match the position of your face in front or at the back of the LCD panel.
Launching the Acer OrbiCam

Click Start > All Programs > Acer > Acer OrbiCam. The Acer OrbiCam capture window appears.

Changing the Acer OrbiCam settings

Resolution

To change the capture resolution, click the displayed resolution at the bottom right corner of the capture window, then select the desired resolution.

**Note:** Setting the camera resolution to 640 x 480 or larger does not change the capture window size.
Options

Click **Options** to display the **Window**, **Preview**, and **Folder** tabs. Use the options to change the capture window size, preview settings, and the folder for captured photos or videos.

Camera Settings

Basic settings

Click the Camera Settings icon on the bottom right corner of the capture display, then select **Camera Settings** from the pop-up menu. You can adjust the **Video**, **Audio**, and **Zoom/Face tracking** options from this window.
Capture settings

From the Camera Settings window, click the **Driver Settings** button. The **Properties** window appears.

**Device Settings** allows you to change the camera brightness, contrast, hue, saturation, sharpness, etc.

**Advanced Settings** allows you to activate gain control, implement image mirror, select image enhancements and anti-flicker settings, and turn on/off the camera indicator.

**Zoom/Face Track Settings** allows you to adjust the zoom level and turn the face-tracking feature on or off.

Capturing photos/videos

To capture a photo or a video clip, rotate the Acer OrbiCam to get the desired angle, then click the **Take a Picture** or **Record a Video** button. The **Windows Picture and Fax Viewer** or the **Windows Media Player** automatically launches to display/play a preview of the photo/video clip.

**Note:** By default, all photos and videos are saved in the **My Pictures** and **My Videos** folder.

Using the Acer OrbiCam as webcam

The Acer OrbiCam is automatically selected as the capture device of any Instant Messenger (IM) application. To use the Acer OrbiCam as a webcam, open the IM service, then select the video/webcam feature. You can now broadcast from your location to an IM partner anywhere in the world.
Enabling the Acer VisageON

The Acer VisageON technology comes with two features: Face tracking and Video effects (selected models only). The face tracking feature tracks your head movement and automatically centers your face in the capture window. The video effects feature allows you to select and apply an effect to your video transmissions.

Note: The face tracking feature is not capable of centering your face beyond the capture window frame. Minimal head movements are tracked more efficiently.

To enable the Acer VisageON:
1. Right-click on this icon, then select VisageON from the pop-up menu.

The VisageON window appears.

2. Select and apply a video effect from the left section of the VisageON window. Change the face tracking settings and options from the right section.
Using the face tracking feature

To use the face tracking feature:

1. Click the left icon down arrow button, then select **Single User** or **Multiple Users** from the pop-up menu. For multiple users, the face tracking feature automatically centers all the users’ face in the capture window, otherwise the utility centers the face of the user closest to the camera.

2. Click the right icon to zoom in/out or reset the current view.

3. Click **VisageON** to display a pop-menu that allows configuration of the camera, face tracking and video effects settings.
Using video effects (selected models only)

The Video Settings section allows you to select an avatar or accessory video effect from the list. To select an effect:

1. Click the encircled icon to display the available video effects. The Video Effect Selection window appears.

2. Click on a video effect to use. The selected effect appears in the video effects section of the VisageON window.

Note:
1. When using avatars, you may have to calibrate the face points to achieve better tracking. Follow screen instructions from the VisageON window to continue.
2. You may use video effects when using the camera for IM chat/video sessions or call conferences.
Acer GraviSense

Acer GraviSense is an innovative utility designed to further protect your data by automatically moving the read/write heads of your Acer notebook's hard disk away from the storage disk (this is known as "parking" the heads) in the event that sudden motion is detected. Acer GraviSense can also be set to activate an alarm in case your notebook is moved by an unauthorized person.

Using Acer GraviSense

You can launch Acer GraviSense in a number of ways:

- From the Start menu, go to Start > (All) Programs > Acer GraviSense.

- When Acer GraviSense is running, an icon will be displayed in the task tray. Move your cursor over the icon to identify Acer GraviSense. Left-click or right-click on the icon to open a context menu.

Protecting the HDD

Activate this feature by right-clicking on the tray icon and selecting Hard Drive Protection.

Selecting this function will park the HDD heads in the event that any vibration or movement which exceeds the level tolerated by the HDD is detected.

Anti-Theft

Activate this feature by right-clicking on the tray icon and selecting Anti-Theft.
When enabled, this feature will sound an alarm if your notebook is moved. This feature is password-protected to prevent unauthorized access.

The first time you activate this function, you will be prompted to set a new password.

Your password needs to be between four and eight characters, and should consist of letters and numbers. Once you've set the password, the Anti-Theft feature will be activated.

If you enter a password that is invalid for any reason, you will be prompted to try a new password.
• When activated, Acer GraviSense will show a full-screen image and a password window.

![Acer GraviSense](image)

• When activated, the Anti-Theft feature will disable the following functions:
  1. Alt + Tab
  2. Ctrl + Shift + Esc
  3. Ctrl + Alt + Del
  4. Windows keys
  5. Task bar

• When activated, the settings below will be changed to "do nothing" (your personal settings will be recovered once the Anti-Theft function is disabled):
  a) Power button
  b) Sleep button
  c) Close the lid

If the system detects any movement when this function is active, the system will emit a beeping sound as a warning and prompt you to enter the password.

NOTE: Please remember the password as it cannot be changed.

NOTE: You need to disable the Task Manager before setting the Anti-Theft function.
Using the system utilities

Note: The system utilities work under Microsoft Windows XP only.

Ferrari Calendar

Acer offers monthly wallpaper calendars until December, 2007. When your calendar expires, please visit the Acer website to get the most up to date calendar: http://global.acer.com/support/service.htm.

Acer GridVista (dual-display compatible)

Note: This feature is only available on certain models.

To enable the dual monitor feature of your notebook, first ensure that the second monitor is connected, then, select Start, Control Panel, Display and click on Settings. Select the secondary monitor (2) icon in the display box and then click the check box Extend my Windows desktop onto this monitor. Finally, click Apply to confirm the new settings and click OK to complete the process.

Acer GridVista™ is a handy utility that offers four pre-defined display settings so you can view multiple windows on the same screen. To access this function,
please go to Start, All Programs and click on Acer GridVista™. You may choose any one of the four display settings indicated below:

Double (vertical), Triple (primary at left), Triple (primary at right), or Quad

Acer GridVista™ is dual-display compatible, allowing two displays to be partitioned independently.

Acer GridVista™ is simple to set up:

1. Run Acer GridVista™ and select your preferred screen configuration for each display from the taskbar.
2. Drag and drop each window into the appropriate grid.
3. Enjoy the convenience of a well-organized desktop.

Note: Please ensure that the resolution setting of your second monitor is set to the manufacturer's recommended value.
Launch Manager

Launch Manager allows you to set the four easy-launch buttons located above the keyboard. *Easy-launch buttons* on page 26 for the location of the easy-launch buttons.

You can access the Launch Manager by clicking on Start, All Programs, and then Launch Manager to start the application.

Norton Anti-virus (for selected models)

Norton Anti-virus is an anti-virus software that finds and repairs infected files, and protects against viruses to keep your computer data safe and secure.

How do I check for viruses?

A Full System Scan scans all files on your computer. To perform a system scan:

1  Start Norton Anti-virus.
   Double click on the Norton Anti-virus Icon on the desktop or click on the Start menu in the Windows taskbar, highlight Programs, and select Norton Anti-virus.
2 In the Norton Anti-virus main window, click **Scans**.

![Norton Anti-virus main window](image)

3 In the **Scans** panel, click **Run Full System Scan**.

4 When the scan is complete, a scan summary appears. Click **Finished**.

You can schedule customized virus scans that run unattended on specific dates and times or at periodic intervals. If you are using the computer when the scheduled scan begins, it runs in the background so that you do not have to stop working.

For more information refer to the Norton Anti-virus Help menu.

**Computer Associates eTrust Antivirus 64-bit Edition**  
(for selected models)

CA eTrust Antivirus is an anti-virus software that finds and repairs infected files, and protects against viruses to keep your computer data safe and secure.

**How do I check for viruses?**

A Full System Scan scans all files on your computer. To perform a system scan:

1 Start **CA eTrust Antivirus**.

   Double click on the **CA eTrust Antivirus** Icon on the desktop or click on the **Start** menu in the Windows taskbar, highlight **(All) Programs**, and select **Computer Associates > eTrust > eTrust Antivirus**.
2. In the CA eTrust Antivirus main window, click **Start Scan**.

You can schedule customized virus scans that run unattended on specific dates and times or at periodic intervals. If you are using the computer when the scheduled scan begins, it runs in the background so that you do not have to stop working.

For more information refer to the CA eTrust Antivirus Help menu.
Frequently asked questions

The following is a list of possible situations that may arise during the use of your computer. Easy solutions are provided for each one.

I turned on the power, but the computer does not start or boot up.

Look at the power indicator:

- If it is not lit, no power is being supplied to the computer. Check the following:
  - If you are using on the battery, it may be low and unable to power the computer. Connect the AC adapter to recharge the battery pack.
  - Make sure that the AC adapter is properly plugged into the computer and to the power outlet.
- If it is lit, check the following:
  - Is a non-bootable (non-system) disk in the external USB floppy drive? Remove or replace it with a system disk and press <Ctrl> + <Alt> + <Del> to restart the system.

Nothing appears on the screen.

The computer's power management system automatically blanks the screen to save power. Press any key to turn the display back on.

If pressing a key does not turn the display back on, three things might be the cause:

- The brightness level might be too low. Press <Fn> + <-> (increase) to adjust the brightness level.
- The display device might be set to an external monitor. Press the display toggle hotkey <Fn> + <F5> to toggle the display back to the computer.
- If the Sleep indicator is lit, the computer is in Sleep mode. Press the power button to resume.

Image is not full-screen.

Each computer display has a different native resolution depending on the screen. If you set the resolution lower than this native resolution, the screen expands to fill the computer display. Right-click on your Windows desktop and select Properties to bring up the "Display Properties" dialog box. Then click on the Settings tab to make sure that the resolution is set to the appropriate resolution. Resolutions lower than the specified resolution are not full-screen on the computer or on an external monitor.
No audio is heard from the computer.

Check the following:

- The volume may be muted. In Windows, look at the volume control (speaker) icon on the taskbar. If it is crossed-out, click on the icon and deselect the **Mute all** option.
- The volume level may be too low. In Windows, look at the volume control icon on the taskbar. You can also use the volume control buttons to adjust the volume. See "Hotkeys" on page 31 for more detail.
- If headphones, earphones or external speakers are connected to the line-out port on the computer, the internal speakers automatically turn off.

The keyboard does not respond.

Try attaching an external keyboard to a USB port on the computer. If it works, contact your dealer or an authorized service center as the internal keyboard cable may be loose.

The infrared port does not work.

Check the following:

- Make sure that the infrared ports of the two devices are facing each other (+/- 15 degrees) a maximum of 1 meter apart.
- Make sure there is a clear path between the two infrared ports. Nothing should be blocking the ports.
- Make sure you have the appropriate software running on both devices (for file transfers) or you have the appropriate drivers (for printing to an infrared printer).
- During the POST, press <F2> to access the BIOS utility and verify that the infrared port is enabled.
- Make sure both devices are IrDA-compliant.

The printer does not work.

Check the following:
• Make sure that the printer is connected to a power outlet and that it is turned on.
• Make sure that the printer cable is connected securely to the computer's parallel port or a USB port and the corresponding port on the printer.

I want to set up my location to use the internal modem.

To properly use your communication software (e.g. HyperTerminal), you need to set up your location:

1. Click on **Start, Settings, Control Panel**.
2. Double-click on **Phone and Modem Options**.
3. Click on **Dialing Rules** and begin setting up your location.

Refer to the Windows manual.

**Note:** Please note, on first booting your notebook, that you can skip the Internet Connection setup, as it is not necessary to complete the installation of your Operating System. After the Operating System is set up, you can proceed with the Internet Connection setup.

I want to restore my computer to its original settings without recovery CDs.

**Note:** If your system is the multilingual version, the operating system and language you choose when you first turn on the system will be the only option for future recovery operations.

This recovery process helps you restore the C: drive with the original software content that is installed when you purchase your notebook. Follow the steps below to rebuild your C: drive. (Your C: drive will be reformatted and all data will be erased.) It is important to back up all data files before using this option.

Before performing a restore operation, please check the BIOS settings.

1. Check to see if **Acer disk-to-disk recovery** is enabled or not.
2. Make sure the **D2D Recovery** setting in **Main** is **Enabled**.
3. Exit the BIOS utility and save changes. The system will reboot.

**Note:** To activate the BIOS utility, press **<F2>** during POST.
To start the recovery process:

1. Restart the system.
2. While the Acer logo is showing, press <Alt> + <F10> at the same time to enter the recovery process.
3. Refer to the onscreen instructions to perform system recovery.

**Important!** This feature occupies 3 to 4 GB in a hidden partition on your hard disk.

### Requesting service

**International Travelers Warranty (ITW)**

Your computer is backed by an International Travelers Warranty (ITW) that gives you security and peace of mind when traveling. Our worldwide network of service centers are there to give you a helping hand.

An ITW passport comes with your computer. This passport contains all you need to know about the ITW program. A list of available, authorized service centers is in this handy booklet. Read this passport thoroughly.

Always have your ITW passport on hand, especially when you travel, to receive the benefits from our support centers. Place your proof-of-purchase in the flap located inside the front cover of the ITW passport.

If the country you are traveling in does not have an Acer-authorized ITW service site, you can still get in contact with our offices worldwide. Please consult [http://global.acer.com](http://global.acer.com).

### Before you call

Please have the following information available when you call Acer for online service, and please be at your computer when you call. With your support, we can reduce the amount of time a call takes and help solve your problems efficiently. If there are error messages or beeps reported by your computer, write them down as they appear on the screen (or the number and sequence in the case of beeps).

You are required to provide the following information:

- **Name:**
- **Address:**
- **Telephone number:**
- **Machine and model type:**
- **Serial number:**
- **Date of purchase:**
Taking your notebook PC with you

This section gives you tips and hints to consider when moving around or traveling with your computer.

Disconnecting from the desktop

Follow these steps to disconnect your computer from external accessories:

1. Save any open files.
2. Remove any media, floppy disks or compact disks from the drive(s).
3. Shut down the computer.
4. Close the display cover.
5. Disconnect the cord from the AC adapter.
6. Disconnect the keyboard, pointing device, printer, external monitor and other external devices.
7. Disconnect the Kensington lock if you are using one to secure the computer.

Moving around

When you are just moving within short distances, for example, from your office desk to a meeting room.

Preparing the computer

Before moving the computer, close and latch the display cover to place it in Sleep mode. You can now safely take the computer anywhere you go within the building. To bring the computer out of Sleep mode, open the display; then press the power button.

If you are taking the computer to a client’s office or a different building, you may choose to shut down the computer:

Click on Start, Turn Off Computer, then click on Turn Off (Windows XP).

Or:

You can put the computer in Sleep mode by pressing $\text{Fn} + \text{F4}$. Then close and latch the display.

When you are ready to use the computer again, unlatch and open the display; then press the power button.
Note: If the Sleep indicator is off, the computer has entered Hibernation mode and is turned off. If the power indicator is off but the Sleep indicator is on, the computer has entered Sleep mode. In both cases, press the power button to turn the computer back on. Note that the computer may enter Hibernation mode after being in Sleep mode for a period of time.

What to bring to meetings

If your meeting is relatively short, you probably do not need to bring anything with you other than your computer. If your meeting will be longer, or if your battery is not fully charged, you may want to bring the AC adapter with you to plug in your computer in the meeting room.

If the meeting room does not have an electrical outlet, reduce the drain on the battery by putting the computer in Sleep mode. Press \(<\text{Fn}> + \langle\text{F4}\rangle\) or close the display cover whenever you are not actively using the computer. To resume, open the display (if closed), then press the power button.

Taking the computer home

When you are moving from your office to your home or vice versa.

Preparing the computer

After disconnecting the computer from your desktop, follow these steps to prepare the computer for the trip home:

- Check that you have removed all media and compact disks from the drive(s). Failure to remove the media can damage the drive head.
- Pack the computer in a protective case that can prevent the computer from sliding around and cushion it if it should fall.

Caution: Avoid packing items next to the top cover of the computer. Pressure against the top cover can damage the screen.

What to take with you

Unless you have some items at home, take the following items with you:

- AC adapter and power cord
- The printed User's Guide
Special considerations

Follow these guidelines to protect your computer while traveling to and from work:

- Minimize the effects of temperature changes by keeping the computer with you.
- If you need to stop for an extended period of time and cannot carry the computer with you, leave the computer in the trunk of the car to avoid exposing the computer to excessive heat.
- Changes in temperature and humidity can cause condensation. Allow the computer to return to room temperature, and inspect the screen for condensation before turning on the computer. If the temperature change is greater than 10 °C (18 °F), allow the computer to come to room temperature slowly. If possible, leave the computer for 30 minutes in an environment with a temperature between outside and room temperature.

Setting up a home office

If you frequently work on your computer at home, you may want to purchase a second AC adapter for use at home. With a second AC adapter, you can avoid carrying the extra weight to and from home.

If you use your computer at home for significant periods of time, you might also want to add an external keyboard, monitor or mouse.

Traveling with the computer

When you are moving within a larger distance, for instance, from your office building to a client's office building or traveling locally.

Preparing the computer

Prepare the computer as if you were taking it home. Make sure that the battery in the computer is charged. Airport security may require you to turn on your computer when carrying it into the gate area.

What to take with you

Take the following items with you:

- AC adapter
- Spare, fully-charged battery pack(s)
- Additional printer driver files if you plan to use another printer
Special considerations

In addition to the guidelines for taking the computer home, follow these guidelines to protect your computer while traveling:

- Always take the computer as carry-on luggage.
- If possible, have the computer inspected by hand. Airport security X-ray machines are safe, but do not put the computer through a metal detector.
- Avoid exposing floppy disks to hand-held metal detectors.

Traveling internationally with the computer

When you are moving from country to country.

Preparing the computer

Prepare the computer as you would normally prepare it for traveling.

What to bring with you

Bring the following items with you:

- AC adapter
- Power cords that are appropriate for the country to which you are traveling
- Spare, fully-charged battery packs
- Additional printer driver files if you plan to use another printer
- Proof of purchase, in case you need to show it to customs officials
- International Traveler’s Warranty passport

Special considerations

Follow the same special considerations as when traveling with the computer. In addition, these tips are useful when traveling internationally:

- When traveling in another country, check that the local AC voltage and the AC adapter power cord specifications are compatible. If not, purchase a power cord that is compatible with the local AC voltage. Do not use converter kits sold for appliances to power the computer.
- If you are using the modem, check if the modem and connector is compatible with the telecommunications system of the country you are traveling in.
Securing your computer

Your computer is a valuable investment that you need to take care of. Learn how to protect and take care of your computer.

Security features include hardware and software locks — a security notch and passwords.

Using a computer security lock

The notebook comes with a Kensington-compatible security slot for a security lock.

Wrap a computer security lock cable around an immovable object such as a table or handle of a locked drawer. Insert the lock into the notch and turn the key to secure the lock. Some keyless models are also available.

Using passwords

Passwords protect your computer from unauthorized access. Setting these passwords creates several different levels of protection for your computer and data:

- Supervisor Password prevents unauthorized entry into the BIOS utility. Once set, you must enter this password to gain access to the BIOS utility. See "BIOS utility" on page 74.
- User Password secures your computer against unauthorized use. Combine the use of this password with password checkpoints on boot-up and resume from Hibernation for maximum security.
- Password on Boot secures your computer against unauthorized use. Combine the use of this password with password checkpoints on boot-up and resume from Hibernation for maximum security.

Important! Do not forget your Supervisor Password! If you forget your password, please get in touch with your dealer or an authorized service center.

Entering passwords

When a password is set, a password prompt appears in the center of the display screen.

- When the Supervisor Password is set, a prompt appears when you press <F2> to enter the BIOS utility at boot-up.
• Type the Supervisor Password and press <Enter> to access the BIOS utility. If you enter the password incorrectly, a warning message appears. Try again and press <Enter>.

• When the User Password is set and the password on boot parameter is enabled, a prompt appears at boot-up.

• Type the User Password and press <Enter> to use the computer. If you enter the password incorrectly, a warning message appears. Try again and press <Enter>.

**Important**! You have three chances to enter a password. If you fail to enter the password correctly after three tries, the system halts. Press and hold the power button for four seconds to shut down the computer. Then turn on the computer again, and try again.

**Setting passwords**

You can set passwords using the BIOS utility.
Expanding through options

Your notebook PC offers you a complete mobile computing experience.

Connectivity options

Ports allow you to connect peripheral devices to your computer as you would with a desktop PC. For instructions on how to connect different external devices to the computer, read the following section.

Acer ezDock Series

Acer ezDock Series includes Acer ezDock and Acer ezDock Lite, both of which provide excellent total cost of ownership for you and your corporation. Acer ezDock Lite is a streamlined version of the ezDock. For details of the features please check the table below.

Connecting to a notebook PC

1. Pull out the connector from the connector slot and remove the cap.
2. Align the connector with the designated port on the notebook PC and push firmly.

Fax/data modem

Your computer has a built-in V.92 56 Kbps fax/data modem.

Warning! This modem port is not compatible with digital phone lines. Plugging this modem into a digital phone line will damage the modem.
To use the fax/data modem port, connect a phone cable from the modem port to a telephone jack.

Warning! Please make sure that the cable you use is appropriate for the country in which you are working.

Built-in network feature

The built-in network feature allows you to connect your computer to an Ethernet-based network.

To use the network feature, connect an Ethernet cable from the Ethernet (RJ-45) port on the chassis of the computer to a network jack or hub on your network.
Fast Infrared (FIR)

The computer's Fast Infrared (FIR) port allows you to do wireless data transfer with other IR-aware computers and peripherals such as PDAs, mobile phones, and infrared printers. The infrared port can transfer data at speeds of up to 4 Mbps at a distance of up to one meter.

Universal Serial Bus (USB)

The USB 2.0 port is a high-speed serial bus which allows you to connect USB peripherals without taking up precious system resources.
IEEE 1394 port

The computer’s IEEE 1394 port allows you to connect to an IEEE 1394 supported devices like a DVD/CD-RW combo or DVD-Dual drive.

PC Card slot

The Type II PC Card slot of the computer accepts PC Cards that enhance the usability and expandability of the computer. These cards should have a PC Card logo on them.

PC Cards (formerly PCMCIA) are add-on cards for portable computers, giving you expansion possibilities long afforded by desktop PCs. Popular PC Cards include flash, fax/data modem, wireless LAN and SCSI cards. CardBus improves on the 16-bit PC card technology by expanding the bandwidth to 32 bits.

Note: Refer to your card’s manual for details on how to install and use the card, and its functions.
Inserting a PC Card

Insert the card into the slot and make the proper connections (e.g., network cable), if necessary. See your card manual for details.

Ejecting a PC Card

Before ejecting a PC Card:

1. Exit the application using the card.
2. Left-click on the PC Card icon on the taskbar and stop the card operation.
3. Press the slot eject button to pop out the eject button; then press it again to eject the card.

Installing memory

Follow these steps to install memory:

1. Turn off the computer, unplug the AC adapter (if connected) and remove the battery pack. Then turn the computer over to access its base.
2. Remove the screws from the memory cover; then lift up and remove the memory cover.
3  (a) Insert the memory module diagonally into the slot, then (b) gently press it down until it clicks into place.

4  Replace the memory cover and secure it with the screw.
5  Reinstall the battery pack, and reconnect the AC adapter.
6  Turn on the computer.

The computer automatically detects and reconfigures the total memory size. Please consult a qualified technician or contact your local Acer dealer.

**BIOS utility**

The BIOS utility is a hardware configuration program built into your computer's BIOS.

Your computer is already properly configured and optimized, and you do not need to run this utility. However, if you encounter configuration problems, you may need to run it.

To activate the BIOS utility, press <F2> during the POST; while the notebook PC logo is being displayed.

**Boot sequence**

To set the boot sequence in the BIOS utility, activate the BIOS utility, then select Boot from the categories listed at the top of the screen.

**Enable disk-to-disk recovery**

To enable disk-to-disk recovery (hard disk recovery), activate the BIOS utility, then select Main from the categories listed at the top of the screen. Find D2D Recovery at the bottom of the screen and use the <F5> and <F6> keys to set this value to Enabled.
Password

To set a password on boot, activate the BIOS utility, then select Security from the categories listed at the top of the screen. Find Password on boot: and use the <F5> and <F6> keys to enable this feature.

Using software

Playing DVD movies

When the DVD drive module is installed in the optical drive bay, you can play DVD movies on your computer.

1. Eject the DVD tray and insert a DVD movie disk; then close the DVD tray.

Important! When you launch the DVD player for the first time, the program asks you to enter the region code. DVD disks are divided into 6 regions. Once your DVD drive is set to a region code, it will play DVD disks of that region only. You can set the region code a maximum of five times (including the first time), after which the last region code set will remain permanent. Recovering your hard disk does not reset the number of times the region code has been set. Refer to the table below for DVD movie region code information.

2. The DVD movie will automatically play after a few seconds.

<table>
<thead>
<tr>
<th>Region code</th>
<th>Country or region</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>USA, Canada</td>
</tr>
<tr>
<td>2</td>
<td>Europe, Middle East, South Africa, Japan</td>
</tr>
<tr>
<td>3</td>
<td>Southeast Asia, Taiwan, South Korea</td>
</tr>
<tr>
<td>4</td>
<td>Latin America, Australia, New Zealand</td>
</tr>
<tr>
<td>5</td>
<td>Former USSR, parts of Africa, India</td>
</tr>
<tr>
<td>6</td>
<td>People's Republic of China</td>
</tr>
</tbody>
</table>

Note: To change the region code, insert a DVD movie of a different region into the DVD drive. Please refer to the online help for more information.
Acer eRecovery Management

Acer eRecovery Management is a tool to quickly backup and restore the system. You can create and save a backup of the current system configuration to hard disk, CD or DVD.

Acer eRecovery Management consists of the following functions:

1. Create backup
2. Restore from backup
3. Create factory default image CD, or burn bundled software to an application CD
4. Re-install bundled software without CD
5. Change Acer eRecovery Management password

This chapter will guide you through each process.

---

**Note:** This feature is only available on certain models. For systems that do not have a built-in optical disk burner, plug in an external USB or IEEE 1394-compatible optical disk burner before entering Acer eRecovery Management for optical disk-related tasks.

---

Acer eRecovery Management requires a specific hard disk partitioning structure to function. If the system detects that the hard disk does not use this structure, Acer eRecovery Management functionality will be disabled.

---

Create backup

You can create and save backup images to hard disk, CD or DVD.

1. Boot to Windows XP
2. Press <Alt> + <F10> to open the Acer eRecovery Management utility.
3. Enter the password to proceed. The default password is six zeros.
4. In the Acer eRecovery Management window, select Recovery settings and click Next.
5. In the Recovery settings window, select Backup snapshot image and click Next.
6. Select the backup method.
   a. Use Backup to HDD to store the backup disk image on drive D:.
   b. Backup to optical device to store the backup image on CD or DVD.
After choosing the backup method, click **Next**.

Follow the instructions on screen to complete the process.

---

## Restore from backup

You can restore backups previously created (as stated in the **Create backup** section) from hard disk, CD or DVD.

1. **Boot to Windows XP.**
2. **Press** `<Alt>` + `<F10>` **to open the Acer eRecovery Management utility.**
3. **Enter the password to proceed.** The default password is six zeros.
4. **In the Acer eRecovery Management window, select** **Recovery actions** **and click** **Next**.
5. **Select the desired restore action and follow the onscreen instructions to complete the restore process.**

**Note:** The "Restore C:" item is enabled only if there is a user backup stored on the hard disk (D:\). Please refer to the **Create backup** section.

---

## Create factory default image CD

When the System CD and Recovery CD are not available, you can create them by using this feature.

1. **Boot to Windows XP.**
2. **Press** `<Alt>` + `<F10>` **to open the Acer eRecovery Management utility.**
3. **Enter the password to proceed.** The default password is six zeros.
4. **In the Acer eRecovery Management window, select** **Recovery settings** **and click** **Next**.
5. **In the Recovery settings window, select** **Burn image to disk** **and click** **Next**.
6. **In the Burn image to disk window, select 1. Factory default image or 2. Application CD and click** **Next**.
7. **Follow the instructions on screen to complete the process.**

**Note:** Select **1. Factory default image** when you want to burn a bootable disk that contains your computer's entire operating system as it was delivered to you from the factory. If you wish to have a disk that will allow you to browse the contents and install selected drivers and applications, select **2. Application CD** — this disk will not be bootable.
Re-install bundled software without CD

Acer eRecovery Management stores pre-loaded software internally for easy driver and application re-installation.

1 Boot to Windows XP.
2 Press <Alt> + <F10> to open the Acer eRecovery Management utility.
3 Enter the password to proceed. The default password is six zeros.
4 In the Acer eRecovery Management window, select Recovery actions and click Next.
5 In the Recovery settings window, select Reinstall applications/drivers and click Next.
6 Select the desired driver/application and follow the instructions on screen to re-install.

At first launch, Acer eRecovery Management prepares all the needed software and may take few seconds to bring up the software content window.

Change password

Acer eRecovery Management and Acer disk-to-disk recovery are protected by a password that can be changed by the user. Follow the steps below to change the password in Acer eRecovery Management.

1 Boot to Windows XP.
2 Press <Alt> + <F10> to open the Acer eRecovery Management utility.
3 Enter the password to proceed. The default password is six zeros.
4 In the Acer eRecovery Management window, select Recovery settings and click Next.
5 In the Recovery settings window, select Password: Change Acer eRecovery Management password and click Next.
6 Follow the instructions on screen to complete the process.

Note: If the system crashes, and will not boot to Windows, you can run Acer disk-to-disk recovery to restore the factory default image under DOS mode.
Troubleshooting

This chapter shows you how to deal with common system problems. Read it before calling a technician if a problem occurs. Solutions to more serious problems require opening up the computer. Do not attempt to open the computer yourself; contact your dealer or authorized service center for assistance.

Troubleshooting tips

This notebook PC incorporates an advanced design that delivers onscreen error message reports to help you solve problems.

If the system reports an error message or an error symptom occurs, see "Error messages" below. If the problem cannot be resolved, contact your dealer. See "Requesting service" on page 61.

Error messages

If you receive an error message, note the message and take the corrective action. The following table lists the error messages in alphabetical order together with the recommended course of action.

<table>
<thead>
<tr>
<th>Error messages</th>
<th>Corrective action</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMOS battery bad</td>
<td>Contact your dealer or an authorized service center.</td>
</tr>
<tr>
<td>CMOS checksum error</td>
<td>Contact your dealer or an authorized service center.</td>
</tr>
<tr>
<td>Disk boot failure</td>
<td>Insert a system (bootable) disk into the floppy drive (A:), then press &lt;Enter&gt; to reboot.</td>
</tr>
<tr>
<td>Equipment configuration error</td>
<td>Press &lt;F2&gt; (during POST) to enter the BIOS utility, then press Exit in the BIOS utility to reboot.</td>
</tr>
<tr>
<td>Hard disk 0 error</td>
<td>Contact your dealer or an authorized service center.</td>
</tr>
<tr>
<td>Hard disk 0 extended type error</td>
<td>Contact your dealer or an authorized service center.</td>
</tr>
<tr>
<td>I/O parity error</td>
<td>Contact your dealer or an authorized service center.</td>
</tr>
<tr>
<td>Keyboard error or no keyboard connected</td>
<td>Contact your dealer or an authorized service center.</td>
</tr>
<tr>
<td>Keyboard interface error</td>
<td>Contact your dealer or an authorized service center.</td>
</tr>
<tr>
<td>Memory size mismatch</td>
<td>Press &lt;F2&gt; (during POST) to enter the BIOS utility, then press Exit in the BIOS utility to reboot.</td>
</tr>
</tbody>
</table>

</table>
If you still encounter problems after going through the corrective measures, please contact your dealer or an authorized service center for assistance. Some problems may be solved using the BIOS utility.
Regulations and safety notices

FCC notice

This device has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the device and receiver.
• Connect the device into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/television technician for help.

Notice: Shielded cables

All connections to other computing devices must be made using shielded cables to maintain compliance with FCC regulations.

Notice: Peripheral devices

Only peripherals (input/output devices, terminals, printers, etc.) certified to comply with the Class B limits may be attached to this equipment. Operation with non-certified peripherals is likely to result in interference to radio and TV reception.

Caution

Changes or modifications not expressly approved by the manufacturer could void the user's authority, which is granted by the Federal Communications Commission, to operate this computer.

Operation conditions

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference,
and (2) this device must accept any interference received, including interference that may cause undesired operation.

**Notice: Canadian users**

This Class B digital apparatus complies with Canadian ICES-003.

**Remarque à l'intention des utilisateurs canadiens**

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

**Declaration of Conformity for EU countries**

Hereby, Acer, declares that this notebook PC series is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC. (Please visit [http://global.acer.com/products/notebook/reg-nb/index.htm](http://global.acer.com/products/notebook/reg-nb/index.htm) for complete documents.)

Compliant with Russian regulatory certification

![ME61](image)

**Modem notices**

**Notice for USA**

This equipment complies with Part 68 of the FCC rules. Located on the modem is a label that contains, among other information, the FCC Registration Number and Ringer Equivalence Number (REN) for this equipment. Upon request, you must provide this information to your telephone company.

If your telephone equipment causes harm to the telephone network, the telephone company may discontinue your service temporarily. If possible, they will notify you in advance. But, if advance notice is not practical, you will be notified as soon as possible. You will also be informed of your right to file a complaint with the FCC.

Your telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the proper functioning of your equipment. If they do, you will be notified in advance to give you an opportunity to maintain uninterrupted telephone service.
If this equipment should fail to operate properly, disconnect the equipment from the phone line to determine if it is causing the problem. If the problem is with the equipment, discontinue use and contact your dealer or vendor.

**Caution:** To reduce the risk of fire, use only No. 26 AWG or larger UL Listed or CSA Certified Telecommunication Line Cord.

**TBR 21**

This equipment has been approved [Council Decision 98/482/EC - "TBR 21"] for single terminal connection to the Public Switched Telephone Network (PSTN). However, due to differences between the individual PSTNs provided in different countries, the approval does not, of itself, give an unconditional assurance of successful operation on every PSTN termination point. In the event of problems, you should contact your equipment supplier in the first instance.

**List of applicable countries**

EU member states as of May 2004 are: Belgium, Denmark, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal, Finland, Sweden, United Kingdom Estonia, Latvia, Lithuania, Poland, Hungary, Czech Republic, Slovak Republic, Slovenia, Cyprus and Malta. Usage allowed in the countries of European Union, as well as Norway, Switzerland, Iceland and Liechtenstein. This device must be used in strict accordance with the regulations and constraints in the country of use. For further information, please contact local office in the country of use.

**Notice for Australia**

For safety reasons, only connect headsets with a telecommunications compliance label. This includes customer equipment previously labelled permitted or certified.
Notice for New Zealand

1 The grant of a Telepermit for any item of terminal equipment indicates only that Telecom has accepted that the item complies with minimum conditions for connection to its network. It indicates no endorsement of the product by Telecom, nor does it provide any sort of warranty. Above all, it provides no assurance that any item will work correctly in all respects with another item of Telepermitted equipment of a different make or model, nor does it imply that any product is compatible with all of Telecom's network services.

2 This equipment is not capable, under all operating conditions, of correct operation at the higher speeds for which it is designed. Telecom will accept no responsibility should difficulties arise in such circumstances.

3 Some parameters required for compliance with Telecom's Telepermit requirements are dependent on the equipment (PC) associated with this device. The associated equipment shall be set to operate within the following limits for compliance with Telecom's Specifications:
   a. There shall be no more than 10 call attempts to the same number within any 30 minute period for any single manual call initiation, and
   b. The equipment shall go on-hook for a period of not less than 30 seconds between the end of one attempt and the beginning of the next call attempt.

4 Some parameters required for compliance with Telecom's Telepermit requirements are dependent on the equipment (PC) associated with this device. In order to operate within the limits for compliance with Telecom's specifications, the associated equipment shall be set to ensure that automatic calls to different numbers are spaced such that there is not less than 5 seconds between the end of one call attempt and the beginning of another.

5 This equipment shall not be set up to make automatic calls to Telecom's 111 Emergency Service.

6 This device is equipped with pulse dialing while the Telecom standard is DTMF tone dialing. There is no guarantee that Telecom lines will always continue to support pulse dialing.

7 Use of pulse dialing, when this equipment is connected to the same line as other equipment, may give rise to bell tinkle or noise and may also cause a false answer condition. Should such problems occur, the user should NOT contact the telecom Fault Service.

8 This equipment may not provide for the effective hand-over of a call to another device connected to the same line.

9 Under power failure conditions this appliance may not operate. Please ensure that a separate telephone, not dependent on local power, is available for emergency use.
Laser compliance statement

The CD or DVD drive used with this computer is a laser product. The CD or DVD drive's classification label (shown below) is located on the drive.

CLASS 1 LASER PRODUCT
CAUTION: INVISIBLE LASER RADIATION WHEN OPEN. AVOID EXPOSURE TO BEAM.

APPAREIL A LASER DE CLASSE 1 PRODUIT

LCD pixel statement

The LCD unit is produced with high-precision manufacturing techniques. Nevertheless, some pixels may occasionally misfire or appear as black or red dots. This has no effect on the recorded image and does not constitute a malfunction.

Macrovision copyright protection notice

This product incorporates copyright protection technology that is protected by U.S. patents and other intellectual property rights. Use of this copyright protection technology must be authorized by Macrovision, and is intended for home and other limited viewing uses only unless otherwise authorized by Macrovision. Reverse engineering or disassembly is prohibited.
Radio device regulatory notice

Note: Below regulatory information is for models with wireless LAN and/or Bluetooth only.

General

This product complies with the radio frequency and safety standards of any country or region in which it has been approved for wireless use. Depending on configurations, this product may or may not contain wireless radio devices (such as wireless LAN and/or Bluetooth modules). Below information is for products with such devices.

European Union (EU)

This device complies with the essential requirements of the European Council Directives listed below:

73/23/EEC Low Voltage Directive
- EN 60950-1

- EN 55022
- EN 55024
- EN 61000-3-2/-3

99/5/EC Radio & Telecommunications Terminal Equipment (R&TTE) Directive
- Art.3.1a) EN 60950-1
- Art.3.1b) EN 301 489 -1/-17
- Art.3.2) EN 300 328-2
- Art.3.2) EN 301 893 *applies to 5 GHz only

![CE] (for 5 GHz device)
List of applicable countries

EU member states as of May 2004 are: Belgium, Denmark, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal, Finland, Sweden, United Kingdom, Estonia, Latvia, Lithuania, Poland, Hungary, Czech Republic, Slovak Republic, Slovenia, Cyprus and Malta. Usage allowed in the countries of European Union, as well as Norway, Switzerland, Iceland and Liechtenstein. This device must be used in strict accordance with the regulations and constraints in the country of use. For further information, please contact local office in the country of use.

The FCC RF safety requirement

The radiated output power of the wireless LAN Mini PCI Card and Bluetooth card is far below the FCC radio frequency exposure limits. Nevertheless, the notebook PC series shall be used in such a manner that the potential for human contact during normal operation is minimized as follows:

1. Users are requested to follow the RF safety instructions on wireless option devices that are included in the user's manual of each RF option device.

**Caution:** To comply with FCC RF exposure compliance requirements, a separation distance of at least 20 cm (8 inches) must be maintained between the antenna for the integrated wireless LAN Mini PCI Card built in to the screen section and all persons.

**Note:** The Acer wireless Mini PCI adapter implements a transmission diversity function. The function does not emit radio frequencies simultaneously from both antennas. One of the antennas is selected automatically or manually (by users) to ensure good quality radio communication.
2 This device is restricted to indoor use due to its operation in the 5.15 to 5.25 GHz frequency range. FCC requires this product to be used indoors for the frequency range 5.15 to 5.25 GHz to reduce the potential for harmful interference to co-channel Mobile Satellite systems.

3 High power radar are allocated as primary users of the 5.25 to 5.35 GHz and 5.65 to 5.85 GHz bands. These radar stations can cause interference with and/or damage this device.

4 An improper installation or unauthorized use may cause harmful interference to radio communications. Also any tampering of the internal antenna will void the FCC certification and your warranty.

Canada — Low-power license-exempt radio communication devices (RSS-210)

a Common information
   Operation is subject to the following two conditions:
   1. This device may not cause interference, and
   2. This device must accept any interference, including interference that may cause undesired operation of the device.

b Operation in 2.4 GHz band
   To prevent radio interference to the licensed service, this device is intended to be operated indoors and installation outdoors is subject to licensing.

c Operation in 5 GHz band
   • The device for the band 5150-5250 MHz is only for indoor usage to reduce potential for harmful interference to co-channel Mobile Satellite systems.
   • High power radars are allocated as primary users (meaning they have priority) of 5250-5350 MHz and 5650-5850 MHz and these radars could cause interference and/or damage to LELAN (Licence-Exempt Local Area Network) devices.
Federal Communications Comission
Declaration of Conformity

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Hereby declare that:

Product: Personal Computer
Trade Name: Acer
Model Number: ZH3
Machine Type: Ferrari 1000
SKU Number: Ferrari 100xxx (“x” = 0~9, a ~ z, or A ~ Z)

Is compliant with the essential requirements and other relevant provisions of the following EC directives, and that all the necessary steps have been taken and are in force to assure that production units of the same product will continue comply with the requirements.

EMC Directive 89/336/EEC as attested by conformity with the following harmonized standards:
- EN61000-3-2:2000, Class D
- EN55013:2001 + A1:2003 (applied to models with TV function)
- EN55020:2002 + A1:2003 (applied to models with TV function)

Low Voltage Directive 73/23/EEC as attested by conformity with the following harmonized standard:
- EN60950-1:2001
- EN60065:2002 (applied to models with TV function)

Council Decision 98/482/EC (CTR21) for pan-European single terminal connection to the Public Switched Telephone Network (PSTN).

RoHS Directive 2002/95/EC on the Restriction of the Use of certain Hazardous Substances in Electrical and Electronic Equipment
R&TTE Directive 1999/5/EC as attested by conformity with the following harmonized standard:

- **Article 3.1(a) Health and Safety**
  - EN60950-1:2001
  - EN50371:2002

- **Article 3.1(b) EMC**
  - EN301 489-1 V1.4.1:2002
  - EN301 489-17 V1.2.1:2002
  - EN301 489-3 V1.4.1:2002 (Applied to models with 27MHz wireless mouse/keyboard)
  - EN301 489-7 V1.2.1:2002 (Applied to models with 3G function)
  - EN301 489-24 V1.2.1:2002 (Applied to models with 3G function)

- **Article 3.2 Spectrum Usages**
  - EN300 328 V1.5.1:2004
  - EN301 893 V1.2.3:2003
  - EN300 220-1 V1.3.1:2000 (Applied to models with 27MHz wireless mouse/keyboard)
  - EN300 220-3 V1.1.1:2000 (Applied to models with 27MHz wireless mouse/keyboard)
  - EN301 511 V9.0.2:2003 (Applied to models with 3G function)
  - EN301 908-1 V2.2.1:2003 (Applied to models with 3G function).
  - EN301 908-2 V2.2.1:2003 (Applied to models with 3G function).
