Watching TV
Cable / Satellite / Fiber with a box
Initial setting

1. Connecting
Select the wiring method connecting your box to the TV, AV IN or Antenna/Cable in.
Tip: HDMI will provide the best HD picture

2. Change INPUT
Press the INPUT button to select the proper connection. Wait 2 seconds.

3. Power on your Cable, Satellite or Fiber box
Use the box's remote control to change channels.

* If the box is connected to the TV using a COAX cable (Antenna/Cable in), then set the TV channel to CH3 or CH4. Note that the picture will not be in HD.

* CC/SAP is not available when watching TV with a Cable or Satellite box connected via HDMI.
* If your box is a high definition, then check that it is outputting 720p or 1080i signal.
  Tip: press the TV's INFO button to verify.
* Check your box "aspect" or "format" settings. It should be set to 16:9, Widescreen or FULL.
* If the audio volume is too low, check the box's audio settings.
* Contact your Cable or Satellite provider for instructions on any box settings.
Watching TV
Antenna / Cable service without a box
Initial setting

1. Connect coax
Connect a COAX wire from either an antenna or Basic Cable service to the TV's "ANTENNA/CABLE IN" screw terminal.

2. Scan the channel

MENU → Setup > ANT/Cable setup > ANT in, Auto program

1. Select Programming source Cable or Antenna in Ant in.
2. Select Auto program and select scan mode (All channels / Analog only / Digital only).

* If at the end of the scanning no channels are found, then check: Antenna's position - or Availability of Cable service. Cable, Satellite or Fiber services with a box are typically connected to the TV's A/V inputs, preferably HDMI, for best HD picture. In such a case, the channel scanning is not needed (set ANT IN to Not used).
Watching TV
Antenna / Cable service without a box
Select channels

- Select desired channel

or

- CH buttons are also available on the TV.

- Select desired digital channel

To directly enter a digital channel number use 

- When turning to a digital channel, press the button to enter the minor number in a compound channel number.
  (e.g. CH15-1 → 15 5 15)
Watching TV
Antenna / Cable service without a box
Favorite channels (Set)

Channel numbers registered in Favorite are displayed on the favorite tune screen. Select the desired broadcast station with the cursor or use the number buttons.

- Favorite channels cannot be set when using Cable or Satellite box

- **Set the Favorite channel**

  ![OPTION] → **Options menu** > **Set favorite**

  Select the list number using ▲ / ▼ and ✂ or directly to save the displayed channel.

- **Delete a Favorite channel**

  ![OPTION] → **Options menu** > **Set favorite**

  Select the list number using ▲ / ▼ and ✂ (press and hold) to delete.

* To change the page in **Set favorite**

  ![FAVORITE] or ▲ / ▼ repeatedly
Watching TV
Antenna / Cable service without a box
Favorite channels (Display)

Channel numbers registered in Favorite are displayed on the favorite tune screen. Select the desired broadcast station with the cursor or use the number buttons.

- Favorite channels cannot be set when using Cable or Satellite box.

**To display a Favorite channel**

![FAVORITE] Favorite channels

Select the list number using △ / ▽ and or directly to displayed on favorite screen.

* To change the page in Favorite channels

![FAVORITE] or ▲ / ▼ repeatedly
Watching TV

Closed caption

Viewing with Closed caption

Switches the Closed caption mode.
(Closed caption Off / Closed caption On / Closed caption On mute)

* CC is not available when watching TV with a Cable or Satellite box connected via HDMI.
* Contact your Cable or Satellite operator for instructions on enabling CC with their box.
* The TV’s CC button does not operate the Satellite or Cable box's CC function.
* For viewing the CC of digital broadcasting, set the aspect to FULL (If viewing with H-FILL, JUST, ZOOM or 4:3; characters might be cut off).
* If the CC is set to On on both the receiver and TV when the signal is 480i (except for the HDMI connection), the CC may overlap on the TV.
* If a digital program is being output in analog format, the CC data will also be output in analog format.
* If the recorder or output monitor is connected to the TV, the CC needs to be set up on the recorder or output monitor.
Watching TV
Antenna / Cable service without a box
SAP

Listen with SAP (Secondary Audio Programming)

- SAP is not available when watching TV with a Cable or Satellite box connected via HDMI.
- Contact your Cable or Satellite operator for instructions on enabling SAP with their box.
- The TV's SAP button does not operate the Satellite or Cable box's SAP function.

Select the Audio mode for watching TV.

Digital mode: Select available audio service when receiving a digital channel. Audio track is automatically selected as DTV language and SAP settings in Audio menu.

Menu > Audio > DTV language and SAP settings

- If you change the audio settings with the SAP button, the DTV language and SAP settings will not change.

Audio track 1 of 7 ➔ Track number / Number of tracks

English (Main Audio) ➔ Current audio track information (language, audio type)

English audio ➔ Audio service information

(example)

Analog mode: Select the desired Audio mode. (Stereo / SAP / Mono)
Watching TV
Antenna / Cable service without a box
Other

1. Information banner
Displays TV status information. Also, when watching programs via the Antenna/Cable input, INFO will include the channel banner.

 INFO

Channel / Station identifier / Program title / Closed caption / SAP / Rating level / Signal resolution / Picture mode / Aspect ratio / Sleep timer remaining time / Clock

2. Options menu
This menu consists of shortcuts to convenient functions.

 OPTION

 Channel surf mode: Specify favorites or type of channels to view when pressing the channel up/down button.
 Set favorite: Set favorite channel
 Edit CH caption: Edit the channel identifier
 Signal meter: Check the antenna's signal strength

* Options menu is only available when the TV is using the Antenna/Cable input, not when using Cable or Satellite box.
Watching TV
Blu-ray, DVD, Game Console, etc.
Connecting and viewing (1)

1. Connect device

Verify that the device is connected to the TV properly and connect to desired terminal. Note which terminal the device is connected to (HDMI 1, HDMI 2,... Component or Video)

Component and Composite (Video) in terminals are shared.
Please be careful not to confuse the connection when you use Component or Video.
Watching TV
Blu-ray, DVD, Game Console, etc.
Connecting and viewing (2)

2. Select Input

1. Display **Input select** menu (With the connected equipment turned ON)

   ![INPUT]

2. Select the input used in step 1

   Select correct input source, using ▲ / ▼ and press ✅
   You can also press the corresponding NUMBER button or press **INPUT** repeatedly to cycle through the available inputs. If you are unsure which input to select, wait 2 seconds between each selection.

   ![Component and Composite (Video) IN terminals are shared and must be connected using the supplied adapter. NOTE: One red connector is for video and the other audio.
   You need to select **Video** or **Component**. (Default: **Video**)
   - Press **INPUT** and select **Video **<->** Comp.**
   - Press ▲ / ▼ to choose Video or Component.

   ![For your convenience, you can edit the inputs with labels that are easy to remember.

   ![Edit Labels Set ANT/Cable in](image)

3. Operate using your device's remote control.
Watching TV
Blu-ray, DVD, Game Console, etc.
HDMI connection notice

HDMI (high-definition multimedia interface) allows you to enjoy high-definition digital images and high-quality sound by connecting the TV unit and HD devices. HDMI-compatible equipment (*1) with an HDMI or DVI output terminal, such as a Cable or Satellite box or a DVD player, can be connected to the HDMI connector using an HDMI compliant (fully wired) cable.

- HDMI is the world's first complete digital consumer AV interface complying with a non-compression standard.
- If the external equipment has only a DVI output, connect to the HDMI terminal via a DVI to HDMI adapter cable (*2).
- When the DVI to HDMI adapter cable is used, connect the audio cable to the audio input terminal.
- Audio settings can be made on the HDMI in menu screen. Applicable audio signal sampling frequencies (L.PCM): 48 kHz, 44.1 kHz, 32 kHz

(*1): The HDMI logo is displayed on an HDMI-compliant device.
(*2): Inquire at your local digital equipment retailer shop.
Caution

- The HDMI terminals on this TV were not specifically designed for use with a PC.
- If the connected device has an aspect adjustment function, set the aspect ratio to "16:9".
- The HDMI connectors are "type A".
- The HDMI connectors are compatible with HDCP (High-Bandwidth Digital Content Protection) copyright protection.
- Devices with no digital output terminal may be connected to the input terminal of either "COMPONENT IN", or "VIDEO IN" to receive analog signals.
- The HDMI input terminal can be used only with the following video signals: 480i, 480p, 720p, 1080i and 1080p. Ensure that the device being connected to the TV can produce one of these video signals.
Watching TV
Blu-ray, DVD, Game Console, etc.
Input signal

- Signals other than below may not be displayed properly.
- The signals are reformatted for optimal viewing on your display.

Watching TV
For best picture
Picture mode

1. Change picture mode to suite your settings and taste
   1. Select **Picture mode**

      🔄 **MENU**  ➔ **Menu > Picture > Picture mode**

      Select desired menu using ▲ / ▼ from menu bar and press OK

   2. Adjust using ◀ / ▶

      **Tip:** HDMI will provide the best HD picture

2. Picture mode type

   **Vivid:** Provides enhanced picture contrast and sharpness for viewing in a well-lit room.

   **Standard:** Recommended for normal viewing conditions with subdued room lighting.

   **Cinema:** For watching movies in a darkened room. It provides a soft, film-like picture.

   **Game:** For playing video games.

   **Custom:** Customizes each item according to your taste.

   Photo is displayed in JPEG menu.
Watching TV
For best picture
Auto brightness (ECO)

Contrast Automatic Tracking System (C.A.T.S.) adjusts the screen brightness and contrast according to the room's ambient light conditions. This ECO feature automatically dims the brightness of the screen when the room lighting is lowered.

C.A.T.S. features a built-in delay when the lighting conditions change. The adjustment happens gradually.

If you prefer a consistent brightness, disable C.A.T.S. by:
- Menu > Picture > scroll down to C.A.T.S. and turn it off.

Or
- Menu > Picture > Picture mode then select viewing mode such as Custom.

* Standard picture mode automatically sets C.A.T.S. to On.
Watching TV
For best picture
Aspect

1. Use FORMAT button to change the aspect ratio
Use when the picture has bars (sides or top/bottom) and to zoom.

FORMAT ( to cycle through the aspect modes )

480i, 480p: FULL/JUST/4:3/ ZOOM
1080p, 1080i, 720p: FULL/H-FILL/JUST/4:3/ZOOM

* Use when the picture does not fill the whole screen or portions of the picture are trimmed.
* Some content, such as film-based movies, are available in extra-wide format. Top and bottom bars are unavoidable.
* Connected devices, such as Cable/Satellite box, DVD/Blu-ray players and game consoles have their own aspect (format) settings. Adjust the device’s aspect settings.
Watching TV
For best picture
Aspect info.

- **FULL**: Enlarges the 4:3 image horizontally to the screen's side edges.
  (Recommended for anamorphic picture)
- **JUST**: Stretches to justify the 4:3 image to the four corners of the screen.
  (Recommended for normal TV broadcast)
- **H-FILL**: Enlarges the 4:3 image horizontally to the screen's side edges. The side
  edges of the image are cut off.
- **4:3**: Standard (Note that "Image retention" of the side bar may occur from
  displaying it for a long time.)
- **ZOOM**: Enlarges the 4:3 image to the entire screen.
  (Recommended for Letter Box)

## Zoom adjustments
Vertical image position and size can be adjusted in "ZOOM"

1. Select **Zoom adjustments** in the **Picture** menu.

   ![MENU]
   Picture > Aspect adjustments > Zoom adjustments

2. **V-position**: Vertical position adjustment
   Adjust using △/▽ to desired position.

3. **V-size**: Vertical size adjustment
   Adjust using ◀/▶ to desired size.

* Press OK to reset

![Menu](image)

**Settings** | **Options** | **Description**
--- | --- | ---
A.I. sound | Off/On | • Equalizes overall volume levels across all channels and external inputs.
Surround | Off/On | • Enhances audio L/R response when listening to stereo. Ideal for music and action movies.
Bass boost | Off/On | • Enhances bass sound and provides powerful sound.
Volume leveler |  | • Minimizes volume disparity after switching to external inputs.
TV speakers | Off/On | • Enables the TV's built-in speakers.
|  | • Switches to "Off" when using external speakers.
|  | • "A.I. sound", "Surround", "Volume leveler", and "Distance to wall" do not work if "Off" is selected.
HDMI in | Digital/ Comp./Video | • The default setting is "Digital" for the HDMI connection. (Digital input signal)
|  |  | • Select audio input terminal when a DVI cable is connected along with an analog audio input signal.
Watching TV

3D

Notice

The following 3D content can be enjoyed on this TV:

- A 3D Blu-ray disc, played on 3D capable Blu-ray player/recorder that is connected via HDMI cable
- 3D TV broadcast (program)
- 3D Photo and 3D Movie taken by LUMIX/Camcorder.
- 3D game played on 3D capable video game console, connected via HDMI cable.
- 2D → 3D (Simulated 3D)

About 2D → 3D

* You can watch content in simulated 3D from photo and all video sources except the PC input.
* This function converts standard 2D images and displays them in 3D. For this reason, the 3D images appear slightly different from the originals. Please bear this in mind when using this function.
* Using this function for profit-making purposes, or publically showing images converted from 2D to 3D in places such as coffee shops or hotels etc. may infringe on the rights of the copyright holder protected under the Copyright Act.
Watching TV
3D
Viewing 3D

1. Put on the 3D Eyewear
2. View

When the TV receives a 3D signal, it also tries to detect the 3D mode (format). 3D images are automatically displayed according to the signal. If the 3D images are not displayed correctly or the images cause discomfort, the images can be adjusted by 3D format select or 3D settings.
Watching TV

3D

Change 3D ⇔ 2D

■ Simply switches 3D ⇔ 2D images (Auto mode)

3D → 3D format select

Switch 3D or 2D using △ / ▽ and press OK

■ Change 3D format (Manual mode)

1. Display 3D format select (Manual)

3D → 3D format select (Manual)

2. Select 3D format

3D → Cycle through the 3D format

(Native/Frame sequential (3D)/Frame sequential (2D)/Side by side (3D)/Side by side (2D)/Top and bottom (3D)/Top and bottom (2D)/2D → 3D)
**Watching TV**

**3D**

Adjust 3D images

1. Select **3D settings**

   Menu > Setup > 3D settings

2. Select the item and set

   Select desired menu using ▲ / ▼ and adjust the settings with ◀ / ▶

* The perceived three dimensional effects of the 3D Eyewear differ from person-to-person.

* If a signal received from an external device is different from the 3D setting of the TV, such as 2D signal when the TV is set to 3D mode, the images may not be displayed correctly.

Internet services "VIERA Connect"
Connect to network
Network connections (1)

1. Contact your Broadband service provider
   If you don't have Internet service from your local provider, please order a high-
   speed Internet service at no less than the connection speed below. If you already
   have this service, make sure that the connection speed exceeds the following:
   
   • Required speed (effective): at least 1.5 Mbps for SD and 6 Mbps for HD picture
     quality, respectively.
   • Dial-up Internet service cannot be used for VIERA Connect.

2. Select wired or wireless connection
   If the Cable/DSL modem is close to the TV and you have only one TV set, you may
   choose a wired connection.
   If the Cable/DSL modem is far from the TV and/or you have more TVs in the
   house, you may want to use a wireless network.
Internet services "VIERA Connect"
Connect to network
Network connections (2)

3. Connecting to the Internet

A. Wireless connection

If you are using the network for connecting various pieces of equipment and want to connect the TV, you could also use a Wireless LAN and Access point to connect the TV to the Internet.

* To use only DLNA features, you can operate the features without Broadband network environment.
You can just connect the TV directly to the equipment with a LAN cross cable.
B. Wired connection (Directly connected)

If you are not using the network for connecting anything else but the TV, you can just connect the TV directly to the Cable/DSL Ethernet modem with LAN cable.
Internet services "VIERA Connect"
Connect to network
Network connections (4)

C. Wired connection (Using Router)
If you are using the network for connecting various pieces of equipment and want to connect the TV, you should use a router to connect the TV to the Internet with LAN straight cable.

* To use only DLNA features, you can operate the features without Broadband network environment.
You can just connect the TV directly to the equipment with a LAN cross cable.
Internet services "VIERA Connect"
Network settings
Setting menu

This menu is used for connecting to a Broadband environment.

1. Display the Menu and select Network

MENU ➔ Menu > Network

Select Network using △ / ▽ from menu bar and press OK

2. Select the options and set

(Connection test/Network connection/Wireless network settings/
IP address/DNS settings/Network link/Software update/
New software notice/Network status)
Internet services "VIERA Connect"
Network settings
Connection test

■ Connection test
Check that the all Network settings, and then start Connection test

① Select Connection test using △ / ▽ and press OK
   (It takes a while to cancel the test.)

② Displayed Connection test screen
   • Check mark appears at front of each check item's box when check has been finished successfully.

③ Complete Connection test
   Success ➔ Completion screen is displayed.
   Error ➔ Follow the directions on screen to complete the setting.
   If you perform the Proxy settings, check the Proxy address and the Proxy port number.

Network settings
Network connection

Network connection

1. Select **Network connection** using ▲ / ▼
2. Select Network type *(Ethernet cable/Wireless (WiFi))* with ◄ / ►
Internet services "VIERA Connect"
Network settings
Wireless network settings

Wireless network settings

1. Select Wireless network settings with △ / ▽ and press OK.
2. Display Wireless networks and select access point.
   Or select connection method (below) with color key and follow the directions on screen to complete the setting.

- **WPS (push button):**
  You can connect to the access point by pressing a connection button.

- **WPS (PIN):**
  Set the PIN code that is displayed on the TV on the access point.

- **Manual settings:**
  Manually set SSID, security type, and encryption type to match the settings of the access point to which to connect.

- **Search again:**
  Search again an available wireless network within the range.

* Wi-Fi Protected Setup is an easy setting of the Wi-Fi Alliance's certification.
* For more details on setting of an access point, please refer to operating manual for the access point.
* When connecting by 11n (5 GHz), select "AES" as the encryption type for the wireless LAN.
Internet services "VIERA Connect"
Network settings
IP address/DNS settings

- **IP address/DNS settings**
  1. Select **IP address/DNS settings** using ▲/▼ and press OK.
  2. Displayed **IP address/DNS settings**
  3. Select **IP setting mode** / **DNS setting mode** using ▲/▼ and select **Automatic** with ▲/▼.
  4. Each IP address is acquired automatically.

If you are using a Broadband router, IP automatic acquisition in DHCP can be used under normal circumstances. If you are not sure, check with the person who installed the equipment, or check the instructions for each device.

- **Manual setting**
  1. On ③ above, Select **IP setting mode** / **DNS setting mode** using ▲/▼ and select **Manual** with ▲/▼.
  2. Select the item.
  3. Check the specifications of the Broadband router and enter each IP address. Or Enter each IP address as specified by the provider.
Internet services "VIERA Connect"
Network settings
Proxy settings

- **Proxy settings**
Set only if specified by the provider. It is not required for normal household use.

  1. Select **IP address/DNS settings** using ▲ / ▼ and press OK
  2. Select **Proxy setting** using ▲ / ▼ and press OK
  3. Select the item and press OK
  4. Enter address or port number and press OK

**Proxy address**
This is the address of the relay server that is connected to the target server instead of the browser and sends data to the browser. Setting is only required if specified by the provider.

**Proxy port**
This number is specified by the provider together with the Proxy address.

Network status

- **Network status**
  Displayed Current settings and status screen.
  
  ① Select **Network status** using ▲ / ▼ and press OK
  ② Display **Network status** screen

  * Displayed items differ depending on the type of network connection.
Internet services "VIERA Connect"
How to use
Operate

1. Access to VIERA Connect

INTERNET  →  VIERA Connect

2. Select and Enjoy Internet Service

(Example)

Select the desired item using ▲ / ▼ / ◀ / ◁ and press OK

- USB keyboard is available. Set Keyboard type in Setup menu.
  (Game pad is also available.)

* You need a Broadband environment to use this service.
* Please confirm Network connections and Network settings before using this function.
* Depending on the usage conditions, it may take a while to download all the data.
* Internet services available in VIERA Connect are subject to change without notice.
* Not all VIERA Connect contents are available depending on the country and area.
* 3D images are not displayed on the center of the home screen depending on the signal.
* Video communication (e.g. Skype™) requires an exclusive Communication Camera TY-CC20W.
Home network "DLNA"
Get started
Information

You can share the contents (Photo, Video, Music etc.) stored in DLNA Certified media server with your home network system.

- Please confirm **Network connection** and **Network menu settings** before use this function.

This TV is a DLNA Certified™ product.

DLNA (Digital Living Network Alliance) is a standard that makes DLNA Certified digital electronics easier and more convenient to use on a home network. To learn more, visit www.dlna.org. It allows you to share photos, videos and music stored in the DLNA Certified media server (for example, PC with Windows 7 installed, etc.) connected to your home network, and enjoy the contents on the TV screen.

■ **Media server**

Store photos, videos or music into the DLNA Certified media server, and then you can enjoy them on the TV.

**To use a PC as a media server**

Prepare the PC with Windows 7 or ensure the server software is installed on the PC. "Windows 7" is the server software that has been tested for compatibility with this TV (as of January, 2011). Any other server software have not been tested with this TV, therefore compatibility and performance cannot be assured.

- Windows 7

The setup for homegroup settings of Windows 7 is required. For details, refer to the help functions of Windows 7.

Data information

Notice

- Format the card with the recording equipment.
- The picture may not appear correctly on this TV depending on the recording equipment used.
- Some files may not be played back even if they fulfill these conditions.
- Depending on how you make SD Card, USB Flash Memory or the media server, files and folders may not be displayed in the order you numbered.
- Depending on how you create the files and the structure of folders, the files and folders may not be displayed.
- When there are many files and folders, operation may take time to complete or some files may not be displayed or playable.
- The function cannot display still images that are not DCF formatted (i.e. TIFF, BMP).
- Data modified with a PC may not be displayed.
- Images imported from a PC must be compatible with EXIF 2.0, 2.1 and 2.2.
- Partly degraded files might be displayed at a reduced resolution.
- All ".JPG" extension data in the SD card and USB flash memory will be read in Photo Viewer Mode.
- The folder and file names may be different depending on the digital camera used.
- Do not use two-byte characters or other special codes.
- The card may become unusable with this TV if file or folder names are changed.
- For the suitable SD Memory Cards, please confirm the latest information on the following website.
  http://panasonic.jp/support/global/cs (This site is in English only)
You can view still and motion images and play music saved on a USB flash memory and an SD card.

**SD card**
- When you use an SD card, gently insert with label surface facing front.
- When you remove the SD card, press in lightly then release.

- Compliant card type (maximum capacity):
  SDXC Card (64 GB), SDHC Card (32 GB), microSDHC Card (32 GB), SD Card (2 GB), miniSD Card (2 GB), microSD Card (2 GB)
  (requiring microSDHC Card/miniSD Card/microSD Card/ adapter)

- If a microSDHC Card, miniSD Card or microSD Card is used, insert / remove it together with the adapter.

**USB flash memory**
- When you use a USB device, insert straight in and pull straight out.
- Media player only supports USB Mass storage class devices.

SD card handling cautions

- Use an SD Card meeting SD standards. If not, it may cause the TV to malfunction.
- Do not remove the card while the unit is accessing data (this can damage card or unit).
- Do not touch the terminals on the back of the card.
- Do not subject the card to high pressure or impact.
- Insert the card in the correct direction (otherwise, card or unit may be damaged).
- Electrical interference, static electricity or erroneous operation may damage the data or card.
- Back up the recorded data at regular intervals in case of deteriorated or damaged data or erratic operation of the unit. (Panasonic is not liable for any deterioration or damage of recorded data.)

Caution
The V-Chip system used in this set is capable of blocking "NR" programs (non rated, not applicable and none) as per FCC Rules Section15.120(e)(2). If the option of blocking "NR" programs is chosen "unexpected and possibly confusing results may occur, and you may not receive emergency bulletins or any of the following types of programming:"

- Emergency Bulletins (Such as EAS messages, weather warnings and others)
- Locally originated programming • News • Political • Public Service Announcements • Religious • Sports • Weather

Closed caption

Closed caption notice

- For viewing the CC of digital broadcasting, set the aspect to FULL (If viewing with H-FILL, JUST, ZOOM or 4:3, characters might be cut off).
- The CC can be displayed on the TV only when the receiver (such as a Cable box or satellite receiver) has the CC set to ON within the device itself. Check with your Cable or Satellite provider for instructions. The TV's CC button does not operate the Satellite or Cable box's CC function.
- If the CC is set to ON on both the receiver and TV when the signal is 480i (except for the HDMI connection), the CC may overlap on the TV.
- If a digital program is being output in analog format, the CC data will also be output in analog format.
- If the recorder or output monitor is connected to the TV, the CC needs to be set up on the recorder or output monitor.
Convenience features
VIERA Link ™ "HDAVI Control ™"
Basic feature

Simultaneously control all Panasonic "HDAVI Control" equipped components using one button on the TV remote. Enjoy additional HDMI Inter-Operability with compatible Panasonic products. This TV supports "HDAVI Control 5" function. Connections to equipment (Blu-ray Disc player, DVD recorder DIGA, HD Camcorder, Home Theater System, Amplifier, etc.) with HDMI cables enables VIERA Link controls.

|                                   | Audio Return Channel (ARC) is a function that enables digital sound signals to be sent via an HDMI cable back from the TV to a connected audio device. |
Convenience features
VIERA Link™ "HDAVI Control™"

Connecting note (1)

When adding new equipment...
When adding new equipment, reconnecting equipment or changing the setup after the connection, turn the equipment on and then switch the TV on. Set the input mode to correct HDMI terminal, and make sure that the image is displayed correctly.

VIERA Link "HDAVI Control", is based on the control functions provided by HDMI and industry standard known as HDMI CEC (Consumer Electronics Control), with unique function that we have developed and added. As such, its operation with other manufacturers' equipment that supports HDMI CEC cannot be guaranteed. Please refer to the individual manuals for other manufacturers' equipment supporting the VIERA Link function.

HDMI cable
This function needs an HDMI compliant (fully wired) cable. Non-HDMI-compliant cables cannot be utilized. It is recommended that you use Panasonic's HDMI cable. Recommended part number:

RP-CDHS15 (4.9 ft/1.5 m), RP-CDHS30 (9.8 ft/3.0 m), RP-CDHS50 (16.4 ft/5.0 m)

- For more details on the external equipment's connections, please refer to the operating manual for the equipment.
Convenience features
VIERA Link ™ "HDAVI Control ™"
Connecting note (2)

HDMI connections to some Panasonic equipment allow you to interface automatically.

- This function may not work normally depending on the equipment condition.
- The equipment can be operated by other remote controls with this function on, even if the TV is in Standby mode.
- Image or sound may not be available for the first few seconds when playback starts.
- Image or sound may not be available for the first few seconds when input mode is switched.
- Volume function will be displayed when adjusting the volume of the equipment.
- If you connect equipment that has "HDAVI Control 2" or later function to the TV with an HDMI cable, the sound from the DIGITAL AUDIO OUT terminal can be output as multi-channel surround.
- "HDAVI Control 5" is the newest standard (current as of November, 2011) for the HDAVI Control compatible equipment.
  This standard is compatible with the conventional HDAVI equipment.

If connection (or setting) of equipment compatible with HDAVI control is changed, switch the power of this unit Off and On again while the power of all equipment is On (so that the unit can correctly recognize the connected equipment) and check that the connected equipment playback operates.
Convenience features
VIERA Link ™ "HDAVI Control ™"
VIERA Link connections (1)

■ Connecting Blu-ray Disc player/DVD Recorder (DIGA)
Connect the HDMI terminal of this TV to the DVD recorder (DIGA) with VIERA Link function using a fully wired HDMI cable.
- You can use any HDMI terminal on this TV.

![Diagram showing TV, HDMI, HDMI cable, and DVD recorder (DIGA) with VIERA Link function]
Convenience features
VIERA Link ™ "HDAVI Control ™"
VIERA Link connections (2)

■ Connecting Home theater system/AV amp

HDMI and Audio connection.
Connect the HDMI terminal and DIGITAL AUDIO OUT to Home Theater System/AV amp with VIERA Link function using each fully wired HDMI cable and Optical audio cable.

- HDMI 2 is recommended.
- No optical cable is necessary when connecting a Home Theater supporting "HDAVI control 5" with an HDMI cable.
  Audio will be supported via ARC (Audio Return Channel)
- One AV amp and one Blu-ray Disc player/DVD recorder (DIGA) can be operated with this unit by connecting with an HDMI cable.
Convenience features
VIERA Link ™ "HDAVI Control ™"
VIERA Link connections (3)

■ Connecting an HD Camcorder/Digital camera
Press INPUT and select an available HDMI terminal, then connect the HD camcorder/Digital camera with VIERA Link function to this input with fully wired HDMI/mini HDMI cable.

- Individual HDMI equipment may require additional menu settings specific to each model. Please refer to their respective manuals.
- When audio from other equipment connected to this unit via HDMI is output using "DIGITAL AUDIO OUT" of this unit, the system switches to 2CH audio. (When connecting to an AV amp via HDMI, you can enjoy higher sound quality.)
- Some devices use Mini-HDMI terminal. HDMI (type A) to Mini-HDMI (type C) cable or adapter should be used.
Convenience features
VIERA Link™ "HDAVI Control™"

VIERA Link settings

To use all VIERA Link functions: After everything is connected, set VIERA Link to On in VIERA Link settings menu.
Some features are disabled depending on the "HDAVI Control" version of the equipment.

1. Display the menu

MENU ➔ Menu

2. Select VIERA Link settings

Setup > VIERA Link settings
Select Setup using △ / ▽ from menu bar and press OK then select VIERA Link settings with △ / ▽ and press OK again.

3. Select VIERA Link and set to On
Change the VIERA Link to On with ▲ / ▼

4. Select and set other VIERA Link settings

(Power on link/Power off link/Energy saving mode/Unselected device energy save /Default speakers)
Convenience features
VIERA Link ™ "HDAVI Control ™"
VIERA Link settings feature (1)

■ Automatic Input Switching
When using a Blu-ray Disc player, DVD player/recorder or Home theater system, the TV will automatically change to the appropriate input, when playback begins on one of those devices.
  • For a Home Theater System the speakers automatically switch to the theater system.

■ Power on link
Yes: The TV is turned on automatically and switches to the appropriate HDMI input whenever VIERA Link compatible equipment is initially turned on and the Play mode is selected.

■ Power off link
When Yes is selected and the TV is turned off, all connected VIERA Link compatible equipment is also automatically turned off.
  • A Panasonic DVD Recorder will not turn off if it is still in Rec mode.
  • The TV remains on even if the VIERA Link compatible equipment is turned off.
Convenience features
VIERA Link ™ "HDAVI Control ™"
VIERA Link settings feature (2)

■ Energy saving mode

Quick Start: When TV is turned off, all connected VIERA Link compatible equipment is moved to ECO Standby mode* automatically under these conditions.

- Power off link: (Yes), The connected equipment has "HDAVI Control 4 or later (with Quick Start mode)"

* Minimum power consumption of Standby condition for the equipment.

■ Unselected device energy save

Yes: The connected VIERA Link compatible equipment will be turned off automatically when not in use under these conditions.

- The connected equipment has "HDAVI Control 2 or later" (for available equipment only)

  [ Example of timing for operation ]

- When the input is switched from HDMI.

■ Default speakers

TV is the default setting. To set the Home theater system as Default speakers, change the Default speakers setting from TV to Theater. Sound will be output from the Home Theater whenever the TV is powered on.
Convenience features
VIERA Link ™ "HDAVI Control ™"
VIERA Link settings feature (3)

■ Automatic lip-sync function
Minimizes time delay between the picture and audio when you connect to a Panasonic theater system or Amplifier.

■ TV provided setting information
The following information about the TV settings can be transmitted to each piece of equipment (Recorder/Home theater/Player) that has "HDAVI Control 3 or later" function connected to a TV with an HDMI cable.

<table>
<thead>

* There is a possibility that all the GUI language information might be set from equipment that has an HDMI CEC function connected to the TV with an HDMI cable. Depending on the operating conditions or the specification for each piece of equipment the setting may or may not be applied.
* For more details on the external equipment's operation, please refer to the operating manual for the equipment.
Convenience features
VIERA Link™ "HDAVI Control™"
VIERA Link

Some features are disabled depending on the "HDAVI Control" version of the equipment.

1. Display the VIERA Link menu

   ![VIERA TOOLS]  ➔ VIERA Link

2. Select the item and set (VIERA Link control/Speaker output/Back to TV)
   Select the desired menu using ▲ / ▼ and set with ◀ / ▶

* Items in the VIERA Link menu may be grayed out if no compatible equipment is connected (must be HDAVI Control 2 or later) or if the equipment has not initiated a connection with the TV. In that case, switch the equipment's power Off and On while the TV is On.
Convenience features
VIERA Link ™ "HDAVI Control ™"

VIERA Link menu (1)

You can select the Home theater or TV speakers for audio output. Control the theater speakers with the TV remote control. This function is available only when a Panasonic Amplifier or Player theater is connected.

1. Select **Speaker output** using △ / ▽
2. Select **Home theater** or TV with ◀ / ▶

**Home theater**: Adjustment for the equipment

- VOL(+-) and MUTE buttons are available
- The sound of the TV is muted.
- When the equipment is turned off, the TV speakers take over.
- Selecting **Home theater** turns the equipment on automatically if it is in Standby mode.

**TV**: The TV speakers are on.

### Back to TV

Returns the input selection of the device selected with the VIERA Link Control to the TV input.

Select **Back to TV** using △ / ▽ and press .shapes
Convenience features
VIERA Link ™ "HDAVI Control ™"
VIERA Link menu (2)

■ VIERA Link control only with the TV’s remote control

① Select VIERA Link control using △ / ▽
② Select the desired equipment with ◀ / ▶ (You can select available items only.)

(Recorder/Home theater/Player/Camcorder/LUMIX/Others)

- If there is more than one equipment item, a number after the name indicates the number of items. (e.g. Recorder1/Recorder 2/Recorder 3...)
- The number of equipment items that can be connected is three for recorders, and a total of three for Home Theater/Player/Camcorder/LUMIX/Others.

③ Operate the equipment with the TV remote control, pointing it at the TV

* There is a limit to the number of HDMI connectors.
* To operate the equipment, read the manual for the equipment.
* For available TV remote control buttons, whether or not an operation is available differs depending on the connected equipment.
Convenience features
Control by smartphone, etc.
Smartphone remote

You can use your Smartphone as your TV's remote controller. Download the VIERA remote app. from Apple/Android store.

1. Select Network

You can enjoy your Home Theater by connecting a Dolby Digital (5.1 channel) decoder and "Multi Channel" amplifier to the DIGITAL AUDIO OUT terminals.

- Depending on your DVD player and DVD-Audio software the copyright protection function may operate and disable optical output.
- When an ATSC channel is selected, the output from the DIGITAL AUDIO OUT jack will be Dolby Digital. When an NTSC channel is selected, the output will be PCM.
- When playing a movie on SD Card Movie player, when the sound has been recorded in Dolby Digital, the output from the DIGITAL AUDIO OUT terminal will be Dolby Digital. When the sound is recorded in other formats, the output will be PCM.

Lock (parental control)
Password setting

You need to enter the password when you access locked channels or inputs.

(Input your 4-digit password)

* If it is your first time entering the password, enter the password twice in order to register it.
* Make a note of your password. Do not forget it. (If you have forgotten your password, consult your local dealer.)
* When you select a locked channel, a message will be displayed that allows you to view the channel after you input your password.
"V-chip" technology enables you to lock channels or shows according to standard ratings set by the entertainment industry.

Setup

Closed caption notice

- For viewing the CC of digital broadcasting, set the aspect to FULL (If viewing with H-FILL, JUST, ZOOM or 4:3, characters might be cut off).
- The CC can be displayed on the TV only when the receiver (such as a Cable box or satellite receiver) has the CC set to ON within the device itself. Check with your Cable or Satellite provider for instructions. The TV's CC button does not operate the Satellite or Cable box's CC function.
- If the CC is set to ON on both the receiver and TV when the signal is 480i (except for the HDMI connection), the CC may overlap on the TV.
- If a digital program is being output in analog format, the CC data will also be output in analog format.
- If the recorder or output monitor is connected to the TV, the CC needs to be set up on the recorder or output monitor.

| How do I view the picture from devices such as: Cable/Satellite box, game console, Blu-ray or DVD player? | • Press the **INPUT** button on the remote to select the correct input source.  
  • Check that the device is turned on and functioning correctly.                   |
| Why doesn't the picture look like it is in High Definition?               | • Press the **INFO** button on the remote to confirm the type of signal being received. HD signal should be 720p, 1080i or 1080p.  
  • Select a High Definition channel from your HD source (Cable, Satellite or fiber optic service). HD channels sometimes broadcast non-HD content.  
  • Ensure that your HD source (HD box, Blu-ray player, etc.) is connected to the TV with an HDMI or Component cable and set to output an HD video signal. |
### Support / FAQ

#### FAQ

**Picture - Snowy / none**

<table>
<thead>
<tr>
<th>Questions</th>
<th>Answers</th>
</tr>
</thead>
</table>
| Why is there no picture or just a blue, black or snowy screen being displayed? | • Check if the power cord is plugged in and the TV is turned on (front red LED light should be on; not blinking)  
  • Press the **INPUT** button on the remote to select the correct input source.  
  • Ensure all connections are correct and secure. Especially check for Component and VIDEO connection since these terminals are shared.  
  • When using an external video source, such as a Cable/Satellite box or DVD player, check that the device is on and functioning correctly.  
  • Press **MENU** on the TV's remote control. If the menu is displayed, then the TV is working; recheck above steps. |
| Why is the picture snowy when **ANT/Cable in** is selected?               | • When using a cable service (without a box), check that all connections are secure.  
  • When using a cable or satellite box, change the connection (wiring) to Composite, Component or HDMI.  
  • If you're using an antenna, then check that connections are secure. Change the position or direction of the antenna and check the **Signal meter**. |
### Support / FAQ

#### FAQ

**Picture - Distortion**

<table>
<thead>
<tr>
<th>Questions</th>
<th>Answers</th>
</tr>
</thead>
</table>
| The picture is distorted after selecting the "Video/Comp." input. What should I do? | • Ensure that the device is connected correctly with the supplied Component/AV adapter to the TV’s Video/Component green mini-connector.  
  **NOTE:** One red connector is for video and the other is for audio.  
  • Press **INPUT** and select **Video <-> Comp.**  
  • Press ≤ / ≥ to choose Video or Component. |
| Why do black bars appear on the top and bottom and/or sides of the screen? | • Change the format (aspect ratio) of the picture by pressing the **FORMAT** button on the remote control.  
  • Check the aspect settings on your external video source, such as Cable/Satellite box, DVD/Blu-ray Disc player, etc.  
  **Note:** Some content, such as film-based movies, are available in extra-wide format. Top and bottom bars are unavoidable. |
| Why is the picture chaotic and/or torn and/or with a buzz in the speakers? | • Check if electrical products such as kitchen appliances, fluorescent lights or light dimmers are nearby. They may interfere with the TV’s picture.  
  • Try viewing a picture from another device, such as a DVD player or a game console, to narrow down the source of the problem. |

</thead>
<tbody>
<tr>
<td>Why is there a black box on the screen?</td>
<td>● Change settings of Closed caption (CC).</td>
</tr>
<tr>
<td>Why do some small spots on the screen remain bright or dark?</td>
<td>● The panel is made up of a few million pixels and is produced with advanced technology through an intricate process. Sometimes a few pixels may be bright or dark. These pixels do not indicate a defective panel and will have no impact on the performance of the TV.</td>
</tr>
<tr>
<td>Why is the picture brightness changing?</td>
<td>● Turn the C.A.T.S. feature off.</td>
</tr>
<tr>
<td></td>
<td>Press <strong>MENU</strong> ➔ <strong>Setup</strong> ➔ <strong>Picture</strong> ➔ <strong>C.A.T.S.</strong></td>

### Sound - Unusual

<table>
<thead>
<tr>
<th>Questions</th>
<th>Answers</th>
</tr>
</thead>
</table>
| Why is the sound unusual, distorted, low volume or in another language? | • Check that the correct **SAP** (Secondary Audio Program) is selected by pressing the **SAP** button on the remote control.  
• Check that all connections of external equipment connected to the TV are secure.  
• When using Cable or Satellite box, check the device’s audio settings. (Example: try changing the box’s Audio Range to "narrow") |
| Why is there a clicking, ticking or buzzing sound coming from the TV unit? | • When TV power is turned on or shut off there are electrical components that make a click sound. This is normal operation.  
• Changes in the temperature and humidity of the room may cause thermal expansion and contraction that can produce sounds. This is not a sign of faulty operation or a malfunction. |
## Networking

<table>
<thead>
<tr>
<th>Questions</th>
<th>Answers</th>
</tr>
</thead>
</table>
| How do I get VIERA Connect to work on my TV?                             | 1. You need a broadband (high speed) Internet service with a speed of no less than 1.5 Mbps.  
2. Connect the TV to the Internet through your router by an Ethernet cable or a Panasonic Wireless LAN (built-in).  
3. Run the **Connection test**, under the **Network** menu. If Connection test fails, then check with your Internet service provider or router/modem manufacturer if there are firewall, content filter or proxy settings that may block the TV from accessing the Internet. |
| Can I download new apps (content/services) onto my VIERA Connect TV?      | ● Yes. Select the **VIERA Connect Market** item in the middle bottom of the VIERA Connect home screen. **VIERA Connect Market** allows you to find and install the applications to **VIERA Connect** home screen. |

**FAQ**

**Software update**

<table>
<thead>
<tr>
<th>Questions</th>
<th>Answers</th>
</tr>
</thead>
<tbody>
<tr>
<td>How do I check for the latest software (firmware) version for my TV?</td>
<td>● In the main menu, select <strong>Network</strong>. Select <strong>Software update</strong>. The current version and latest version software will be shown. If software update is grayed out, the TV is not connected to the Internet. If a newer version is available, update your TV. Follow the on screen instructions, do not power off the TV until the update is complete. Be patient; firmware update may take a while.</td>
</tr>
<tr>
<td>How do I get the software update information and download periodically?</td>
<td>● In the main menu, select <strong>Network</strong>. Highlight <strong>New software notice</strong>. Make sure that setting is <strong>On</strong>. When the TV is turned On, update message is displayed if available. Follow the directions on the screen to download.</td>
</tr>

#### FAQ

**3D - Viewing**

<table>
<thead>
<tr>
<th>Questions</th>
<th>Answers</th>
</tr>
</thead>
</table>
2. Press **3D** button directly or press **VIERA TOOLS** button and select **3D**.  
3. In the **3D format select** menu, select **3D**.  
Notes:  
1. 3D Blu-ray discs must be played with a 3D capable Blu-ray player.  
2. Check with your Cable or Satellite provider to make sure their supplied box is 3D capable.  
3. 3D signal must be connected to the TV via an HDMI cable. |
### FAQ

#### 3D - Format

<table>
<thead>
<tr>
<th>Questions</th>
<th>Answers</th>
</tr>
</thead>
<tbody>
<tr>
<td>When selecting some 3D Video content, why are there two pictures next to each other?</td>
<td>● There are a few different 3D formats and the current setting may not match the incoming 3D signal. The format should change automatically, but depending on the source/connection it may not signal the TV properly. To manually select other 3D formats: 1. Press 3D button directly or press VIERA TOOLS button on the TV’s remote control and select 3D 2. In the 3D format select menu, choose another 3D format such as Side by side or Top and bottom. 3. Remember to switch the 3D format setting back to 2D when you go back to viewing a standard 2D signal.</td>
</tr>
<tr>
<td>Why does the left and right Sides of the image seem reversed?</td>
<td>● The 3D format has two different &quot;phases&quot;. Try the other phase: 1. In the main menu, select Setup. Highlight 3D settings and press . 2. In the 3D settings menu, select Left/Right swap.</td>
</tr>
<tr>
<td>Questions</td>
<td>Answers</td>
</tr>
<tr>
<td>--------------------------------------------------------------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>What is the easiest and best way to connect a High-Definition Cable or Satellite box to the TV?</td>
<td>• Use an HDMI cable. It carries both digital video and audio signal in HD. HDMI cable is the only cable needed to connect an HD device to the TV.</td>
</tr>
</tbody>
</table>
| Why does the **CC** button not display Closed caption?                     | • When viewing TV via an HDMI connected device, such as a Cable or Satellite box, CC must be enabled on the device.  
  • Closed caption is available only at supported TV programming. |
| Why does the screen and back cover of the TV get warm?                    | • The main unit radiates heat and some of the parts may become hot. This is normal operation and does not affect the performance of the set.  
  • Ensure good ventilation.  
  • Do not block the ventilation holes of the TV and do not place the TV on top of other equipment. |
<table>
<thead>
<tr>
<th>Questions</th>
<th>Answers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Why is the <strong>ANT/Cable</strong> option at the top of the <strong>Input select</strong> menu grayed-out and unable to be selected?</td>
<td>● During <strong>First time setup</strong>, you indicated in <strong>ANT/Cable setup</strong> that you are using Cable or Satellite box and the box is connected to one of the TV's AV inputs. In this case, the Antenna/Cable input is deactivated to prevent unintentional switching into unused tuner. To re-activate, press <strong>[MENU]</strong>, select <strong>Setup</strong> and repeat <strong>First time setup</strong>.</td>
</tr>
<tr>
<td>Some menu items are grayed-out and unable to be selected. Why?</td>
<td>● Depending on certain modes or the selected input, some options are not available. For example, <strong>Zoom adjustments</strong> are only available when the <strong>Screen format</strong> is changed to <strong>ZOOM</strong> mode.</td>
</tr>
</tbody>
</table>

**FAQ**

**Reset to default**

<table>
<thead>
<tr>
<th>Questions</th>
<th>Answers</th>
</tr>
</thead>
<tbody>
<tr>
<td>How do I reset my TV to all factory defaults and settings?</td>
<td>• In the main menu, select <strong>Setup</strong>. Highlight <strong>Reset to defaults</strong> and press <strong>OK</strong>. Enter your password (if created earlier) or create a temporary new password. Select <strong>Yes</strong> to reset the TV.</td>
</tr>
</tbody>
</table>
First, unplug the Power cord plug from the wall outlet.

**Display panel**

The front of the display panel has been specially treated. Wipe the panel surface gently using only a cleaning cloth or a soft, lint-free cloth.

- If the surface is particularly dirty, after cleaning up the dust, soak a soft, lint-free cloth in diluted mild liquid dish soap (1 part mild liquid dish soap diluted by 100 times the amount of water) and then wring the cloth to remove excess liquid. Use this cloth to wipe the surface of the display panel, then wipe it evenly with a dry cloth of the same type until the surface is dry.

- Do not scratch or hit the surface of the panel with fingernails or other hard objects. Furthermore, avoid contact with volatile substances such as insect sprays, solvents, and thinner, otherwise, the quality of the surface may be adversely affected.
First, unplug the Power cord plug from the wall outlet.

**Cabinet**

If the cabinet becomes dirty, wipe it with a soft, dry cloth.

- If the cabinet is particularly dirty, soak the cloth in a weak mild liquid dish soap and then wring the cloth dry. Use this cloth to wipe the cabinet and then wipe it dry with a dry cloth.
- Do not allow any mild liquid dish soap to come into direct contact with the surface of the TV. If water droplets get inside the unit, operating problems may result.
- Avoid contact with volatile substances such as insect sprays, solvents, and thinner, otherwise, the quality of the cabinet surface may be adversely affected or the coating may peel off.
- Do not let articles made from rubber or PVC be in contact with the TV for long periods of time.
First, unplug the Power cord plug from the wall outlet.

**Pedestal**

- Cleaning
  Wipe the surfaces with a soft, dry cloth. If the unit is particularly dirty, clean it using a cloth soaked with water to which a small amount of mild liquid dish soap has been added and then wipe with a dry cloth. Do not use products such as solvents, thinner, or household wax for cleaning, as they can damage the surface coating. (If using a chemically-treated cloth, follow the instructions supplied with the cloth.)
- Do not attach sticky tape or labels, as they can make the surface of the pedestal dirty. Do not allow long-term contact with rubber, vinyl products, or the like. (Doing so will cause deterioration.)

**Power cord**

- Wipe the plug with a dry cloth at regular intervals. (Moisture and dust can lead to fire or electrical shock.)
Support / FAQ
Care and Cleaning
3D Eyewear

■ 3D Eyewear
- Clean using a soft, dry cloth.
- Wiping the 3D Eyewear with a soft cloth that is covered in dust or dirt may scratch the eyewear. Shake off any dust from the cloth before use.
- Do not use benzene, thinner, or wax on the 3D Eyewear, as doing so may cause the paint to peel off.
- Avoid storing the 3D Eyewear in hot or highly humid locations.
