</tr>
<tr>
<td>Smart Touch Control</td>
<td>Power cord</td>
</tr>
<tr>
<td></td>
<td>Cable manager</td>
</tr>
<tr>
<td>Batteries (AAA x 2)</td>
<td>IR extender</td>
</tr>
<tr>
<td></td>
<td>Wall mount adapter</td>
</tr>
</tbody>
</table>

**Also included:** Cleaning cloth, user manual, regulatory guide, 3D Active Glasses

---

### Step 1 Attach the TV to the Stand

1. Lay the TV on a soft surface, screen side down. Use the packing material to protect the screen.

2. Put a base and screws off to assemble the stand out of the box.

3. Fit the stand and mount together, making sure the notch on the mount aligns with the stand.

4. Insert 4 screws and secure the stand to the mount.

5. Holding the stand parallel to the screen, slide the stand into the notches on the back of the TV.

6. Insert 4 screws and secure the stand to the TV.

---

**Warning:** Screens can be damaged from direct pressure when handled incorrectly. We recommend lifting the TV by the edges, as shown.

---

**REQUIRED TOOLS:** a Phillips head screwdriver and a soft, flat surface larger than the TV (such as the box).
**Step 2 Connect video devices**

We suggest using HDMI connections whenever possible for the best picture quality. The displayed image may differ depending on the model.

---

**Best Connection: HDMI**
- We suggest using HDMI whenever possible.
  - HDMI 1 is the default port for a cable or satellite set-top box.
  - Use the other ports for Blu-ray players, game consoles, and other devices.

**Good Connection: Component and AV**
- Match the colors on your device's cables to the colors on the jacks. Connect the yellow composite video out connector from an AV device to the green AV IN jack.
- AV also accepts component video connections (red/green/blue).

---

**Step 3 Insert the batteries into the remote control**

To open, put your plastic card into the notch.

---

**Step 4 Power on and start the initial setup**

Information required:
- Wi-Fi network password (if you use one)
- Zip code
- Cable or satellite provider info

The TV must be connected to the Internet to use the Smart Features. If you have a wireless network, we recommend that you confirm that your network router is switched on and working before you start the initial setup. If you have a wired network, we recommend that you connect the TV to the network with a CAT 7 cable before you begin.

---

**Troubleshooting**

- **The stand is wobbly or crooked**
  Make sure the arrows on the stand are properly aligned.
- **The TV won't turn on**
  Make sure all cables are fully inserted, and that the remote has batteries installed.
- **My remote, gesture, or voice controls don't work**
  The TV ships with protective stickers covering some of the sensors. Make sure all of them have been removed.
- **I have extra parts**
  The TV includes some optional parts to help with wall mounting and cable routing.

---

Congratulations on your new Smart TV!
